Statistics Canada Statistique Canada

Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Shipments, Inventories and Orders Section,
Manufacturing and Primary Industries Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 990-9832) or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(949-4020)
Montréal	(283-5725)	Regina	(359-5405)
Ottawa	(990-8116)	Edmonton	(420-3027)
Toronto	(966-6586)	Vancouver	(666-3691)

Toll-free access is provided in all provinces and territories, **for users who reside outside the local dialing area** of any of the regional reference centres.

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Section des livraisons, des stocks et des commandes,
Division des industries manufacturières et primaires,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 990-9832) ou au centre de consultation de Statistique Canada à:

EXPLANATION OF REVISIONS

Series published in this issue have been revised from January 1981 to date to conform with the 1980 Standard Industrial Classification (S.I.C.) adjusted to 1981 Census of Manufactures benchmark data.

Summary Aggregations

The classification coverage of the 1970 and 1980 S.I.C. is largely unchanged, apart from three relatively minor exceptions which have been removed from manufacturing and three which have been added. Those removed include: food specialty stores which were part of bakeries and are now considered part of retail trade; furniture re-upholstery and repair shops which are now considered part of retail trade; offices of denturists which were part of dental laboratories are now part of health and social services. Those added include: bottlers of mineral and spring water which were classified in wholesale trade and are now part of the soft drink industry in manufacturing; photographic developing, printing and enlarging services, which were classified in miscellaneous services and are now part of the platemaking, typesetting and bindery industry in manufacturing and rebuilding of industrial electrical motors, which was classified under miscellaneous services and is now part of the other electrical industrial equipment industries in manufacturing. Because these six industries accounted for no more than a small portion of total manufacturing values, the above changes have had a minimal effect on the summary aggregation in Tables 1 and 2.

Major Industry Group Totals

Table 3, relating to shipments, orders and inventories by Major Industry Group, contains many adjustments as a result of the adoption of the 1980 S.I.C. There are now 22 major industry groups compared to 20 in the 1970 S.I.C. Of these 22 major groups, three were not affected by the new S.I.C. These are: Group 12, Tobacco products industries; Group 35, Non-metallic Mineral products industries; Group 36, Refined Petroleum and Coal products industries.

For a description of changes at the more detailed industry level, please refer to the 1980 S.I.C. publication for the group(s) of interest.

Economic Use Group Classification

As a reference, Table 8 of this publication provides a list of industries by economic use group. This classification still comprises six mutually exclusive groups; however, there are some definitional and title changes. First the definition of the non-durable consumer goods group has changed and now includes semi-durable goods and this becomes the consumer non-durable and semi-durable goods industries. The definitions of the following groups did not change but their titles did: (i) the durable consumer goods industries becomes the Consumer durable goods industries; (ii) the Machinery and equipment industries becomes the

EXPLICATIONS DES RÉVISIONS

Les séries publiées dans ce numéro ont été révisées depuis janvier 1981 à ce jour, pour les aligner sur la Classification type des industries (C.T.I.) de 1980. Elles ont été ajustées en fonction des données repères du recensement des manufactures de 1981.

Agrégats récapitulatifs

La classification du champ d'observation de la C.T.I. de 1980 lorsque comparée à celle de 1970 est demeurée presqu'inchangée à l'exception de trois cas relativement mineurs qui ont été enlevés de la classification manufacturière et de trois autres qui y ont été ajoutés. Ceux qui ont été retirés sont: les magasins d'alimentation spécialisés qui faisaient partie des boulangeries font maintenant partie du commerce de détail, les ateliers de réparation de meubles font maintenant partie du commerce de détail, les cabinets de denturologistes qui faisaient partie des ateliers de mécanicien - dentistes font maintenant partie des services de soins de santé et des services sociaux. D'autre part ceux qui ont été ajoutés sont: les embouteilleurs d'eau minérale qui faisaient partie du commerce de gros font maintenant partie de l'industrie des boissons gazeuses des industries manufacturières, les services de développement et de tirage de films et d'agrandissements photographiques qui faisaient partie des autres industries de services font maintenant partie de l'industrie du clichage, de la composition et de la reliure des industries manufacturières et les ateliers de réparation de moteurs électriques qui faisaient partie des autres industries de services font maintenant partie des autres industries de matériel électrique d'usage industriel des industries manufacturières. Puisque ces six industries ne représentent qu'une petite fraction du secteur de la fabrication, les changements mentionnés plus haut, n'ont eu aucun effet notable sur les agrégats récapitulatifs des tableaux 1 et 2.

Total des groupes d'industries

Le tableau 3, qui a trait aux livraisons, les commandes et les stocks par groupe d'industries, comprend plusieurs ajustements entraînés par l'adoption de la C.T.I. de 1980. Il y a maintenant 22 grands groupes d'industries comparativement à 20 dans la C.A.É. de 1970. De ces 22 grands groupes d'industries, trois ne sont pas affectées par l'adoption de la nouvelle C.T.I.: groupe 12, industries du tabac; groupe 35, industries des produits minéraux non métalliques; groupe 36, industries des produits raffinés du pétrole et du charbon.

Pour une description plus détaillée des changements au niveau des industries, le lecteur devrait se référer à la publication de la C.T.I. de 1980.

Classification des groupes selon l'utilisation économique

À titre de référence, le tableau 8 de cette publication, nous donne une liste des industries classifiées selon l'utilisation économique. Cette classification comprend toujours six groupes mutuellement exclusifs, mais comporte cependant des changements de titres et de définitions. Le groupe des industries des biens de consommation non durables comprend maintenant les biens semi durables et devient donc le groupe des industries des biens de consommation non durables et semi durables. Les définitions des autres groupes sont inchangées mais les titres suivants ont été modifiées: (i) le groupe des industries des machines et du matériel devient le groupe des industries de capital; le groupe des industries des autres

Capital goods industries; (iii) the Other intermediate goods and supplies industries becomes the Intermediate goods (except construction) industries; (iv) the Export-based industries becomes the Export-oriented industries. The remaining group, Construction materials and components, did not change. There is also a supplementary group, the Automotive products industries, which is independent of the above classification.

NOTE: Although the definitions of most economic use groups have not changed, users should compare the 1970 and 1980 allocation of industries, because there are many significant differences, due to the greater detail given in the 1980 S.I.C. than in the 1970 S.I.C. The 1980 allocation of industries is shown in table 8 and the 1970 allocation were published in publications up to February 1980.

produits et fournitures intermédiaires devient le groupe des industries des produits intermédiaires (sauf construction). Les titres des autres groupes sont inchangés. Il y a aussi un groupe complémentaire; les industries connexes de l'automobile, qui est indépendant de cette classification.

NOTA: Même si les définitions de presque tous les groupes économiques n'ont pas changé, les utilisateurs devraient comparer l'allocation des industries de 1970, publié jusqu'en février 1980, et celle de 1980 au tableau 8 de cette publication, parce qu'il y a plusieurs différences. Ces dernières sont attribuables à une classification plus détaillée en 1980 par rapport à celle de 1970.

HIGHLIGHTS

January 1985

- Preliminary estimates for the seasonally adjusted value of shipments in all Canadian manufacturing industries increased 2.3% to $19,837.6 million in January 1985, from the revised estimate of $19,391.4 million in December. Shipments of durable goods were up 1.5% to $9,477.1 million from $9,338.3 million. Increases of $287.3 million in transportation equipment industries and $61.1 million in metal fabricating industries were principally responsible for this increase. A decrease of $144.4 million in primary metal industries partially dampened the impact of these increases. Increases of $255.2 million in refined petroleum and coal products industries and of $82.7 million in paper and allied products industries, more than offsetting the decrease of $78.5 million in clothing industries, were the major contributors to a 3.1% increase in non-durable goods industries as shipments went from $10,053.1 million to $10,360.4 million.

  See Note at end of text.

- Seasonally adjusted inventories owned by manufacturers at the end of January were $33,330.7 million, down 0.9% from the previous month's revised value of $33,648.0 million. Total inventories held decreased 0.8% to $34,559.9 million from $34,851.7 million, including decreases of 1.3% in raw materials, 0.6% in goods in process and 0.5% in finished products.

- Based on seasonally adjusted totals, the ratio of inventory owned to shipments at the end of January was 1.68:1, down from 1.74:1 in December. The ratio of finished products inventory to shipments went from 0.63:1 in December to 0.61:1 in January.

- The value of new orders received in January, seasonally adjusted, increased 0.8% to $19,707.4 million from the revised December estimate of $19,556.2 million. In the durable goods industries, new orders, with an estimated value of $9,290.0 million, were 2.2% lower than the December value of $9,494.5 million. Decreases of $204.4 million in primary metal industries and of $175.7 million in machinery industries were only partly offset by an increase of $117.4 million in transportation equipment industries. In the non-durable goods industries, new orders were valued at $10,417.4 million, up 3.5% from the revised estimate for December of $10,061.7 million.

- The seasonally adjusted unfilled orders backlog at the end of January was $22,314.0 million, down 0.6% from the revised December estimate of $22,444.1 million. Unfilled orders in the durable goods industries totalled $20,326.8 million down 0.9% from the $20,513.9 million registered at the end of December; in the non-durable goods industries, the estimate was $1,-987.2 million, up 3.0% from the $1,930.2 million recorded in December.

POINTS SAILLANTS

Janvier 1985

- Après désaisonnalisation, la valeur des livraisons des industries manufacturières canadiennes s'est établie à $19,837.6 millions en janvier 1985, soit une hausse de 2.3% par rapport à la valeur révisée de $19,391.4 millions en décembre. Une augmentation de 1.5% a été enregistrée pour les biens durables qui sont passés de $9,338.3 millions à $9,477.1 millions. Cette hausse est principalement attribuable à des augmentations de $287.3 millions dans les industries du matériel de transport et de $61.1 millions dans les industries de la fabrication des produits métalliques. Ces augmentations ont été en partie contrebalancées par une diminution de $144.4 millions dans les industries de première transformation des métaux. Les livraisons des biens non durables ont augmenté de 3.1% passant de $10,053.1 millions à $10,360.4 millions. Dans ce groupe, une diminution de $78.5 millions dans les industries de l'habillement fut contrebalancée par des hausses de $255.2 millions dans les industries des produits raffinés du pétrole et du charbon et de $82.7 millions dans les industries du papier et produits connexes.

  Voir nota à la fin du texte.

- La valeur désaisonnalisée du total des stocks possédés était de $33,330.7 millions en janvier, une baisse de 0.9% par rapport à la valeur du mois précédent de $33,648.0 millions. Pour leur part, les stocks détenus ont diminué de 0.8% à $34,559.9 millions de $34,851.7 millions. Des diminutions furent enregistrées au chapitre des matières premières (-1.3%), des biens en cours de transformation (-0.6%) et des produits finis (-0.5%).

- Le rapport désaisonnalisée du total des stocks possédés aux livraisons basé sur les totaux désaisonnalisés s'est établi à 1.68:1 en janvier, en baisse par rapport à celui de décembre qui était de 1.74:1. Le rapport des produits finis aux livraisons est passé de 0.63:1 à 0.61:1.

- La valeur désaisonnalisée des nouvelles commandes dans l'ensemble des industries manufacturières a été estimée à $19,707.4 millions, ce qui représente une hausse de 0.8% par rapport au mois précédent qui était de $19,556.2 millions. Dans les industries des biens durables, la valeur estimative de $9,290.0 millions en janvier était inférieur de 2.2% à la valeur de décembre de $9,494.5 millions. Cette diminution est principalement attribuable à des pertes de $204.4 millions dans les industries de première transformation des métaux et de $175.7 millions dans les industries de la machinerie. Ces diminutions ont été en partie contrebalancées par une augmentation de $117.4 millions dans les industries du matériel de transport. Les nouvelles commandes des biens non durables ont atteint $10,417.4 millions, ce qui représente une hausse de 3.5% par rapport à la valeur révisée de décembre ($10,061.7 millions).

- La valeur estimative des commandes en carnet, après désaisonnalisation, s'est établie à $22,314.0 millions, une baisse de 0.6% par rapport au mois précédent qui était de $22,444.1 millions. Les commandes en carnet des biens durables ont diminué de 0.9% passant de $20,513.9 millions à 20,326.8 millions, alors que celles des biens non durables ont augmenté de 3.0% passant de $1,930.2 millions à $1,987.2 millions.

- Not adjusted for seasonal variation, manufacturers' shipments in January 1985 were estimated at $18,-363.1 million, 3.5% higher than the revised December 1984 value of $17,746.3 million and 7.3% higher than the January 1984 value of $17,121.0 million.

NOTE

In converting from the 1970 to the 1980 Standard Industrial Calssification (S.I.C.), a change in sampling stratum resulted in an invalid imputation for S.I.C. 2712 Newsprint (1980 S.I.C. code) for the shipments series for Newfoundland. Also affected are aggregations containing this industry. These aggregations include S.I.C. 271, Major group 27, the Non-durable goods total, the Export oriented group and Total manufacturing. Corresponding series for new orders, although not broken down by province, are also subject to the same revisions. The correct total for the shipments series should be approximately $5 million less per month for 1982, $8 million less per month in 1983 and $10 million less a month from January 1984 to February 1985. These revisions will be incorporated in the March 1985 issue of this publication.

- On a estimé à $18,363.1 millions les livraisons non désaisonnalisées en janvier 1985, ce qui représente une hausse de 3.5% par rapport à la valeur révisée de décembre 1984 qui était de $17,746.3 millions et une hausse de 7.3% par rapport à la valeur de janvier 1984 qui était de $17,121.0 millions.

NOTA

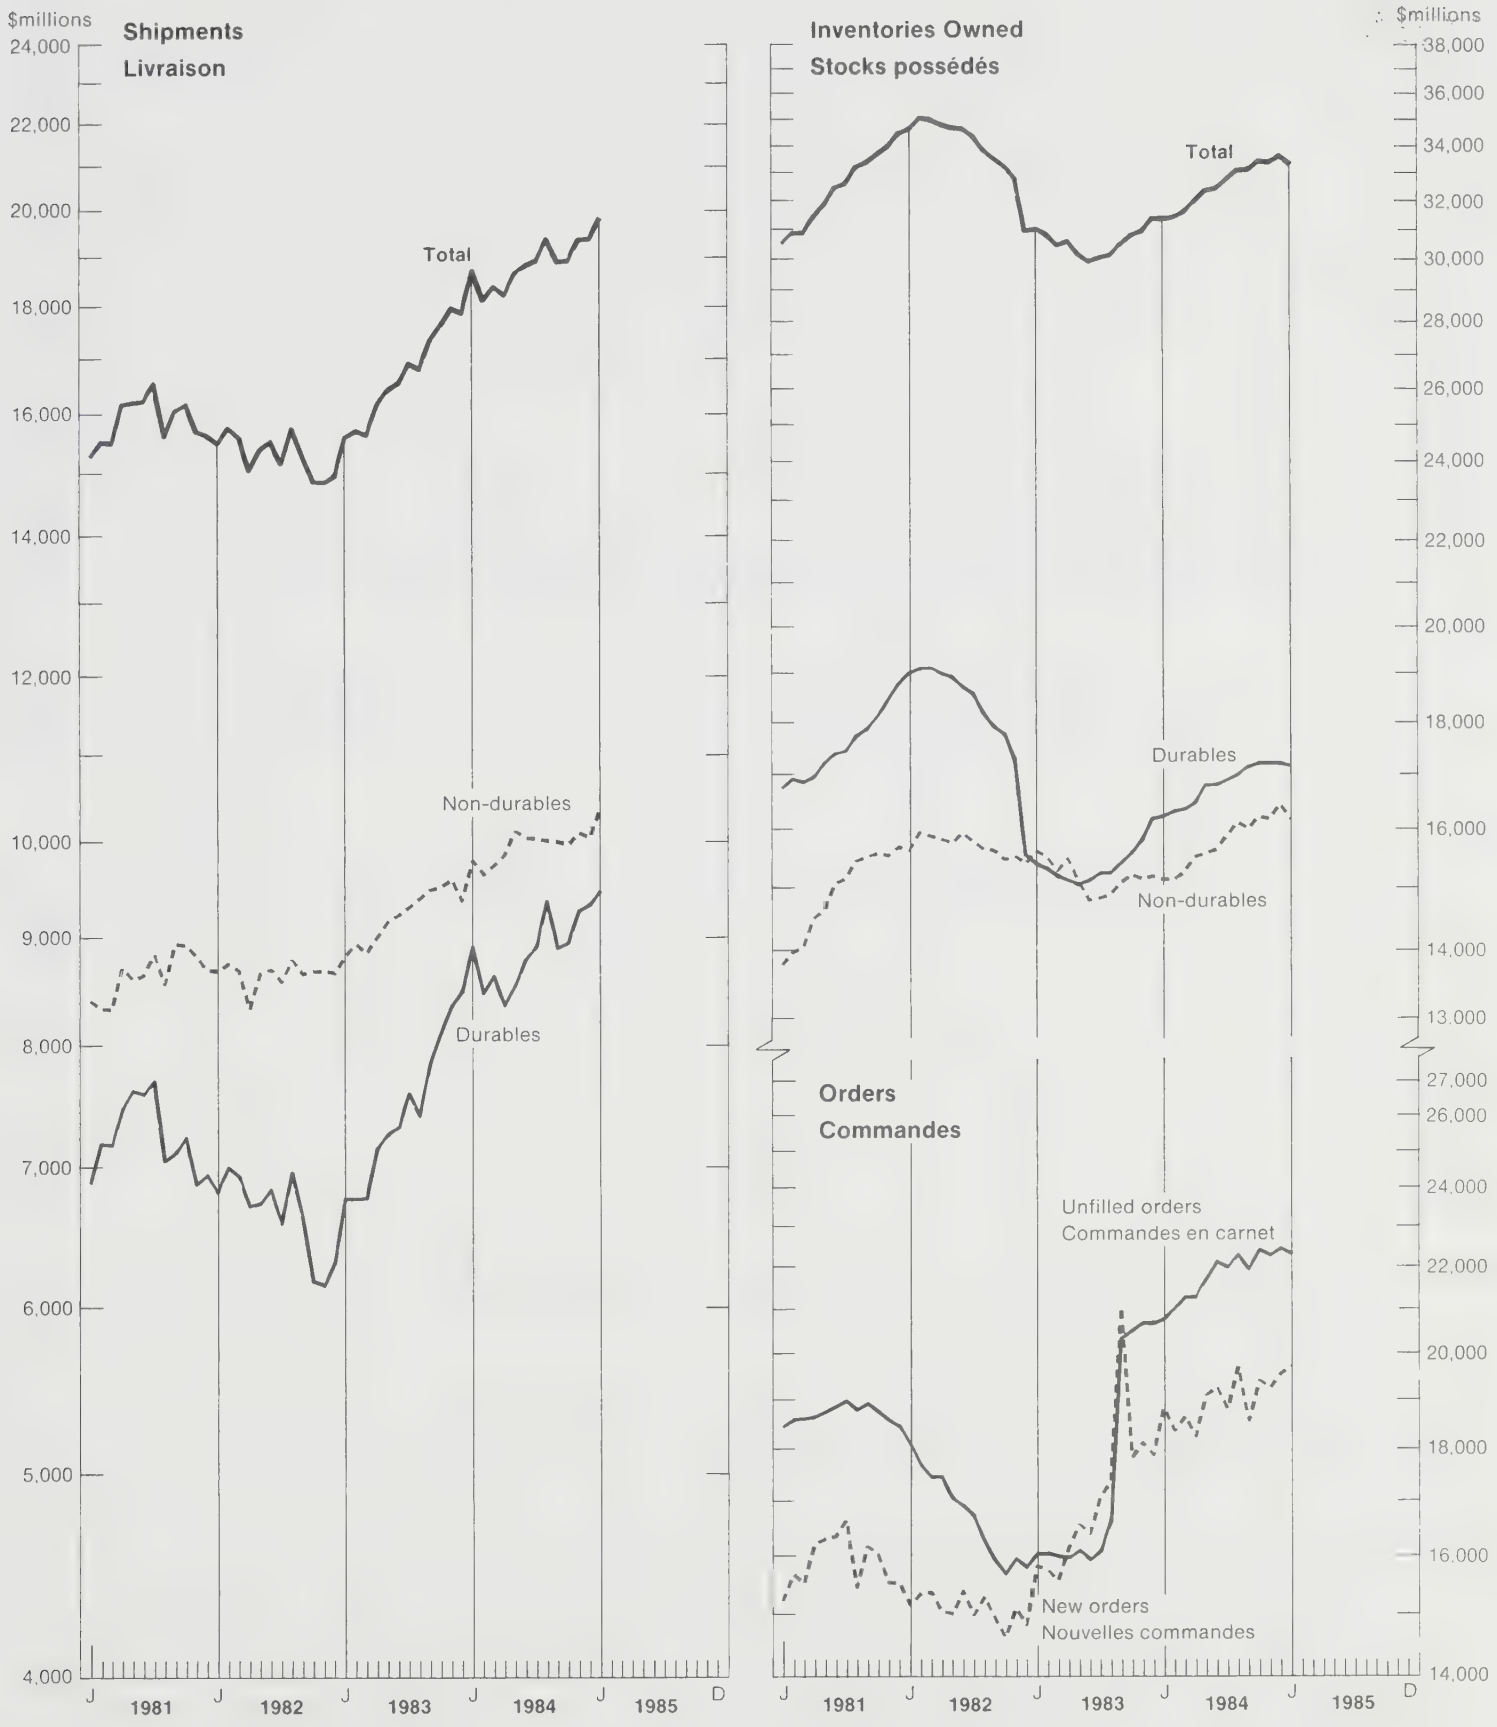

Lors de la conversion de la Classification des activités économiques de 1970 à la Classification type des industries 1980, un changement dans une strate lors du procédé d'échantillonage, a causé une imputation invalide pour la C.T.I. 2712, industrie de papier journal au niveau des livraisons pour Terre-Neuve. Tous les agrégats contenant cette industrie sont affectés. Ces agrégats incluent: la C.T.I. 271, le grand groupe 27, le total du groupe des biens non durables, les industries orientées vers l'exportation ainsi que le total des industries manufacturières. Les séries correspondantes des nouvelles commandes, même si elles ne sont pas compilées au niveau des provinces, sont sujettes aux mêmes révisions. Les livraisons devraient être réduites approximativement de $5 millions par mois pour 1982, de $8 millions de moins par mois pour 1983 et $10 millions de moins par mois de janvier 1984 à février 1985. Ces révisions vont être incluent dans la publication de mars 1985.

TABLE 8. Industries Classified by Economic Use Groups

TABLEAU 8. Industries classées selon les groupes économiques d'utilisation

Standard industrial classification 1980 Classification type des industries 1980	Economic use groups Groupes économiques d'utilisation						Supplementary classification-automotive products industries Industries classification complémentaires industries connexes de l'automobile
	Consumer non-durable and semi-durable goods Industries Industries des biens de consommation semi durables et non durables	Consumer durable goods industries Industries des biens de consommation durables	Capital goods industries Industries des biens de capital	Construction materials and components industries Industries des matériaux et des éléments de construction	Intermediate goods industries (except construction) Industries des produits intermédiaires (sauf construction)	Export oriented industries Industries orientées vers l'exportation	
	industry number - numéro de l'industrie						
10 — FOOD INDUSTRIES - INDUSTRIES DES ALIMENTS							
Meat & meat products industry (except poultry) - Industries de la viande et de ses produits (sauf la volaille)	1011						
Poultry products industry - Industrie des produits de la volaille	1012						
Fish products industry - Industrie de la transformation du poisson						1021	
Canned & preserved fruit & vegetable industry - Conserverie de fruits & de légumes	1031						
Frozen fruit & vegetable industry - Industrie des fruits et légumes congelés	1032						
Fluid milk industry - Industrie du lait de consommation	1041						
Other dairy products industries - Autres industries de produits laitiers	1049						
Cereal grain flour industry - Meuneries					1051		
Prepared flour mixes & prepared cereal foods industry - Industrie des mélanges de farine préparées et des céréales de table préparées	1052						
Feed industry - Industrie des aliments pour animaux					1053		
Vegetable oil mills (except corn oil) - Industrie des huiles végétales (sauf l'huile de maïs)					1061		
Biscuit industry - Industrie des biscuits	1071						
Bread & other bakery products industry - Industrie du pain et autres produits de boulangerie-pâtisserie	1072						
Cane & beet sugar industry - Industries du sucre de canne et de betterave					1081		
Chewing gum industry - Industrie de la gomme à mâcher	1082						
Sugar & chocolate confectionery industry - Industrie des confiseries et du chocolat	1083						
Tea & coffee industry - Industrie du thé et du café	1091						
Dry pasta products industry - Industrie des pâtes sèches	1092						
Potato chip, pretzel & popcorn industry - Industrie des croustilles, des bretzels et du maïs soufflé	1093						
Malt & malt flour industry - Industrie du malt et des farines de malt					1094		
Other food products industries n.e.c. - Autres industries de produits alimentaires n.c.a.	1099						
11 — BEVERAGE INDUSTRIES - INDUSTRIES DES BOISSONS							
Soft drink industry - Industrie des boissons gazeuses	1111						
Distillery products industry - Industrie des produits de distillation						1121	
Brewery products industry - Industrie de la bière	1131						
Wine industry - Industrie du vin	1141						

TABLE 8. Industries Classified by Economic Use Groups – Continued

TABLEAU 8. Industries classées selon les groupes économiques d'utilisation – suite

Standard industrial classification 1980 Classification type des industries 1980	Economic use groups Groupes économiques d'utilisation Consumer non-durable and semi-durable goods Industries Industries des biens de consommation semi durables et non durables	Consumer durable goods industries Industries des biens de consommation durables	Capital goods industries Industries des biens de capital	Construction materials and components industries Industries des matériaux et des éléments de construction	Intermediate goods industries (except construction) Industries des produits intermédiaires (sauf construction)	Export oriented industries Industries orientées vers l'exportation	Supplementary classification-automotive products industries Industries classification complémentaires industries connexes de l'automobile
	industry number - numéro de l'industrie						
12 — TOBACCO PRODUCTS INDUSTRIES – INDUSTRIES DU TABAC							
Leaf tobacco industry - Industrie du tabac en feuilles					1211		
Tobacco products industry - Industrie des produits du tabac	1221						
15 — RUBBER PRODUCTS INDUSTRIES – INDUSTRIES DES PRODUITS EN CAOUTCHOUC							
Tire & tube industry - Industrie des pneus et chambres à air					1511		1511
Rubber hose & belting industry - Industrie des boyaux et courroies en caoutchouc					1521		
Other rubber products industries - Autres industries de produits en caoutchouc					1599		
16 — PLASTIC PRODUCTS INDUSTRIES – INDUSTRIES DES PRODUITS EN MATIÈRE PLASTIQUE							
Foamed & expanded plastic products industry - Industrie des produits en matière plastique en mousse et soufflée					1611		
Plastic pipe & pipe fittings industry - Industrie des tuyaux et raccords de tuyauterie en matière plastique				1621			
Plastic film & sheeting industry - Industrie des pellicules et feuilles de matière plastique					1631		
Plastic bag industry - Industrie des sacs en matière plastique					1691		
Other plastic products industries n.e.c. - Autres industries de produits en matière plastique n.c.a.					1699		
17 — LEATHER AND ALLIED PRODUCTS INDUSTRIES – INDUSTRIES DU CUIR ET DES PRODUITS CONNEXES							
Leather tanneries - Tanneries					1711		
Footwear industry - Industrie de la chaussure	1712						
Luggage, purse & handbag industry - Industrie des valises, bourses et sacs à main	1713						
Other leather & allied products industries - Autres industries du cuir et des produits connexes					1719		
18 — PRIMARY TEXTILE INDUSTRIES – INDUSTRIES TEXTILES DE PREMIERE TRANSFORMATION							
Man-made fibre & filament yarn industry - Industrie des fibres chimiques et des filés de filaments					1811		
Wool yarn & woven cloth industry - Industrie de la filature et du tissage de la laine					1821		
Other spun yarn & woven cloth industries - Autres industries des filés et tissus tissés					1829		
Broad knitted fabric industry - Industrie des tissus larges, à mailles					1831		

TABLE 8. Industries Classified by Economic Use Groups – Continued

	Consumer non-durable and semi-durable goods Industries Industries des biens de consommation semi durables et non durables	Consumer durable goods industries Industries des biens de consommation durables	Capital goods industries Industries des biens de capital	Construction materials and components industries Industries des matériaux et des éléments de construction	Intermediate goods industries (except construction) Industries des produits intermédiaires (sauf construction)	Export oriented industries Industries orientées vers l'exportation	
	industry number - numéro de l'industrie						
19 — TEXTILE PRODUCTS INDUSTRIES - INDUSTRIES DES PRODUITS TEXTILES							
Natural fibres processing and felt products industry - Industrie du feutre et du traitement des fibres naturelles					1911		
Carpet, mat and rug industry - Industrie des tapis, carpettes et moquettes		1921					
Canvas & related products industry - Industrie des articles en grosse toile et produits connexes		1931					
Narrow fabric industry - Industrie des tissus étroits					1991		
Contract textile dyeing and finishing industry - Industrie de la teinture et du finissage à façon de produits textiles					1992		
Household products of textile materials industry - Industrie des articles de maison en textiles	1993						
Hygiene products of textiles materials industry - Industrie des articles d'hygiène en textiles	1994						
Tire cord fabric industry - Industrie des tissus pour armature de pneus					1995		1995
Other textile products industries n.e.c. - Autres industries de produits textiles n.c.a.					1999		
24 — CLOTHING INDUSTRIES - INDUSTRIES DE L'HABILLEMENT							
Men's & boy's coat industry - Industrie des manteaux pour hommes et garçonnets	2431						
Men's & boy's suit & jacket industry - Industrie des complets et vestons pour hommes et garçonnets	2432						
Men's & boy's pants industry - Industrie des pantalons pour hommes et garçonnets	2433						
Men's & boy's shirt & underwear industry - Industrie des chemises et sous-vêtements pour hommes et garçonnets	2434						
Men's & boy's clothing contractors - Industrie de la confection à forfait de vêtements pour hommes et garçonnets	2435						
Women's coat & jacket industry - Industrie des manteaux et vestes pour dames	2441						
Women's sportswear industry - Industrie des vêtements de sport pour dames	2442						
Women's dress industry - Industrie des robes pour dames	2443						
Women's blouse & shirt industry - Industrie des blouses & chemises pour dames	2444						
Women's clothing contractors - Industrie de la confection à forfait de vêtements pour dames	2445						
Children's clothing industry - Industrie des vêtements pour enfants	2451						
Sweater industry - Industrie des chandails	2491						
Occupational clothing industry - Industrie des vêtements professionnels	2492						
Glove industry - Industrie des gants	2493

Standard industrial classification 1980 Classification type des industries 1980	Economic use groups Groupes économiques d'utilisation Consumer non-durable and semi-durable goods Industries Industries des biens de consommation semi durables et non durables	Consumer durable goods industries Industries des biens de consommation durables	Capital goods industries Industries des biens de capital	Construction materials and components industries Industries des matériaux et des éléments de construction	Intermediate goods industries (except construction) Industries des produits intermédiaires (sauf construction)	Export oriented industries Industries orientées vers l'exportation	Supplementary classification-automotive products industries Industries classification complémentaires industries connexes de l'automobile
	industry number - numéro de l'industrie						
24 — CLOTHING INDUSTRIES – Concluded – INDUSTRIES DE L'HABILLEMENT – fin							
Hosiery industry - Industrie des bas et chaussettes	2494						
Fur goods industry - Industries des articles en fourrure	2495						
Foundation garment industry - Industrie des vêtements de base	2496						
Other clothing & apparel industries n.e.c. - Autres industries de l'habillement n.c.a.	2499						
25 — WOOD INDUSTRIES – INDUSTRIES DU BOIS							
Shingle & shake industry - Industrie du bardeau et du bardeau fendu						2511	
Sawmill & planing mill products industry (except shingles & shakes) - Industrie des produits de scieries et d'ateliers de rabotage (sauf les bardeaux et les bardeaux fendus)						2512	
Hardwood veneer & plywood industry - Industrie des placages et contreplaqués en bois feuillu				2521			
Softwood veneer & plywood industry - Industrie des placages et contreplaqués en bois résineux				2522			
Prefabricated wooden buildings industry - Industrie des bâtiments préfabriqués à charpente de bois				2541			
Wooden kitchen cabinet & bathroom vanity industry - Industrie des armoires et placards de cuisine et des coiffeuses de salle de bain en bois				2542			
Wooden door & window industry - Industrie des portes et fenêtres en bois				2543			
Other millwork industries - Autres industries du bois travaillé				2549			
Wooden box & pallet industry - Industrie des boites et pallettes de bois					2561		
Coffin & casket industry - Industrie des cercueils et bières					2581		
Wood preservation industry - Industrie de la préservation du bois				2591			
Particle board industry - Industrie des panneaux de particules				2592			
Wafer board industry - Industrie des panneaux de copeaux				2593			
Other wood industries n.e.c. - Autres industries du bois n.c.a.					2599		
26 — FURNITURE & FIXTURE INDUSTRIES – INDUSTRIES DU MEUBLE ET DES ARTICLES D'AMEUBLEMENT							
Wooden household furniture industry - Industrie des meubles de maison en bois		2611					
Upholstered household furniture industry - Industrie des meubles de maison rembourrés		2612					
Other household furniture industries - Autres industries des meubles de maison		2619					
Metal office furniture industry - Industrie des meubles de bureau en métal			2641				
Other office furniture industries - Autres industries des meubles de bureau			2649				

TABLE 8. Industries Classified by Economic Use Groups – Continued

	industry number – numéro de l'industrie						
26 — FURNITURE & FIXTURE INDUSTRIES – Concluded – INDUSTRIES DU MEUBLE ET DES ARTICLES D'AMEUBLEMENT – fin							
Bed spring & mattress industry – Industrie des sommiers et matelas		2691					
Hotel, restaurant & institutional furniture & fixture industry – Industrie des meubles et articles d'ameublement pour hôtels, restaurants et institutions			2692				
Other furniture & fixture industry n.e.c. – Autres industries de meubles et articles d'ameublement n.c.a.		2699					
27 — PAPER & ALLIED PRODUCTS INDUSTRIES – INDUSTRIES DU PAPIER ET PRODUITS CONNEXES							
Pulp industry – Industrie des pâtes à papier						2711	
Newsprint industry – Industrie du papier journal						2712	
Paperboard industry – Industrie du carton					2713		
Building board industry – Industrie des panneaux de construction				2714			
Other paper industries – Autres industries du papier					2719		
Asphalt roofing industry – Industrie du papier-toiture asphalté				2721			
Folding carton & set-up box industry – Industrie des boîtes pliantes et rigides					2731		
Corrugated box industry – Industrie des boîtes en carton ondulé					2732		
Paper bag industry – Industrie des sacs de papier					2733		
Coated & treated paper industry – Industrie des papiers couchés et traités					2791		
Stationary paper products industry – Industrie des produits en papeterie					2792		
Paper consumer products industry – Industrie des produits de consommation en papier	2793						
Other converted paper products industries n.e.c. – Autres industries des produits en papier transformé n.c.a.					2799		
28 — PRINTING PUBLISHING & ALLIED INDUSTRIES – IMPRIMERIE, ÉDITION ET INDUSTRIES CONNEXES							
Business forms printing industry – Industrie de l'impression de formulaires commerciaux					2811		
Other commercial printing industries – Autres industries d'impression commerciale					2819		
Platemaking, typesetting & bindery industry – Industrie du clichage, de la composition et de la reliure					2821		
Book publishing industry – Industrie de l'édition du livre	2831						
Other publishing industries – Autres industries d'édition	2839						

TABLE 8. Industries Classified by Economic Use Groups – Continued

	Consumer non-durable and semi-durable goods Industries Industries des biens de consommation semi durables et non durables	Consumer durable goods industries Industries des biens de consommation durables	Capital goods industries Industries des biens de capital	Construction materials and components industries Industries des matériaux et des éléments de construction	Intermediate goods industries (except construction) Industries des produits intermédiaires (sauf construction)	Export oriented industries Industries orientées vers l'exportation	
	industry number - numéro de l'industrie						
28 – PRINTING PUBLISHING & ALLIED INDUSTRIES – Concluded – IMPRIMERIE, ÉDITION ET INDUSTRIES CONNEXES – suite							
Newspaper, magazine & periodical (combined publishing & printing) industry - Industrie des journaux, revues et périodiques (impression et édition combinées)	2841						
Other combined publishing & printing industries - Autres industries d'impression et d'édition combinées	2849						
29 – PRIMARY METAL INDUSTRIES – INDUSTRIES DE PREMIÈRE TRANSFORMATION DES METAUX							
Ferro-alloys industry - Industrie des ferro-alliages					2911		
Steel foundries - Fonderies d'acier					2912		
Other primary steel industries - Autres industries sidérurgiques					2919		
Steel pipe & tube industry - Industrie des tubes et tuyaux d'acier				2921			
Iron foundries - Fonderies de fer					2941		
Primary production of aluminum industry - Industrie de la production d'aluminum de première fusion						2951	
Other primary smelting & refining of non-ferrous metal industries - Autres industries de la fonte et de l'affinage de métaux non ferreux						2959	
Aluminum rolling, casting & extruding industry - Industrie du laminage, du moulage et de l'extrusion de l'aluminum					2961		
Copper & copper alloy rolling, casting and extruding industry - Industrie du laminage, du moulage et de l'extrusion du cuivre et des alliages					2971		
Other rolled, cast & extruded non-ferrous metal products industries - Autres industries du laminage, du moulage et de l'extrusion de métaux non ferreux					2999		
30 – FABRICATED METAL PRODUCTS INDUSTRIES (except machinery & transportation equipment industries – INDUSTRIES DE LA FABRICATION DES PRODUITS MÉTALLIQUES (sauf les industries de la machinerie et du matériel de transport)							
Power boiler & heat exchanger industry - Industries des chaudières à pression et échangeurs de chaleur				3011			
Metal tanks (heavy gauge) industry - Industrie des réservoirs en métal (épais)				3021			
Plate work industry - Industrie des tôles fortes					3022		
Pre-engineered metal buildings industry (except portable) - Industrie des bâtiments préfabriqués en métal (sauf transportables)				3023			
Other fabricated structural metal products industries - Autres industries de la fabrication d'éléments de charpentes métalliques				3029

Musical instrument & sound recording industry - Industrie de l'enregistrement du son et des instruments de musique		3994					
Other manufactured products industries n.e.c. - Autres industries de produits manufacturés n.c.a.		3999					

FOOTNOTES

Table 1

(1) Although separate series for the Yukon and the Northwest Territories are not published, their values are included in the Canada total.

(2) The value for total shipments contains four industries where "production" is used instead of shipments. Please see concepts and methods, 4th paragraph for more details.

Tables 3-4

(1) Series in Table 3, which contain no significant seasonality, include: raw materials in the petroleum industries; goods in process in the primary metal industries; and inventory held but not owned in the transportation equipment industries and in Table 4: the series for unfilled orders in the export-oriented industries and supplementary classification - automotive products industries; and raw materials in the supplementary classification - automotive products industries. Therefore, these series are repeated without adjustment in the tables of seasonally adjusted estimates and aggregates of which they are components. Small differences in the unadjusted values, when repeated, may result from rounding techniques.

Table 6

(1) For this industry, "production" is used instead of shipments. For explanation, please see concepts and methods, 5th paragraph.

Note: Figures may not add due to rounding.

NOTES

Tableau 1

(1) Même si les séries pour le Yukon et les Territoires du Nord-Ouest ne sont pas publiées elles sont cependant inclues dans le total pour le Canada.

(2) La valeur des livraisons totales contient quatre industries ou la "production" est utilisée au lieu des livraisons. Pour plus de détails, voir le 4ième paragraphe des concepts et méthodes.

Tableaux 3-4

(1) Les séries du tableau 3, qui sont peu sensibles aux variations saisonnières incluent: les matières premières dans l'industrie pétrolière, les biens en cours dans les industries de première transformation les métaux, les stocks détenus mais non possédés dans les industries du matériel de transport et du tableau 4: la série des commandes en carnet dans les industries orientées vers l'exportation et dans la classification complémentaire-industries connexes de l'automobile, ainsi que les matières premières dans la classification complémentaire-industries connexes de l'automobile. Le tableau de la série désaisonnalisée répète donc les valeurs non corrigées. Les différences minimes entre les séries sont attribuables à la technique d'arrondissement utilisée.

Tableau 6

(1) Pour cette industrie, la "production" est utilisée au lieu des livraisons. Pour plus de détails, voir le 5ième paragraphe des concepts et méthodes.

Nota: Les chiffres ne totaliseront peut-être pas en raison de l'arrondissement.

CONCEPTS AND METHODS

Estimation Method

Inventories, shipments and orders values in this publication constitute monthly projections of annual census of manufactures values based on returns from a stratified, systematic sample of manufacturing establishments. The data in the January 1985 publication are the first to be published under the 1980 Standard Industrial Classification (SIC). The data in this publication are benchmarked to the 1981 Census. Values for years prior to 1981 have been previously benchmarked to the corresponding census data and the aggregate of monthly shipments in those years should correspond with published census values. Because the monthly estimates subsequent to 1981 are projections these totals are subject to adjustment when more recent census data become available. Inventory estimates for December published here, differ from year-end census values to the extent that census totals include individual establishment reports for fiscal years that may end on dates other than December 31. Unfilled orders are published for industries where maintenance of a continuing record of the value of an establishment's backlog of orders is a normal part of the accounting procedure.

The population of manufacturing establishments is divided into groups of large, medium and small establishments according to the value of shipments reported for the census year. Monthly values are sought for all large establishments and a sample is chosen separately for each of the other two size groups. Sample unit values are weighted according to the inverse of their probability of selection. This sample is revised annually in accordance with the census base. To facilitate timely response from company accounting departments, combined reports are accepted from companies with more than one establishment. Estimates of current values are accepted from establishments where the inventory and unfilled orders levels are not measured at the end of each accounting period. There are about 11,000 establishments in the reporting panel.

Inventories

Isolation of component values of inventory by level of fabrication in each industry, where possible, is important for economic studies as well as for derivation of production values. To facilitate this, respondents are asked to report their book values of raw materials, work in process, finished products and progress payments separately. The inventory levels are calculated on a Canada-wide basis, not by province.

Both inventory held and inventory owned, are published. The difference between inventory held and inventory owned, is the value of progress payments received by manufacturers for partially completed items such as aircraft, railroad rolling stocks, ships and structures using fabricated steel. As work proceeds on such items, total inventory values increase until the time of delivery. By deducting the balance of progress payments on manufacturers' books from total inventory, the value of manufacturers' investment in inventory is derived.

CONCEPTS ET MÉTHODES

Méthode d'estimation

Les chiffres sur les stocks, les livraisons et les commandes qui figurent dans cette publication sont des projections mensuelles des résultats du recensement annuel des manufactures établies à partir des déclarations d'un échantillon stratifié et systématique d'établissements manufacturiers. Les données que contient la publication de janvier 1985 sont les premières qui soient publiées sous la Classification Type des Industries (C.T.I.) de 1980. Les données que contient la publication sont ajustées en fonction du recensement de 1981. Les chiffres pour les années jusqu'à 1981 inclusivement ont été raccordés aux recensements en cause et la somme des livraisons mensuelles de ces années doit être égale aux résultats de recensements qui ont été publiés. Comme les estimations mensuelles postérieures à 1981 sont des projections, elles pourront être rectifiées lorsqu'on disposera des données de recensement plus récentes. Les estimations sur les stocks publiées dans ce bulletin sont celles de décembre, elles diffèrent donc des chiffres du recensement se rapportant à la fin de l'année dans la mesure où les totaux du recensement comprennent les déclarations de certains établissements pour des années financières qui peuvent prendre fin à d'autres dates qu'au 31 décembre. Les commandes en carnet sont publiées pour les industries où la comptabilité normale prévoit de consigner la valeur des commandes en souffrance des établissements d'une manière suivie.

La population des établissements manufacturiers se divise en trois groupes d'établissements (grands, moyens et petits) suivant la valeur des livraisons déclarées pour l'année de recensement. On demande des déclarations mensuelles à tous les grands établissements et on tire un échantillon séparé pour chacun des deux autres groupes. Les valeurs de l'échantillon sont pondérées en relation inverse de la probabilité qu'elles soient choisies. Cette échantillon est revisé annuellement suivant les résultats du recensement. Dans le but d'aider les services de comptabilité des sociétés à envoyer leurs déclarations à temps. Statistique Canada accepte une déclaration globale pour les sociétés ayant plus d'un établissement et une estimation des chiffres courants pour les établissements dont les stocks et les commandes en carnet ne sont pas recensés à la fin de chaque exercise comptable. On compte environ 11,000 établissements qui produisent des déclarations.

Les stocks

Il est important d'isoler les chiffres des éléments des stocks selon le stage de fabrication dans chaque industrie, lorsque c'est possible, afin de faire des études économiques et des extrapolations des chiffres de production. Â cet effet, on demande aux enquêtés de déclarer séparément la valeur comptable de leurs matières premières, de leurs produits en cours, de leurs produits finis et de leurs acomptes à valoir. Les niveaux des stocks sont calculés pour l'ensemble du Canada et non au niveau provincial.

On publie la valeur des stocks détenus et des stocks possédés. La différence entre les deux donne la valeur des acomptes versés par les fabricants sur des produits dont la fabrication n'est qu'en partie achevée comme les avions, le matériel ferroviaire roulant, les bâteaux et des constructions qui utilisent des semi-produits en acier. Â mesure que la fabrication de ces produits avance, la valeur globale des stocks augmente jusqu'au moment de la livraison. En déduisant le solde des acomptes comptabilisés par les fabricants de l'ensemble des stocks, on obtient la somme investie dans les stocks par les fabricants.

In order to reduce the distortion in the shipments of the four above mentioned industries that would be caused when responding companies finally treat such items of relatively high value as completed sales, a "production" value is used instead of shipments. This production value is derived from adjusting monthly shipments by the monthly change in inventories held (Goods in process held + Finished Products). The raw materials are not included in the calculation since production tries to measure "work done" during the month.

Orders

Most establishments that maintain order books strike a value of unfilled orders at the end of each accounting period. The survey seeks this value which is defined as orders received but not shipped or treated as a sale whether or not work has been done on them or they can be filled from existing stocks. No estimate of this value is made for those industries where orders are customarily filled from stocks on hand and orders books are accordingly not generally maintained.

New orders, a series of considerable economic interest, is a residual value derived from shipments and unfilled orders. All shipments within any month result from an order received either during that month or at some earlier time. New orders are calculated as the sum of total shipments within any month plus the change in the total of unfilled orders from the end of the previous month to the end of the month under review.

Imputation

Values must be imputed for those establishments that have not reported in time for compilation of monthly estimates. This is largely done by mechanical methods which take into account the activity of similar establishments from which reports have been received.

Revisions

Calculation of revised estimated for the immediately prior month in conjunction with preliminary estimates for the current month permits use of values reported too late for the first compilation. When respondents report values for periods earlier than those of the revised current estimates, the responses are used to correct the trends when the series are updated to new census benchmarks.

Definitions, classifications and groupings are based on those used by the census of manufactures.

The January 1973 issue of this publication contains a more detailed description of the concepts and survey methods for these series.

Afin de réduire la distortion qui surviendrait dans les quatres industries en cause au moment où les sociétés observées considèrent en fin de compte des produits d'une valeur relativement grande comme des ventes achevées, une valeur de "production" est utilisée au lieu des livraisons. Pour arriver à cette valeur de production, il s'agit d'ajuster la valeur mensuelle des livraisons par le changement mensuel dans les inventaires détenus (Produits en cours détenus + Produits finis). Les matières premières ne sont pas inclus dans ce calcul car nous essayons de calculer le "travail fait" durant le mois.

Les commandes

La plupart des établissements qui tiennent des carnets de commandes établissent la valeur des commandes en carnet à la fin de chaque exercise comptable. Lors de l'enquête, nous demandons cette valeur, qui est considérée comme commandes reçues mais non encore expédiées, que des travaux aient été effectués ou non à leur égard, lorsque la commande peut être honorée à partir des stocks existants. Cette valeur n'est pas estimée dans le cas des entreprises qui exécutent habituellement les commandes des réceptions, à partir de leurs stocks et qui par conséquent ne tiennent pas de carnet de commande.

Les séries sur les nouvelles commandes, qui présentent beaucoup d'intérêt du point de vue économique, donnent la valeur résiduelle établie à partir des livraisons et des commandes en carnet. Toutes les livraisons effectuées au cours d'un mois donné résultent d'une commande reçue soit pendant ce mois, soit avant. Les nouvelles commandes sont calculées à partir du total des livraisons au cours d'un mois donné plus la différence entre le total des commandes en carnet à la fin du mois précédent et le total des commandes en carnet à la fin du mois observé.

Imputation

Les valeurs doivent être imputées pour les établissements qui n'ont pas rapporté à temps pour la compilation des estimées mensuelles. Cette imputation se fait surtout par des moyens mécaniques qui tiennent compte de l'activité d'établissements semblables qui ont fait parvenir des déclarations.

Révisions

Le calcul des estimations revisées pour le mois précédent et des estimations préliminaires pour le mois observé permet d'utiliser les données déclarées trop tard pour la première compilation. Lorsque les répondants déclarent les chiffres correspondants aux périodes antérieures à celle des estimations révisées actuelles, les réponses servent à corriger les tendances lorsque les séries sont mises à jour d'après les nouvelles données repéré du recensement.

Les définitions, les classifications et les groupes sont basés sur ceux du recensement des manufactures.

Le numéro de janvier 1973 de cette publication contient une description plus détaillée des concepts et des méthodes d'enquête de cette série.

Historical Series

Major series published in this issue are stored in CANSIM, the computerized time series data bank of Statistics Canada. All or any part of these series may be purchased on magnetic tape or as computer print-outs. For further information direct inquiries to:

CANSIM,
Application Consulting Section,
Statistics Canada,
Ottawa, Ontario, K1A 0Z8

Seasonal Adjustment

The seasonal adjustment method applied to the series consists of the ratio-to-moving average method in use at Statistics Canada. The X-11 - ARIMA program is used for seasonal adjustment.

Some series containing no significant seasonality or very high irregularity have not been seasonally adjusted. In these cases, unadjusted values are repeated in the tables of seasonally adjusted data. See footnotes for series affected.

Months for Cyclical Dominance

The MCD or months for cyclical dominance values located at the right of the Cansim databank reference number for seasonally adjusted series, indicate the smallest span of months for which the average change in the cyclical factor is greater than that for the irregular factor. For the smoothest series the MCD is one; for the most erratic series, it is twelve. Application of a moving average of the period of the MCD will tend to smooth irregular movements that may obscure the underlying trend-cycle.

The Economic Use Classification (EUC)

The concept of the Economic Use Classification (EUC) consists of combining activities of individual industries at the finest level of aggregation identified by the Standard Industrial Classification (SIC) and bring together, in a general sense, industries whose outputs are directed towards the different types of markets served by industry or, in other words, groups that reflect demand on manufacturing industries by elements of the gross national expenditure.

The present EUC consists of six mutually exclusive groups and a supplementary automotive group. Although the output of an industry may serve a market that spans more than one classification, no attempt is made to subdivide that industry's output into finer detail than that identified by the SIC. Thus the distribution of specific industries to economic uses is determined by the perceived market for the greatest share of the industry's output.

Séries chronologiques

Les séries importantes publiées dans cette livraison sont stockées dans le CANSIM, banque électronique de données sur les séries chronologiques de Statistique Canada. On peut acheter toutes ces séries ou une partie d'entre elles sur bandes magnétiques ou sous forme d'états mécanographiques. Pour tout renseignement complémentaire, s'adresser au:

CANSIM,
Section de consultants aux applications,
Statistique Canada,
Ottawa (Ontario) K1A 0Z8

Désaisonnalisation

On désaisonnalise des séries en calculant le rapport à la moyenne mobile, suivant les méthodes utilisées à Statistique Canada. Il s'agit en l'occurrance du programme normalisé qui sert à appliquer le version X-11 - ARMMI.

Pour quelques séries particulières, il n'y a pas de saisonnalité d'importance, ou il y a trop d'irrégularité. Ces séries n'ont pas été désaisonnalisées. Pour ces cas, les valeurs, sans désaisonnalisation ont été répétées dans les tableaux des séries désaisonnalisées. Voir les notes pour les séries affectées.

Mois de dominance cyclique

Les valeurs de M.D.C. (mois de dominance cyclique) sont situées à la droite du numéro de référence de la Banque de données de "Cansim" pour les séries désaisonnalisées indiquent le plus petit nombre de mois pour lequel la variation moyenne du facteur cyclique est plus grande que celle du facteur d'irrégularité. Le M.D.C. est de un pour les séries les plus régulières et de douze pour les plus fluctuantes. L'application d'une moyenne mobile de la période des M.D.C. aidera à lisser les mouvements irréguliers qui pourraient masquer la tendance cyclique implicite.

Classification des groupes selon l'utilisation économique (CGUE)

Le concept de la classification des groupes selon l'utilisation économique (CGUE) est de combiner les activités des industries à leur plus bas niveau d'aggrégation identifié par la classification type des industries (C.T.I.) et de rassembler les industries d'après le marché desservi ou encore, en groupe d'après la demande sur les industries manufacturières par les éléments de la dépense nationale brute.

La CGUE comprend six groups mutuellement exclusifs et une classification complémentaire des industries connexes de l'automobile. Bien que la production d'une industrie peut servir plus d'un marché, aucun effort est fait pour subdiviser la production de cette industrie dans plus de détail que fournit par la C.T.I. Donc, la distribution d'industries spécifiques a un groupe économique se fait entièrement vers le marché qui est perçu comme étant le plus important pour l'industrie en question.

Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Shipments, Inventories and Orders Section,
Manufacturing and Primary Industries Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 990-9832) or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(949-4020)
Montréal	(283-5725)	Regina	(359-5405)
Ottawa	(990-8116)	Edmonton	(420-3027)
Toronto	(966-6586)	Vancouver	(666-3691)

Toll-free access is provided in all provinces and territories, **for users who reside outside the local dialing area** of any of the regional reference centres.

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Section des livraisons, des stocks et des commandes,
Division des industries manufacturières et primaires,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 990-9832) ou au centre de consultation de Statistique Canada à:

EXPLANATION OF REVISIONS

Series published in this issue have been revised from January 1981 to date to conform with the 1980 Standard Industrial Classification (S.I.C.) adjusted to 1981 Census of Manufactures benchmark data.

Summary Aggregations

The classification coverage of the 1970 and 1980 S.I.C. is largely unchanged, apart from three relatively minor exceptions which have been removed from manufacturing and three which have been added. Those removed include: food specialty stores which were part of bakeries and are now considered part of retail trade; furniture re-upholstery and repair shops which are now considered part of retail trade; offices of denturists which were part of dental laboratories are now part of health and social services. Those added include: bottlers of mineral and spring water which were classified in wholesale trade and are now part of the soft drink industry in manufacturing; photographic developing, printing and enlarging services, which were classified in miscellaneous services and are now part of the platemaking, typesetting and bindery industry in manufacturing and rebuilding of industrial electrical motors, which was classified under miscellaneous services and is now part of the other electrical industrial equipment industries in manufacturing. Because these six industries accounted for no more than a small portion of total manufacturing values, the above changes have had a minimal effect on the summary aggregation in Tables 1 and 2.

Major Industry Group Totals

Table 3, relating to shipments, orders and inventories by Major Industry Group, contains many adjustments as a result of the adoption of the 1980 S.I.C. There are now 22 major industry groups compared to 20 in the 1970 S.I.C. Of these 22 major groups, three were not affected by the new S.I.C. These are: Group 12, Tobacco products industries; Group 35, Non-metallic Mineral products industries; Group 36, Refined Petroleum and Coal products industries.

For a description of changes at the more detailed industry level, please refer to the 1980 S.I.C. publication for the group(s) of interest.

Economic Use Group Classification

As a reference, Table 8 of this publication provides a list of industries by economic use group. This classification still comprises six mutually exclusive groups; however, there are some definitional and title changes. First the definition of the non-durable consumer goods group has changed and now includes semi-durable goods and this becomes the consumer non-durable and semi-durable goods industries. The definitions of the following groups did not change but their titles did: (i) the durable consumer goods industries becomes the Consumer durable goods industries; (ii) the Machinery and equipment industries becomes the

EXPLICATIONS DES RÉVISIONS

Les séries publiées dans ce numéro ont été révisées depuis janvier 1981 à ce jour, pour les aligner sur la Classification type des industries (C.T.I.) de 1980. Elles ont été ajustées en fonction des données repères du recensement des manufactures de 1981.

Agrégats récapitulatifs

La classification du champ d'observation de la C.T.I. de 1980 lorsque comparée à celle de 1970 est demeurée presqu'inchangée à l'exception de trois cas relativement mineurs qui ont été enlevés de la classification manufacturière et de trois autres qui y ont été ajoutés. Ceux qui ont été retirés sont: les magasins d'alimentation spécialisés qui faisaient partie des boulangeries font maintenant partie du commerce de détail, les ateliers de réparation de meubles font maintenant partie du commerce de détail, les cabinets de denturologistes qui faisaient partie des ateliers de mécanicien - dentistes font maintenant partie des services de soins de santé et des services sociaux. D'autre part ceux qui ont été ajoutés sont: les embouteilleurs d'eau minérale qui faisaient partie du commerce de gros font maintenant partie de l'industrie des boissons gazeuses des industries manufacturières, les services de développement et de tirage de films et d'agrandissements photographiques qui faisaient partie des autres industries de services font maintenant partie de l'industrie du clichage, de la composition et de la reliure des industries manufacturières et les ateliers de réparation de moteurs électriques qui faisaient partie des autres industries de services font maintenant partie des autres industries de matériel électrique d'usage industriel des industries manufacturières. Puisque ces six industries ne représentent qu'une petite fraction du secteur de la fabrication, les changements mentionnés plus haut, n'ont eu aucun effet notable sur les agrégats récapitulatifs des tableaux 1 et 2.

Total des groupes d'industries

Le tableau 3, qui a trait aux livraisons, les commandes et les stocks par groupe d'industries, comprend plusieurs ajustements entraînés par l'adoption de la C.T.I. de 1980. Il y a maintenant 22 grands groupes d'industries comparativement à 20 dans la C.A.É. de 1970. De ces 22 grands groupes d'industries, trois ne sont pas affectées par l'adoption de la nouvelle C.T.I.: groupe 12, industries du tabac; groupe 35, industries des produits minéraux non métalliques; groupe 36, industries des produits raffinés du pétrole et du charbon.

Pour une description plus détaillée des changements au niveau des industries, le lecteur devrait se référer à la publication de la C.T.I. de 1980.

Classification des groupes selon l'utilisation économique

À titre de référence, le tableau 8 de cette publication, nous donne une liste des industries classifiées selon l'utilisation économique. Cette classification comprend toujours six groupes mutuellement exclusifs, mais comporte cependant des changements de titres et de définitions. Le groupe des industries des biens de consommation non durables comprend maintenant les biens semi durables et devient donc le groupe des industries des biens de consommation non durables et semi durables. Les définitions des autres groupes sont inchangées mais les titres suivants ont été modifiées: (i) le groupe des industries des machines et du matériel devient le groupe des industries de capital; le groupe des industries des autres

Capital goods industries; (iii) the Other intermediate goods and supplies industries becomes the Intermediate goods (except construction) industries; (iv) the Export-based industries becomes the Export-oriented industries. The remaining group, Construction materials and components, did not change. There is also a supplementary group, the Automotive products industries, which is independent of the above classification.

NOTE: Although the definitions of most economic use groups have not changed, users should compare the 1970 and 1980 allocation of industries, because there are many significant differences, due to the greater detail given in the 1980 S.I.C. than in the 1970 S.I.C. The 1980 allocation of industries is shown in table 8 and the 1970 allocation were published in publications up to February 1980.

produits et fournitures intermédiaires devient le groupe des industries des produits intermédiaires (sauf construction). Les titres des autres groupes sont inchangés. Il y a aussi un groupe complémentaire; les industries connexes de l'automobile, qui est indépendant de cette classification.

NOTA: Même si les définitions de presque tous les groupes économiques n'ont pas changé, les utilisateurs devraient comparer l'allocation des industries de 1970, publié jusqu'en février 1980, et celle de 1980 au tableau 8 de cette publication, parce qu'il y a plusieurs différences. Ces dernières sont attribuables à une classification plus détaillée en 1980 par rapport à celle de 1970.

HIGHLIGHTS

February 1985

- Preliminary estimates show the seasonally adjusted value of shipments in all Canadian manufacturing industries decreased 0.9% to $19,550.7 million in February from the revised estimate of $19,724.1 million in January. Shipments of durable goods were down 1.7% to $9,287.2 million from $9,444.4 million, with the decrease of $286.4 million in transportation equipment industries having been only partly offset by a $43.5 million increase in the wood industries. Decreases of $77.6 million in paper and allied products industries and of $32.1 million in rubber products industries, were the major contributors to the 0.2% decrease in non-durable goods industries as shipments went from $10,279.7 million to $10,263.5 million.

  See Note at end of text.

- Seasonally adjusted inventories owned by manufacturers at the end of February were $33,279.4 million, down 0.6% from the previous month's revised value of $33,480.0 million. Total inventories held decreased 0.6% to $34,519.9 million from $34,720.4 million, with decreases of 1.2% in raw materials and of 0.7% in finished products being principally responsible for this decline. There was, however, a 0.6% increase in goods in process.

- The ratio of seasonally adjusted totals, the ratio of inventory owned to seasonally adjusted shipments remained at 1.70:1. The ratio of finished products inventory to shipments likewise remained unchanged at 0.62:1.

- The value of new orders received in February, seasonally adjusted, decreased 2.0% to $19,231.6 million from the revised January estimate of $19,623.3 million. In the durable goods industries, new orders estimated at $9,006.2 million were 3.2% lower than the January value of $9,301.5 million. Most of the decrease was attributable to losses of $177.2 million in the transportation equipment industries and of $149.7 million in the electrical and electronic products industries. In the non-durable goods industries, new orders were valued at $10,225.4 million, down 0.9% from the revised estimate for January of $10,321.8 million.

- The seasonally adjusted unfilled orders backlog at the end of February was $22,024.2 million, down 1.4% from the revised January estimate of $22,343.3 million. Unfilled orders decreased 1.4% in the durable goods industries to $20,090.0 million from $20,371.0 million at the end of January; in the non-durable goods industries, the estimate was down 1.9% to $1,934.2 million from $1,972.3 million.

- Not adjusted for seasonal variation, manufacturers' shipments in February 1985 were estimated at $18,281.5 million, 0.1% higher than the revised January

POINTS SAILLANTS

Février 1985

- Après désaisonnalisation, la valeur des livraisons des industries manufacturières canadiennes s'est établie à $19,550.7 millions en février, une baisse de 0.9% par rapport à la valeur révisée de janvier de $19,724.1 millions. Les livraisons des biens durables ont chuté de 1.7% à $9,287.2 millions de $9,444.4 millions. Cette diminution est principalement attribuable à une perte de $286.4 millions dans les industries de matériel de transport. Cette dernière a été cependant partiellement contrebalancée par une augmentation de $43.5 millions dans les industries du bois. Les livraisons des biens non durables ont diminué de 0.2% à $10,263.5 millions de $10,279.7 millions. Dans ce groupe, les diminutions sont principalement attribuable, à des baisses de $77.6 millions dans les industries du papier et produits connexes et de $32.1 millions dans les industries de produits en caoutchouc.

  Voir nota à la fin du texte.

- La valeur désaisonnalisée du total des stocks possédés était de $33,279.4 millions, une baisse de 0.6% par rapport à la valeur du mois précédent de $33,480.0 millions. Pour leur part, les stocks détenus ont diminué de 0.6% à $34,519.9 millions de $34,720.4 millions. Des diminutions furent enregistrées au chapître des matières premières (-1.2%), des produits finis (-0.7%) et une augmentation des biens en cours de transformation (0.6%).

- Le rapport désaisonnalisée du total des stocks possédés aux livraisons est resté inchangé à 1.70:1 en février. Le rapport des produits finis aux livraisons est resté à 0.62:1.

- La valeur désaisonnalisée des nouvelles commandes dans l'ensemble des industries manufacturières a été estimée à $19,231.6 millions, ce qui représente une baisse de 2.0% par rapport au mois précédent qui était de $19,623.3 millions. Dans les industries des biens durables, la valeur estimative de $9,006.2 millions était inférieur de 3.2% à la valeur de janvier de $9,301.5 millions. Cette diminution est principalement attribuable à des pertes de $177.2 millions dans les industries du matériel de transport et de $149.7 millions dans les industries de produits électriques et électroniques. Les nouvelles commandes des biens non durables ont atteint $10,225.4 millions, une baisse de 0.9% par rapport à la valeur révisée de $10,321.8 millions pour janvier.

- La valeur estimative des commandes en carnet, après désaisonnalisation, s'est établie à $22,024.2 millions, une baisse de 1.4% par rapport au mois précédent qui était de $22,343.3 millions. Les commandes en carnet des biens durables ont diminué de 1.4% passant de $20,371.0 millions à 20,090.0 millions, alors que celles des biens non durables ont chuté de 1.9% passant de $1,972.3 millions à $1,934.2 millions.

- On a estimé à $18,281.5 millions les livraisons non désaisonnalisées en février 1985, ce qui représente une hausse de 0.1% par rapport à la valeur révisée de janvier de $18,256.9 millions.

value of $18,256.9 million. Cumulative shipments for the first two months of 1985, at an estimated $36,538.4 million, were up 5.2% from the $34,748.0 million estimated for the same period in 1984.

NOTE

In converting from the 1970 to the 1980 Standard Industrial Calssification (S.I.C.), a change in sampling stratum resulted in an invalid imputation for S.I.C. 2712 Newsprint (1980 S.I.C. code) for the shipments series for Newfoundland. Also affected are aggregations containing this industry. These aggregations include S.I.C. 271, Major group 27, the Non-durable goods total, the Export oriented group and Total manufacturing. Corresponding series for new orders, although not broken down by province, are also subject to the same revisions. The correct total for the shipments series should be approximately $5 million less per month for 1982, $8 million less per month in 1983 and $10 million less a month from January 1984 to February 1985. These revisions will be incorporated in the March 1985 issue of this publication.

Pour les deux premiers mois de 1985, les livraisons ont totalisé $36,538.4 millions, soit une hausse de 5.2% par rapport à $34,748.0 millions obtenus au cours de la période correspondante en 1984.

NOTA

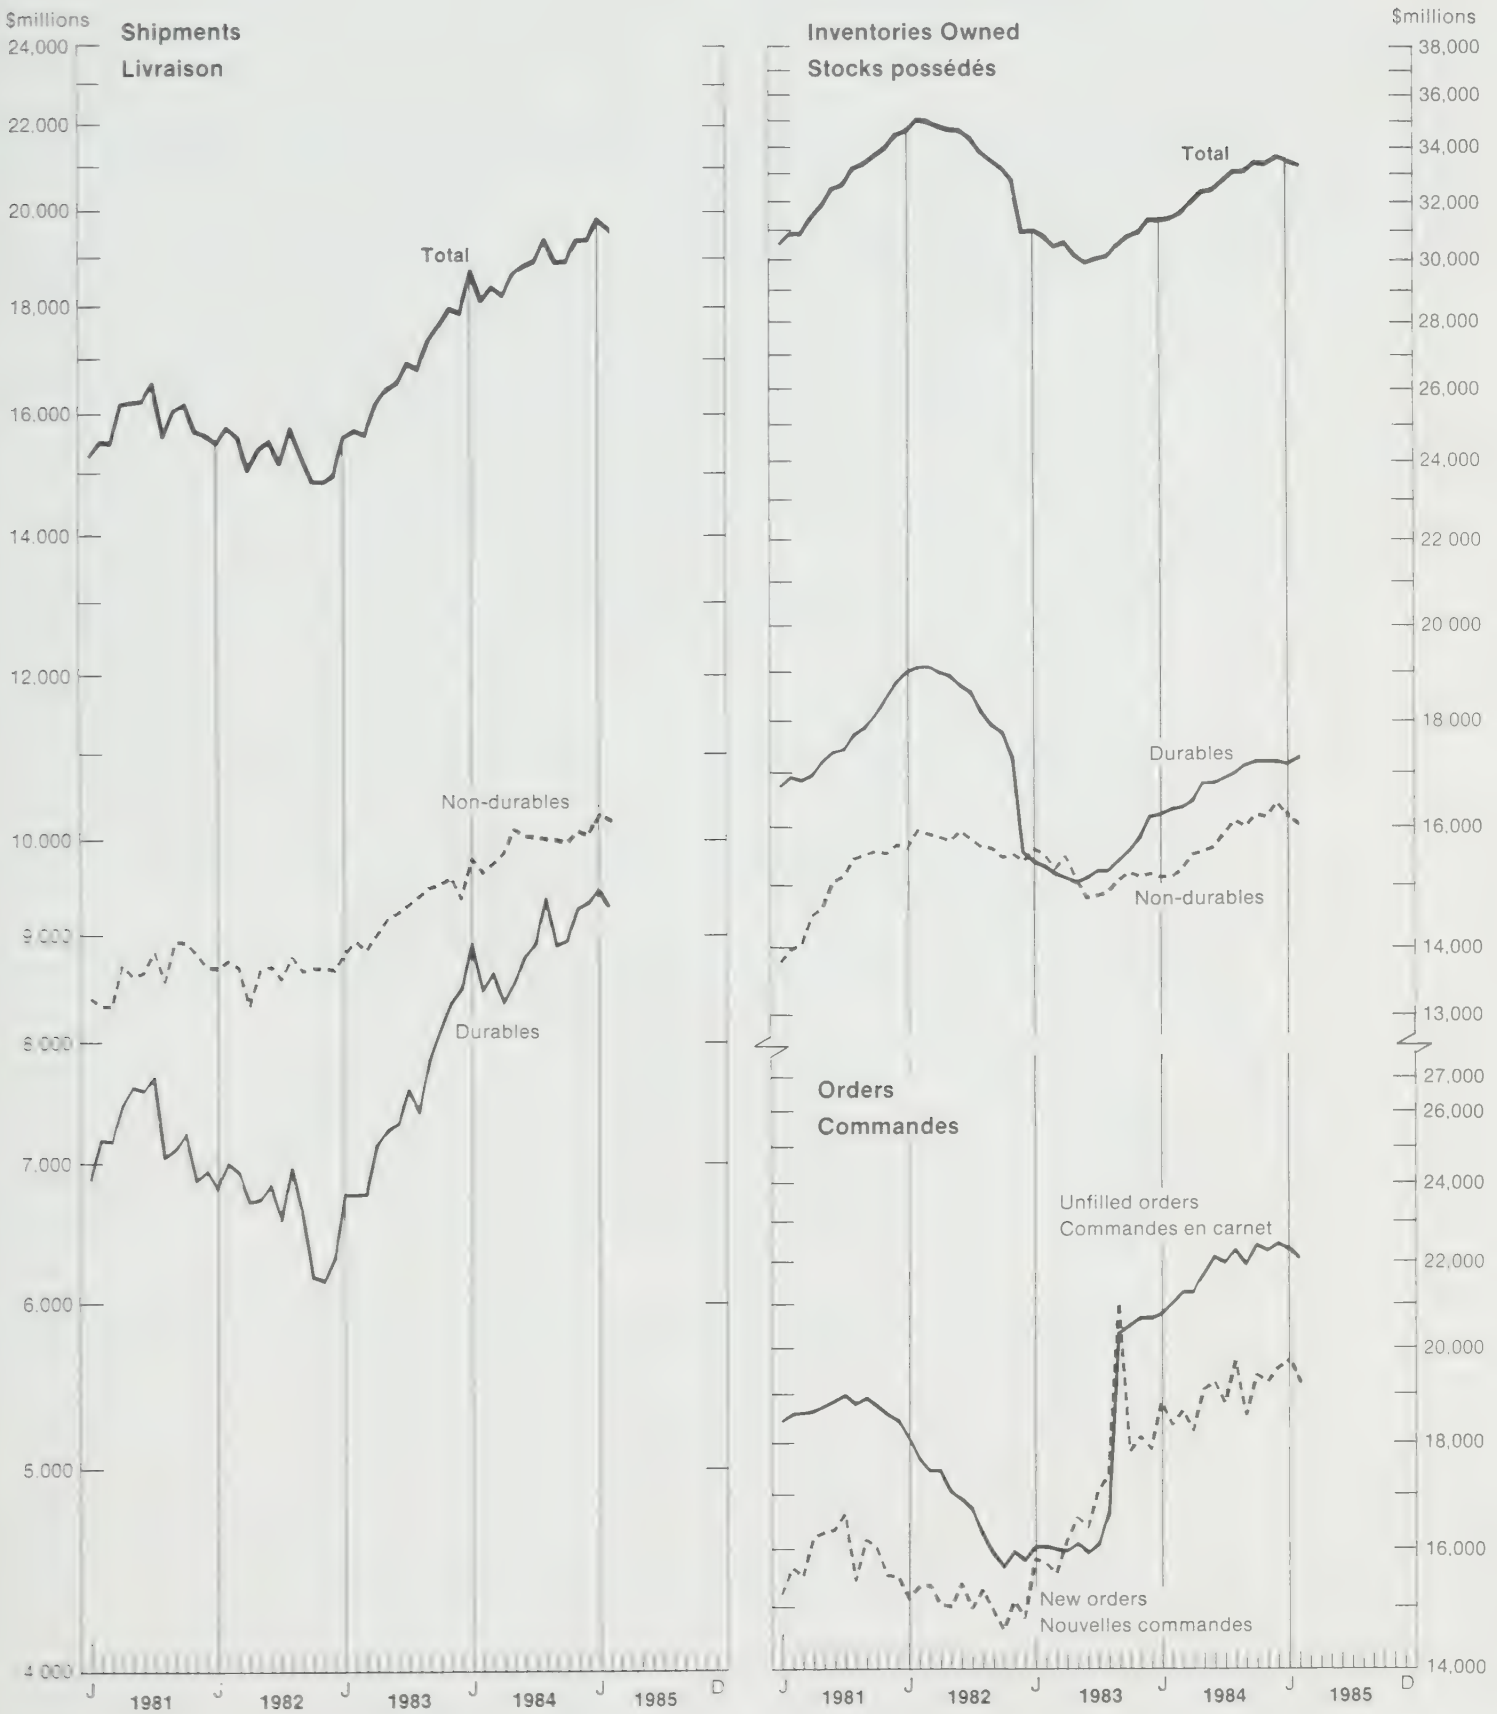

Lors de la conversion de la Classification des activités économiques de 1970 à la Classification type des industries 1980, un changement dans une strate lors du procédé d'échantillonage, a causé une imputation invalide pour la C.T.I. 2712, industrie de papier journal au niveau des livraisons pour Terre-Neuve. Tous les agrégats contenant cette industrie sont affectés. Ces agrégats incluent: la C.T.I. 271, le grand groupe 27, le total du groupe des biens non durables, les industries orientées vers l'exportation ainsi que le total des industries manufacturières. Les séries correspondantes des nouvelles commandes, même si elles ne sont pas compilées au niveau des provinces, sont sujettes aux mêmes révisions. Les livraisons devraient être réduites approximativement de $5 millions par mois pour 1982, de $8 millions de moins par mois pour 1983 et $10 millions de moins par mois de janvier 1984 à février 1985. Ces révisions vont être incluent dans la publication de mars 1985.

TABLE 8. Industries Classified by Economic Use Groups

TABLEAU 8. Industries classées selon les groupes économiques d'utilisation

Standard industrial classification 1980 Classification type des industries 1980	Economic use groups Groupes économiques d'utilisation Consumer non-durable and semi-durable goods Industries Industries des biens de consommation semi durables et non durables	Consumer durable goods industries Industries des biens de consommation durables	Capital goods industries Industries des biens de capital	Construction materials and components industries Industries des matériaux et des éléments de construction	Intermediate goods industries (except construction) Industries des produits intermédiaires (sauf construction)	Export oriented industries Industries orientées vers l'exportation	Supplementary classification-automotive products industries Industries classification complémentaires industries connexes de l'automobile
	industry number - numéro de l'industrie						
10 — FOOD INDUSTRIES - INDUSTRIES DES ALIMENTS							
Meat & meat products industry (except poultry) - Industries de la viande et de ses produits (sauf la volaille)	1011						
Poultry products industry - Industrie des produits de la volaille	1012						
Fish products industry - Industrie de la transformation du poisson						1021	
Canned & preserved fruit & vegetable industry - Conserverie de fruits & de légumes	1031						
Frozen fruit & vegetable industry - Industrie des fruits et légumes congelés	1032						
Fluid milk industry - Industrie du lait de consommation	1041						
Other dairy products industries - Autres industries de produits laitiers	1049						
Cereal grain flour industry - Meuneries					1051		
Prepared flour mixes & prepared cereal foods industry - Industrie des mélanges de farine préparées et des céréales de table préparées	1052						
Feed industry - Industrie des aliments pour animaux					1053		
Vegetable oil mills (except corn oil) - Industrie des huiles végétales (sauf l'huile de maïs)					1061		
Biscuit industry - Industrie des biscuits	1071						
Bread & other bakery products industry - Industrie du pain et autres produits de boulangerie-pâtisserie	1072						
Cane & beet sugar industry - Industries du sucre de canne et de betterave					1081		
Chewing gum industry - Industrie de la gomme à mâcher	1082						
Sugar & chocolate confectionery industry - Industrie des confiseries et du chocolat	1083						
Tea & coffee industry - Industrie du thé et du café	1091						
Dry pasta products industry - Industrie des pâtes sèches	1092						
Potato chip, pretzel & popcorn industry - Industrie des croustilles, des bretzels et du maïs soufflé	1093						
Malt & malt flour industry - Industrie du malt et des farines de malt					1094		
Other food products industries n.e.c. - Autres industries de produits alimentaires n.c.a.	1099						
11 — BEVERAGE INDUSTRIES - INDUSTRIES DES BOISSONS							
Soft drink industry - Industrie des boissons gazeuses	1111						
Distillery products industry - Industrie des produits de distillation						1121	
Brewery products industry - Industrie de la bière	1131						
Wine industry - Industrie du vin	1141						

TABLE 8. Industries Classified by Economic Use Groups – Continued

TABLEAU 8. Industries classées selon les groupes économiques d'utilisation – suite

Standard industrial classification 1980 Classification type des industries 1980	Economic use groups Groupes économiques d'utilisation						Supplementary classification-automotive products industries Industries classification complémentaires industries connexes de l'automobile
	Consumer non-durable and semi-durable goods industries Industries des biens de consommation semi durables et non durables	Consumer durable goods industries Industries des biens de consommation durables	Capital goods industries Industries des biens de capital	Construction materials and components industries Industries des matériaux et des éléments de construction	Intermediate goods industries (except construction) Industries des produits intermédiaires (sauf construction)	Export oriented industries Industries orientées vers l'exportation	
	industry number - numéro de l'industrie						
12 — TOBACCO PRODUCTS INDUSTRIES – INDUSTRIES DU TABAC							
Leaf tobacco industry - Industrie du tabac en feuilles					1211		
Tobacco products industry - Industrie des produits du tabac	1221						
15 — RUBBER PRODUCTS INDUSTRIES – INDUSTRIES DES PRODUITS EN CAOUTCHOUC							
Tire & tube industry - Industrie des pneus et chambres à air					1511		1511
Rubber hose & belting industry - Industrie des boyaux et courroies en caoutchouc					1521		
Other rubber products industries - Autres industries de produits en caoutchouc					1599		
16 — PLASTIC PRODUCTS INDUSTRIES – INDUSTRIES DES PRODUITS EN MATIÈRE PLASTIQUE							
Foamed & expanded plastic products industry - Industrie des produits en matière plastique en mousse et soufflée					1611		
Plastic pipe & pipe fittings industry - Industrie des tuyaux et raccords de tuyauterie en matière plastique				1621			
Plastic film & sheeting industry - Industrie des pellicules et feuilles de matière plastique					1631		
Plastic bag industry - Industrie des sacs en matière plastique					1691		
Other plastic products industries n.e.c. - Autres industries de produits en matière plastique n.c.a.					1699		
17 — LEATHER AND ALLIED PRODUCTS INDUSTRIES – INDUSTRIES DU CUIR ET DES PRODUITS CONNEXES							
Leather tanneries - Tanneries					1711		
Footwear industry - Industrie de la chaussure	1712						
Luggage, purse & handbag industry - Industrie des valises, bourses et sacs à main	1713						
Other leather & allied products industries - Autres industries du cuir et des produits connexes					1719		
18 — PRIMARY TEXTILE INDUSTRIES – INDUSTRIES TEXTILES DE PREMIÈRE TRANSFORMATION							
Man-made fibre & filament yarn industry - Industrie des fibres chimiques et des filés de filaments					1811		
Wool yarn & woven cloth industry - Industrie de la filature et du tissage de la laine					1821		
Other spun yarn & woven cloth industries - Autres industries des filés et tissus tissés					1829		
Broad knitted fabric industry - Industrie des tissus larges, à mailles					1831		

TABLE 8. Industries Classified by Economic Use Groups – Continued

TABLEAU 8. Industries classées selon les groupes économiques d'utilisation – suite

Standard industrial classification 1980 Classification type des industries 1980	Economic use groups Groupes économiques d'utilisation Consumer non-durable and semi-durable goods Industries Industries des biens de consommation semi durables et non durables	Consumer durable goods industries Industries des biens de consommation durables	Capital goods industries Industries des biens de capital	Construction materials and components industries Industries des matériaux et des éléments de construction	Intermediate goods industries (except construction) Industries des produits intermédiaires (sauf construction)	Export oriented industries Industries orientées vers l'exportation	Supplementary classification-automotive products industries Industries classification complémentaires industries connexes de l'automobile
	industry number - numéro de l'industrie						
19 — TEXTILE PRODUCTS INDUSTRIES - INDUSTRIES DES PRODUITS TEXTILES							
Natural fibres processing and felt products industry - Industrie du feutre et du traitement des fibres naturelles					1911		
Carpet, mat and rug industry - Industrie des tapis, carpettes et moquettes		1921					
Canvas & related products industry - Industrie des articles en grosse toile et produits connexes		1931					
Narrow fabric industry - Industrie des tissus étroits					1991		
Contract textile dyeing and finishing industry - Industrie de la teinture et du finissage à façon de produits textiles					1992		
Household products of textile materials industry - Industrie des articles de maison en textiles	1993						
Hygiene products of textiles materials industry - Industrie des articles d'hygiène en textiles	1994						
Tire cord fabric industry - Industrie des tissus pour armature de pneus					1995		1995
Other textile products industries n.e.c. - Autres industries de produits textiles n.c.a.					1999		
24 — CLOTHING INDUSTRIES - INDUSTRIES DE L'HABILLEMENT							
Men's & boy's coat industry - Industrie des manteaux pour hommes et garçonnets	2431						
Men's & boy's suit & jacket industry - Industrie des complets et vestons pour hommes et garçonnets	2432						
Men's & boy's pants industry - Industrie des pantalons pour hommes et garçonnets	2433						
Men's & boy's shirt & underwear industry - Industrie des chemises et sous-vêtements pour hommes et garçonnets	2434						
Men's & boy's clothing contractors - Industrie de la confection à forfait de vêtements pour hommes et garçonnets	2435						
Women's coat & jacket industry - Industrie des manteaux et vestes pour dames	2441						
Women's sportswear industry - Industrie des vêtements de sport pour dames	2442						
Women's dress industry - Industrie des robes pour dames	2443						
Women's blouse & shirt industry - Industrie des blouses & chemises pour dames	2444						
Women's clothing contractors - Industrie de la confection à forfait de vêtements pour dames	2445						
Children's clothing industry - Industrie des vêtements pour enfants	2451						
Sweater industry - Industrie des chandails	2491						
Occupational clothing industry - Industrie des vêtements professionnels	2492						
Glove industry - Industrie des gants	2493						

TABLE 8. Industries Classified by Economic Use Groups – Continued

TABLEAU 8. Industries classées selon les groupes économiques d'utilisation – suite

Standard industrial classification 1980 Classification type des industries 1980	Economic use groups Groupes économiques d'utilisation Consumer non-durable and semi-durable goods Industries Industries des biens de consommation semi durables et non durables	Consumer durable goods industries Industries des biens de consommation durables	Capital goods industries Industries des biens de capital	Construction materials and components industries Industries des matériaux et des éléments de construction	Intermediate goods industries (except construction) Industries des produits intermédiaires (sauf construction)	Export oriented industries Industries orientées vers l'exportation	Supplementary classification-automotive products industries Industries classification complémentaires industries connexes de l'automobile
	industry number - numéro de l'industrie						
24 — CLOTHING INDUSTRIES – Concluded – INDUSTRIES DE L'HABILLEMENT – fin							
Hosiery industry - Industrie des bas et chaussettes	2494						
Fur goods industry - Industries des articles en fourrure	2495						
Foundation garment industry - Industrie des vêtements de base	2496						
Other clothing & apparel industries n.e.c. - Autres industries de l'habillement n.c.a.	2499						
25 — WOOD INDUSTRIES - INDUSTRIES DU BOIS							
Shingle & shake industry - Industrie du bardeau et du bardeau fendu						2511	
Sawmill & planing mill products industry (except shingles & shakes) - Industrie des produits de scieries et d'ateliers de rabotage (sauf les bardeaux et les bardeaux fendus)						2512	
Hardwood veneer & plywood industry - Industrie des placages et contreplaqués en bois feuillu				2521			
Softwood veneer & plywood industry - Industrie des placages et contreplaqués en bois résineux				2522			
Prefabricated wooden buildings industry - Industrie des bâtiments préfabriqués à charpente de bois				2541			
Wooden kitchen cabinet & bathroom vanity industry - Industrie des armoires et placards de cuisine et des coiffeuses de salle de bain en bois				2542			
Wooden door & window industry - Industrie des portes et fenêtres en bois				2543			
Other millwork industries - Autres industries du bois travaillé				2549			
Wooden box & pallet industry - Industrie des boites et pallettes de bois					2561		
Coffin & casket industry - Industrie des cercueils et bières					2581		
Wood preservation industry - Industrie de la préservation du bois				2591			
Particle board industry - Industrie des panneaux de particules				2592			
Wafer board industry - Industrie des panneaux de copeaux				2593			
Other wood industries n.e.c. - Autres industries du bois n.c.a.					2599		
26 — FURNITURE & FIXTURE INDUSTRIES – INDUSTRIES DU MEUBLE ET DES ARTICLES D'AMEUBLEMENT							
Wooden household furniture industry - Industrie des meubles de maison en bois		2611					
Upholstered household furniture industry - Industrie des meubles de maison rembourrés		2612					
Other household furniture industries - Autres industries des meubles de maison		2619					
Metal office furniture industry - Industrie des meubles de bureau en métal			2641				
Other office furniture industries - Autres industries des meubles de bureau			2649				

TABLE 8. Industries Classified by Economic Use Groups – Continued

TABLEAU 8. Industries classées selon les groupes économiques d'utilisation – suite

Standard industrial classification 1980 Classification type des industries 1980	Economic use groups Groupes économiques d'utilisation						Supplementary classification-automotive products industries Industries classification complémentaires industries connexes de l'automobile
	Consumer non-durable and semi-durable goods Industries Industries des biens de consommation semi durables et non durables	Consumer durable goods industries Industries des biens de consommation durables	Capital goods industries Industries des biens de capital	Construction materials and components industries Industries des matériaux et des éléments de construction	Intermediate goods industries (except construction) Industries des produits intermédiaires (sauf construction)	Export oriented industries Industries orientées vers l'exportation	
	industry number - numéro de l'industrie						
26 — FURNITURE & FIXTURE INDUSTRIES – Concluded – INDUSTRIES DU MEUBLE ET DES ARTICLES D'AMEUBLEMENT – fin							
Bed spring & mattress industry - Industrie des sommiers et matelas		2691					
Hotel, restaurant & institutional furniture & fixture industry - Industrie des meubles et articles d'ameublement pour hôtels, restaurants et institutions			2692				
Other furniture & fixture industry n.e.c. - Autres industries de meubles et articles d'ameublement n.c.a.		2699					
27 — PAPER & ALLIED PRODUCTS INDUSTRIES – INDUSTRIES DU PAPIER ET PRODUITS CONNEXES							
Pulp industry - Industrie des pâtes à papier						2711	
Newsprint industry - Industrie du papier journal						2712	
Paperboard industry - Industrie du carton					2713		
Building board industry - Industrie des panneaux de construction				2714			
Other paper industries - Autres industries du papier					2719		
Asphalt roofing industry - Industrie du papier-toiture asphalté				2721			
Folding carton & set-up box industry - Industrie des boîtes pliantes et rigides					2731		
Corrugated box industry - Industrie des boîtes en carton ondulé					2732		
Paper bag industry - Industrie des sacs de papier					2733		
Coated & treated paper industry - Industrie des papiers couchés et traités					2791		
Stationary paper products industry - Industrie des produits en papeterie					2792		
Paper consumer products industry - Industrie des produits de consommation en papier	2793						
Other converted paper products industries n.e.c. - Autres industries des produits en papier transformé n.c.a.					2799		
28 — PRINTING PUBLISHING & ALLIED INDUSTRIES – IMPRIMERIE, EDITION ET INDUSTRIES CONNEXES							
Business forms printing industry - Industrie de l'impression de formulaires commerciaux					2811		
Other commercial printing industries - Autres industries d'impression commerciale					2819		
Platemaking, typesetting & bindery industry - Industrie du clichage, de la composition et de la reliure					2821		
Book publishing industry - Industrie de l'édition du livre	2831						
Other publishing industries - Autres industries d'édition	2839						

TABLE 8. Industries Classified by Economic Use Groups – Continued

Standard industrial classification 1980 Classification type des industries 1980	Economic use groups Groupes économiques d'utilisation						Supplementary classification-automotive products industries Industries classification complémentaires industries connexes de l'automobile
	Consumer non-durable and semi-durable goods Industries Industries des biens de consommation semi durables et non durables	Consumer durable goods industries Industries des biens de consommation durables	Capital goods industries Industries des biens de capital	Construction materials and components industries Industries des matériaux et des éléments de construction	Intermediate goods industries (except construction) Industries des produits intermédiaires (sauf construction)	Export oriented industries Industries orientées vers l'exportation	
	industry number - numéro de l'industrie						
28 – PRINTING PUBLISHING & ALLIED INDUSTRIES – Concluded – IMPRIMERIE, ÉDITION ET INDUSTRIES CONNEXES – suite							
Newspaper, magazine & periodical (combined publishing & printing) industry - Industrie des journaux, revues et périodiques (impression et édition combinées)	2841						
Other combined publishing & printing industries - Autres industries d'impression et d'édition combinées	2849						
29 – PRIMARY METAL INDUSTRIES – INDUSTRIES DE PREMIÈRE TRANSFORMATION DES METAUX							
Ferro-alloys industry - Industrie des ferro-alliages					2911		
Steel foundries - Fonderies d'acier					2912		
Other primary steel industries - Autres industries sidérurgiques					2919		
Steel pipe & tube industry - Industrie des tubes et tuyaux d'acier				2921			
Iron foundries - Fonderies de fer					2941		
Primary production of aluminum industry - Industrie de la production d'aluminum de première fusion						2951	
Other primary smelting & refining of non-ferrous metal industries - Autres industries de la fonte et de l'affinage de métaux non ferreux						2959	
Aluminum rolling, casting & extruding industry - Industrie du laminage, du moulage et de l'extrusion de l'aluminum					2961		
Copper & copper alloy rolling, casting and extruding industry - Industrie du laminage, du moulage et de l'extrusion du cuivre et des alliages					2971		
Other rolled, cast & extruded non-ferrous metal products industries - Autres industries du laminage, du moulage et de l'extrusion de métaux non ferreux					2999		
30 – FABRICATED METAL PRODUCTS INDUSTRIES (except machinery & transportation equipment industries – INDUSTRIES DE LA FABRICATION DES PRODUITS MÉTALLIQUES (sauf les industries de la machinerie et du matériel de transport)							
Power boiler & heat exchanger industry - Industries des chaudières à pression et échangeurs de chaleur				3011			
Metal tanks (heavy gauge) industry - Industrie des réservoirs en métal (épais)				3021			
Plate work industry - Industrie des tôles fortes					3022		
Pre-engineered metal buildings industry (except portable) - Industrie des bâtiments préfabriqués en métal (sauf transportables)				3023			
Other fabricated structural metal products industries - Autres industries de la fabrication d'éléments de charpentes métalliques				3029			

TABLE 8. Industries Classified by Economic Use Groups – Continued

	Consumer non-durable and semi-durable goods Industries Industries des biens de consommation semi durables et non durables	Consumer durable goods industries Industries des biens de consommation durables	Capital goods industries Industries des biens de capital	Construction materials and components industries Industries des matériaux et des éléments de construction	Intermediate goods industries (except construction) Industries des produits intermédiaires (sauf construction)	Export oriented industries Industries orientées vers l'exportation	
	industry number - numéro de l'industrie						
30 — FABRICATED MEATL PRODUCTS INDUSTRIES (except machinery & transportation equipment industries) – Concluded – INDUSTRIES DE LA FABRICATION DES PRODUITS MÉTALLIQUES (sauf les industries de la machinerie et du matériel de transport) – suite							
Metal door & window industry - Industrie des portes et fenêtres en métal				3031			
Prefabricated portable metal buildings industry - Industrie des bâtiments préfabriqués en métal, transportables				3032			
Other ornamental & architectural metal products industries - Autres industries des produits métalliques d'ornement et d'architecture				3039			
Custom coating of metal products industry - Industrie du revêtement sur commande de produits en métal					3041		
Metal closure & container industry - Industrie des récipients et fermetures en métal					3042		
Other stamped & pressed metal products industries - Autres industries de l'emboutissage et du matriçage des produits en métal					3049		
Upholstery & coil spring industry - Industrie des ressorts de rembourrage et des ressorts à boudin					3051		
Wire & wire rope industry - Industrie des fils et des câbles métalliques					3052		
Industrial fastener industry - Industrie des attaches d'usage industriel					3053		
Other wire products industries - Autres industries de produits en fil métallique					3059		
Basic hardware industry - Industrie de la quincaillerie de base				3061			
Metal dies, moulds & patterns industry - Industrie des matrices et moules en métal					3062

FOOTNOTES

Table 1

(1) Although separate series for the Yukon and the Northwest Territories are not published, their values are included in the Canada total.

(2) The value for total shipments contains four industries where "production" is used instead of shipments. Please see concepts and methods, 5th paragraph for more details.

Tables 3-4

(1) Series in Table 3, which contain no significant seasonality, include: raw materials in the petroleum industries; goods in process in the primary metal industries; and inventory held but not owned in the transportation equipment industries and in Table 4: the series for unfilled orders in the export-oriented industries and supplementary classification - automotive products industries; and raw materials in the supplementary classification - automotive products industries. Therefore, these series are repeated without adjustment in the tables of seasonally adjusted estimates and aggregates of which they are components. Small differences in the unadjusted values, when repeated, may result from rounding techniques.

Table 6

(1) For this industry, "production" is used instead of shipments. For explanation, please see concepts and methods, 5th paragraph.

Note: Figures may not add due to rounding.

NOTES

Tableau 1

(1) Même si les séries pour le Yukon et les Territoires du Nord-Ouest ne sont pas publiées elles sont cependant inclues dans le total pour le Canada.

(2) La valeur des livraisons totales contient quatre industries ou la "production" est utilisée au lieu des livraisons. Pour plus de détails, voir le 5ième paragraphe des concepts et méthodes.

Tableaux 3-4

(1) Les séries du tableau 3, qui sont peu sensibles aux variations saisonnières incluent: les matières premières dans l'industrie pétrolière, les biens en cours dans les industries de première transformation les métaux, les stocks détenus mais non possédés dans les industries du matériel de transport et du tableau 4: la série des commandes en carnet dans les industries orientées vers l'exportation et dans la classification complémentaire-industries connexes de l'automobile, ainsi que les matières premières dans la classification complémentaire-industries connexes de l'automobile. Le tableau de la série désaisonnalisée répète donc les valeurs non corrigées. Les différences minimes entre les séries sont attribuables à la technique d'arrondissement utilisée.

Tableau 6

(1) Pour cette industrie, la "production" est utilisée au lieu des livraisons. Pour plus de détails, voir le 5ième paragraphe des concepts et méthodes.

Nota: Les chiffres ne totaliseront peut-être pas en raison de l'arrondissement.

CONCEPTS AND METHODS

Estimation Method

Inventories, shipments and orders values in this publication constitute monthly projections of annual census of manufactures values based on returns from a stratified, systematic sample of manufacturing establishments. The data in the January 1985 publication are the first to be published under the 1980 Standard Industrial Classification (SIC). The data in this publication are benchmarked to the 1981 Census. Values for years prior to 1981 have been previously benchmarked to the corresponding census data and the aggregate of monthly shipments in those years should correspond with published census values. Because the monthly estimates subsequent to 1981 are projections these totals are subject to adjustment when more recent census data become available. Inventory estimates for December published here, differ from year-end census values to the extent that census totals include individual establishment reports for fiscal years that may end on dates other than December 31. Unfilled orders are published for industries where maintenance of a continuing record of the value of an establishment's backlog of orders is a normal part of the accounting procedure.

The population of manufacturing establishments is divided into groups of large, medium and small establishments according to the value of shipments reported for the census year. Monthly values are sought for all large establishments and a sample is chosen separately for each of the other two size groups. Sample unit values are weighted according to the inverse of their probability of selection. This sample is revised annually in accordance with the census base. To facilitate timely response from company accounting departments, combined reports are accepted from companies with more than one establishment. Estimates of current values are accepted from establishments where the inventory and unfilled orders levels are not measured at the end of each accounting period. There are about 11,000 establishments in the reporting panel.

Inventories

Isolation of component values of inventory by level of fabrication in each industry, where possible, is important for economic studies as well as for derivation of production values. To facilitate this, respondents are asked to report their book values of raw materials, work in process, finished products and progress payments separately. The inventory levels are calculated on a Canada-wide basis, not by province.

Both inventory held and inventory owned, are published. The difference between inventory held and inventory owned, is the value of progress payments received by manufacturers for partially completed items such as aircraft, railroad rolling stocks, ships and structures using fabricated steel. As work proceeds on such items, total inventory values increase until the time of delivery. By deducting the balance of progress payments on manufacturers' books from total inventory, the value of manufacturers' investment in inventory is derived.

CONCEPTS ET MÉTHODES

Méthode d'estimation

Les chiffres sur les stocks, les livraisons et les commandes qui figurent dans cette publication sont des projections mensuelles des résultats du recensement annuel des manufactures établies à partir des déclarations d'un échantillon stratifié et systématique d'établissements manufacturiers. Les données que contient la publication de janvier 1985 sont les premières qui soient publiées sous la Classification Type des Industries (C.T.I.) de 1980. Les données que contient la publication sont ajustées en fonction du recensement de 1981. Les chiffres pour les années jusqu'à 1981 inclusivement ont été raccordés aux recensements en cause et la somme des livraisons mensuelles de ces années doit être égale aux résultats de recensements qui ont été publiés. Comme les estimations mensuelles postérieures à 1981 sont des projections, elles pourront être rectifiées lorsqu'on disposera des données de recensement plus récentes. Les estimations sur les stocks publiées dans ce bulletin sont celles de décembre, elles diffèrent donc des chiffres du recensement se rapportant à la fin de l'année dans la mesure où les totaux du recensement comprennent les déclarations de certains établissements pour des années financières qui peuvent prendre fin à d'autres dates qu'au 31 décembre. Les commandes en carnet sont publiées pour les industries où la comptabilité normale prévoit de consigner la valeur des commandes en souffrance des établissements d'une manière suivie.

La population des établissements manufacturiers se divise en trois groupes d'établissements (grands, moyens et petits) suivant la valeur des livraisons déclarées pour l'année de recensement. On demande des déclarations mensuelles à tous les grands établissements et on tire un échantillon séparé pour chacun des deux autres groupes. Les valeurs de l'échantillon sont pondérées en relation inverse de la probabilité qu'elles soient choisies. Cette échantillon est revisé annuellement suivant les résultats du recensement. Dans le but d'aider les services de comptabilité des sociétés à envoyer leurs déclarations à temps. Statistique Canada accepte une déclaration globale pour les sociétés ayant plus d'un établissement et une estimation des chiffres courants pour les établissements dont les stocks et les commandes en carnet ne sont pas recensés à la fin de chaque exercise comptable. On compte environ 11,000 établissements qui produisent des déclarations.

Les stocks

Il est important d'isoler les chiffres des éléments des stocks selon le stage de fabrication dans chaque industrie, lorsque c'est possible, afin de faire des études économiques et des extrapolations des chiffres de production. Â cet effet, on demande aux enquêtés de déclarer séparément la valeur comptable de leurs matières premières, de leurs produits en cours, de leurs produits finis et de leurs acomptes à valoir. Les niveaux des stocks sont calculés pour l'ensemble du Canada et non au niveau provincial.

On publie la valeur des stocks détenus et des stocks possédés. La différence entre les deux donne la valeur des acomptes versés par les fabricants sur des produits dont la fabrication n'est qu'en partie achevée comme les avions, le matériel ferroviaire roulant, les bâteaux et des constructions qui utilisent des semi-produits en acier. Â mesure que la fabrication de ces produits avance, la valeur globale des stocks augmente jusqu'au moment de la livraison. En déduisant le solde des acomptes comptabilisés par les fabricants de l'ensemble des stocks, on obtient la somme investie dans les stocks par les fabricants.

In order to reduce the distortion in the shipments of the four above mentioned industries that would be caused when responding companies finally treat such items of relatively high value as completed sales, a "production" value is used instead of shipments. This production value is derived from adjusting monthly shipments by the monthly change in inventories held (Goods in process held + Finished Products). The raw materials are not included in the calculation since production tries to measure "work done" during the month.

Afin de réduire la distortion qui surviendrait dans les quatres industries en cause au moment où les sociétés observées considèrent en fin de compte des produits d'une valeur relativement grande comme des ventes achevées, une valeur de "production" est utilisée au lieu des livraisons. Pour arriver à cette valeur de production, il s'agit d'ajuster la valeur mensuelle des livraisons par le changement mensuel dans les inventaires détenus (Produits en cours détenus + Produits finis). Les matières premières ne sont pas inclus dans ce calcul car nous essayons de calculer le "travail fait" durant le mois.

Orders

Most establishments that maintain order books strike a value of unfilled orders at the end of each accounting period. The survey seeks this value which is defined as orders received but not shipped or treated as a sale whether or not work has been done on them or they can be filled from existing stocks. No estimate of this value is made for those industries where orders are customarily filled from stocks on hand and orders books are accordingly not generally maintained.

New orders, a series of considerable economic interest, is a residual value derived from shipments and unfilled orders. All shipments within any month result from an order received either during that month or at some earlier time. New orders are calculated as the sum of total shipments within any month plus the change in the total of unfilled orders from the end of the previous month to the end of the month under review.

Les commandes

La plupart des établissements qui tiennent des carnets de commandes établissent la valeur des commandes en carnet à la fin de chaque exercise comptable. Lors de l'enquête, nous demandons cette valeur, qui est considérée comme commandes reçues mais non encore expédiées, que des travaux aient été effectués ou non à leur égard, lorsque la commande peut être honorée à partir des stocks existants. Cette valeur n'est pas estimée dans le cas des entreprises qui exécutent habituellement les commandes des réceptions, à partir de leurs stocks et qui par conséquent ne tiennent pas de carnet de commande.

Les séries sur les nouvelles commandes, qui présentent beaucoup d'intérêt du point de vue économique, donnent la valeur résiduelle établie à partir des livraisons et des commandes en carnet. Toutes les livraisons effectuées au cours d'un mois donné résultent d'une commande reçue soit pendant ce mois, soit avant. Les nouvelles commandes sont calculées à partir du total des livraisons au cours d'un mois donné plus la différence entre le total des commandes en carnet à la fin du mois précédent et le total des commandes en carnet à la fin du mois observé.

Imputation

Values must be imputed for those establishments that have not reported in time for compilation of monthly estimates. This is largely done by mechanical methods which take into account the activity of similar establishments from which reports have been received.

Imputation

Les valeurs doivent être imputées pour les établissements qui n'ont pas rapporté à temps pour la compilation des estimées mensuelles. Cette imputation se fait surtout par des moyens mécaniques qui tiennent compte de l'activité d'établissements semblables qui ont fait parvenir des déclarations.

Revisions

Calculation of revised estimates for the immediately prior month in conjunction with preliminary estimates for the current month permits use of values reported too late for the first compilation. When respondents report values for periods earlier than those of the revised current estimates, the responses are used to correct the trends when the series are updated to new census benchmarks.

Definitions, classifications and groupings are based on those used by the census of manufactures.

The January 1973 issue of this publication contains a more detailed description of the concepts and survey methods for these series.

Révisions

Le calcul des estimations revisées pour le mois précédent et des estimations préliminaires pour le mois observé permet d'utiliser les données déclarées trop tard pour la première compilation. Lorsque les répondants déclarent les chiffres correspondants aux périodes antérieures à celle des estimations révisées actuelles, les réponses servent à corriger les tendances lorsque les séries sont mises à jour d'après les nouvelles données repéré du recensement.

Les définitions, les classifications et les groupes sont basés sur ceux du recensement des manufactures.

Le numéro de janvier 1973 de cette publication contient une description plus détaillée des concepts et des méthodes d'enquête de cette série.

Historical Series

Major series published in this issue are stored in CANSIM, the computerized time series data bank of Statistics Canada. All or any part of these series may be purchased on magnetic tape or as computer print-outs. For further information direct inquiries to:

CANSIM,
Application Consulting Section,
Statistics Canada,
Ottawa, Ontario, K1A 0Z8

Seasonal Adjustment

The seasonal adjustment method applied to the series consists of the ratio-to-moving average method in use at Statistics Canada. The X-11 - ARIMA program is used for seasonal adjustment.

Some series containing no significant seasonality or very high irregularity have not been seasonally adjusted. In these cases, unadjusted values are repeated in the tables of seasonally adjusted data. See footnotes for series affected.

Months for Cyclical Dominance

The MCD or months for cyclical dominance values located at the right of the Cansim databank reference number for seasonally adjusted series, indicate the smallest span of months for which the average change in the cyclical factor is greater than that for the irregular factor. For the smoothest series the MCD is one; for the most erratic series, it is twelve. Application of a moving average of the period of the MCD will tend to smooth irregular movements that may obscure the underlying trend-cycle.

The Economic Use Classification (EUC)

The concept of the Economic Use Classification (EUC) consists of combining activities of individual industries at the finest level of aggregation identified by the Standard Industrial Classification (SIC) and bring together, in a general sense, industries whose outputs are directed towards the different types of markets served by industry or, in other words, groups that reflect demand on manufacturing industries by elements of the gross national expenditure.

The present EUC consists of six mutually exclusive groups and a supplementary automotive group. Although the output of an industry may serve a market that spans more than one classification, no attempt is made to subdivide that industry's output into finer detail than that identified by the SIC. Thus the distribution of specific industries to economic uses is determined by the perceived market for the greatest share of the industry's output.

Séries chronologiques

Les séries importantes publiées dans cette livraison sont stockées dans le CANSIM, banque électronique de données sur les séries chronologiques de Statistique Canada. On peut acheter toutes ces séries ou une partie d'entre elles sur bandes magnétiques ou sous forme d'états mécanographiques. Pour tout renseignement complémentaire, s'adresser au:

CANSIM,
Section de consultants aux applications,
Statistique Canada,
Ottawa (Ontario) K1A 0Z8

Désaisonnalisation

On désaisonnalise des séries en calculant le rapport à la moyenne mobile, suivant les méthodes utilisées à Statistique Canada. Il s'agit en l'occurrance du programme normalisé qui sert à appliquer le version X-11 - ARMMI.

Pour quelques séries particulières, il n'y a pas de saisonnalité d'importance, ou il y a trop d'irrégularité. Ces séries n'ont pas été désaisonnalisées. Pour ces cas, les valeurs, sans désaisonnalisation ont été répétées dans les tableaux des séries désaisonnalisées. Voir les notes pour les séries affectées.

Mois de dominance cyclique

Les valeurs de M.D.C. (mois de dominance cyclique) sont situées à la droite du numéro de référence de la Banque de données de "Cansim" pour les séries désaisonnalisées indiquent le plus petit nombre de mois pour lequel la variation moyenne du facteur cyclique est plus grande que celle du facteur d'irrégularité. Le M.D.C. est de un pour les séries les plus régulières et de douze pour les plus fluctuantes. L'application d'une moyenne mobile de la période des M.D.C. aidera à lisser les mouvements irréguliers qui pourraient masquer la tendance cyclique implicite.

Classification des groupes selon l'utilisation économique (CGUE)

Le concept de la classification des groupes selon l'utilisation économique (CGUE) est de combiner les activités des industries à leur plus bas niveau d'aggrégation identifié par la classification type des industries (C.T.I.) et de rassembler les industries d'après le marché desservi ou encore, en groupe d'après la demande sur les industries manufacturières par les éléments de la dépense nationale brute.

La CGUE comprend six groups mutuellement exclusifs et une classification complémentaire des industries connexes de l'automobile. Bien que la production d'une industrie peut servir plus d'un marché, aucun effort est fait pour subdiviser la production de cette industrie dans plus de détail que fournit par la C.T.I. Donc, la distribution d'industries spécifiques a un groupe économique se fait entièrement vers le marché qui est perçu comme étant le plus important pour l'industrie en question.

Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Section des livraisons, des stocks et des commandes,
Division des industries manufacturières et primaires,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 990-9832) ou au centre de consultation de Statistique Canada à:

EXPLANATION OF REVISIONS

Series published in this issue have been revised from January 1981 to date to conform with the 1980 Standard Industrial Classification (S.I.C.) adjusted to 1981 Census of Manufactures benchmark data.

Summary Aggregations

The classification coverage of the 1970 and 1980 S.I.C. is largely unchanged, apart from three relatively minor exceptions which have been removed from manufacturing and three which have been added. Those removed include: food specialty stores which were part of bakeries and are now considered part of retail trade; furniture re-upholstery and repair shops which are now considered part of retail trade; offices of denturists which were part of dental laboratories are now part of health and social services. Those added include: bottlers of mineral and spring water which were classified in wholesale trade and are now part of the soft drink industry in manufacturing; photographic developing, printing and enlarging services, which were classified in miscellaneous services and are now part of the platemaking, typesetting and bindery industry in manufacturing and rebuilding of industrial electrical motors, which was classified under miscellaneous services and is now part of the other electrical industrial equipment industries in manufacturing. Because these six industries accounted for no more than a small portion of total manufacturing values, the above changes have had a minimal effect on the summary aggregation in Tables 1 and 2.

Major Industry Group Totals

Table 3, relating to shipments, orders and inventories by Major Industry Group, contains many adjustments as a result of the adoption of the 1980 S.I.C. There are now 22 major industry groups compared to 20 in the 1970 S.I.C. Of these 22 major groups, three were not affected by the new S.I.C. These are: Group 12, Tobacco products industries; Group 35, Non-metallic Mineral products industries; Group 36, Refined Petroleum and Coal products industries.

For a description of changes at the more detailed industry level, please refer to the 1980 S.I.C. publication for the group(s) of interest.

Economic Use Group Classification

As a reference, Table 8 of this publication provides a list of industries by economic use group. This classification still comprises six mutually exclusive groups; however, there are some definitional and title changes. First the definition of the non-durable consumer goods group has changed and now includes semi-durable goods and this becomes the consumer non-durable and semi-durable goods industries. The definitions of the following groups did not change but their titles did: (i) the durable consumer goods industries becomes the Consumer durable goods industries; (ii) the Machinery and equipment industries becomes the

EXPLICATIONS DES RÉVISIONS

Les séries publiées dans ce numéro ont été révisées depuis janvier 1981 à ce jour, pour les aligner sur la Classification type des industries (C.T.I.) de 1980. Elles ont été ajustées en fonction des données repères du recensement des manufactures de 1981.

Agrégats récapitulatifs

La classification du champ d'observation de la C.T.I. de 1980 lorsque comparée à celle de 1970 est demeurée presqu'inchangée à l'exception de trois cas relativement mineurs qui ont été enlevés de la classification manufacturière et de trois autres qui y ont été ajoutés. Ceux qui ont été retirés sont: les magasins d'alimentation spécialisés qui faisaient partie des boulangeries font maintenant partie du commerce de détail, les ateliers de réparation de meubles font maintenant partie du commerce de détail, les cabinets de denturologistes qui faisaient partie des ateliers de mécanicien - dentistes font maintenant partie des services de soins de santé et des services sociaux. D'autre part ceux qui ont été ajoutés sont: les embouteilleurs d'eau minérale qui faisaient partie du commerce de gros font maintenant partie de l'industrie des boissons gazeuses des industries manufacturières, les services de développement et de tirage de films et d'agrandissements photographiques qui faisaient partie des autres industries de services font maintenant partie de l'industrie du clichage, de la composition et de la reliure des industries manufacturières et les ateliers de réparation de moteurs électriques qui faisaient partie des autres industries de services font maintenant partie des autres industries de matériel électrique d'usage industriel des industries manufacturières. Puisque ces six industries ne représentent qu'une petite fraction du secteur de la fabrication, les changements mentionnés plus haut, n'ont eu aucun effet notable sur les agrégats récapitulatifs des tableaux 1 et 2.

Total des groupes d'industries

Le tableau 3, qui a trait aux livraisons, les commandes et les stocks par groupe d'industries, comprend plusieurs ajustements entraînés par l'adoption de la C.T.I. de 1980. Il y a maintenant 22 grands groupes d'industries comparativement à 20 dans la C.A.É. de 1970. De ces 22 grands groupes d'industries, trois ne sont pas affectées par l'adoption de la nouvelle C.T.I.: groupe 12, industries du tabac; groupe 35, industries des produits minéraux non métalliques; groupe 36, industries des produits raffinés du pétrole et du charbon.

Pour une description plus détaillée des changements au niveau des industries, le lecteur devrait se référer à la publication de la C.T.I. de 1980.

Classification des groupes selon l'utilisation économique

À titre de référence, le tableau 8 de cette publication, nous donne une liste des industries classifiées selon l'utilisation économique. Cette classification comprend toujours six groupes mutuellement exclusifs, mais comporte cependant des changements de titres et de définitions. Le groupe des industries des biens de consommation non durables comprend maintenant les biens semi durables et devient donc le groupe des industries des biens de consommation non durables et semi durables. Les définitions des autres groupes sont inchangées mais les titres suivants ont été modifiées: (i) le groupe des industries des machines et du matériel devient le groupe des industries de capital; le groupe des industries des autres

Capital goods industries; (iii) the Other intermediate goods and supplies industries becomes the Intermediate goods (except construction) industries; (iv) the Export-based industries becomes the Export-oriented industries. The remaining group, Construction materials and components, did not change. There is also a supplementary group, the Automotive products industries, which is independent of the above classification.

NOTE: Although the definitions of most economic use groups have not changed, users should compare the 1970 and 1980 allocation of industries, because there are many significant differences, due to the greater detail given in the 1980 S.I.C. than in the 1970 S.I.C. The 1980 allocation of industries is shown in table 8 and the 1970 allocation were published in publications up to February 1980.

produits et fournitures intermédiaires devient le groupe des industries des produits intermédiaires (sauf construction). Les titres des autres groupes sont inchangés. Il y a aussi un groupe complémentaire; les industries connexes de l'automobile, qui est indépendant de cette classification.

NOTA: Même si les définitions de presque tous les groupes économiques n'ont pas changé, les utilisateurs devraient comparer l'allocation des industries de 1970, publié jusqu'en février 1980, et celle de 1980 au tableau 8 de cette publication, parce qu'il y a plusieurs différences. Ces dernières sont attribuables à une classification plus détaillée en 1980 par rapport à celle de 1970.

HIGHLIGHTS

March 1985

- Preliminary estimates show that the seasonally adjusted value of shipments in all Canadian manufacturing industries decreased 1.5% to $19,302.5 million in March from the revised estimate of $19,596.9 million in February. Shipments of durable goods were down 1.8% to $9,153.1 million from $9,319.0 million, a decrease of $152.6 million in transportation equipment industries accounted for most of the decline. Decreases of $59.8 million in food industries and of $59.0 million in refined petroleum and coal products industries were the major contributors to a 1.3% decrease in non-durable goods industries as shipments went from $10,277.9 million to $10,149.4 million.

- Seasonally adjusted inventories owned by manufacturers at the end of March were $33,234.6 million, down 0.3% from the previous month's revised value of $33,339.8 million. Total inventories held decreased 0.3% to $34,486.2 million from $34,585.6 million with decreases of 1.1% in goods in process and 0.3% in finished products. There was, however, a 0.2% increase in raw materials.

- The ratio of seasonally adjusted total inventories owned to seasonally adjusted shipments went from 1.70:1 in February to 1.72:1 in March. The ratio of finished products inventory to shipments remained at 0.63:1.

- The value of new orders received in March, seasonally adjusted, increased 0.4% to $19,501.3 million from the revised February estimate of $19,423.0 million. In durable goods industries, new orders, with an estimated value of $9,356.8 million, were 2.0% higher than the February value of $9,172.4 million. Most of the increase can be attributed to gains of $164.6 million in transportation equipment industries and of $60.9 million in electrical and electronic products industries. There was, however, a $51.9 million decline in fabricated metal products industries. In non-durable goods industries, new orders were valued at $10,144.5 million, down 1.0% from the revised estimate for February of $10,250.6 million.

- The seasonally adjusted unfilled orders backlog at the end of March was $22,368.3 million, up 0.9% from the revised February estimate of $22,169.5 million. Unfilled orders increased 1.0% in durable goods industries to $20,428.2 million from $20,224.5 million at the end of February. In non-durable goods industries, the unfilled orders were down 0.2% to $1,940.2 million from $1,945.0 million.

- Not adjusted for seasonal variation, manufacturers' shipments in March 1985 were estimated at $20,155.4 million, 10.0% higher than the revised February value of $18,329.6 million. Cumulative shipments for the first three months of 1985, at an estimated $56,730.6 million, were up 4.5% from the $54,303.4 million estimated for the same period in 1984.

POINTS SAILLANTS

Mars 1985

- Après désaisonnalisation, la valeur des livraisons des industries manufacturières canadiennes s'est établie à $19,302.5 millions en mars 1985, soit une baisse de 1.5% par rapport à la valeur révisée de $19,596.9 millions en février. Une diminution de 1.8% a été enregistrée pour les biens durables qui sont passés de $9,319.0 millions à $9,153.1 millions. Cette baisse est principalement attribuable à une perte de $152.6 millions dans les industries du matériel de transport. Les livraisons des biens non durables ont diminué de 1.3% passant de $10,277.9 millions à $10,149.4 millions. Cette diminution est principalement attribuable à des pertes de $59.8 millions dans les industries des aliments et de $59.0 millions dans les industries des produits raffinés du pétrole et du charbon.

- La valeur désaisonnalisée du total des stocks possédés était de $33,234.6 millions en mars, une baisse de 0.3% par rapport à la valeur du mois précédent de $33,339.8 millions. Pour leur part, les stocks détenus ont diminué de 0.3% à $34,486.2 millions de $34,585.6 millions. Des diminutions ont été enregistrées au chapitre des biens en cours de transformation (-1.1%) et des produits finis (-0.3%) mais une augmentation de 0.2% a été enregistrée pour les matières premières.

- Le rapport désaisonnalisé du total des stocks possédés aux livraisons est passé de 1.70:1 en février à 1.72:1 en mars. Le rapport des produits finis aux livraisons est resté inchangé à 0.63:1.

- La valeur désaisonnalisée des nouvelles commandes dans l'ensemble des industries manufacturières a été estimée à $19,501.3 millions, ce qui représente une hausse de 0.4% par rapport au mois précédent qui était de $19,423.0 millions. Dans les industries des biens durables, la valeur estimative de $9,356.8 millions en mars était supérieur de 2.0% à la valeur de février de $9,172.4 million. Cette augmentation est principalement attribuable à des gains de $164.6 millions dans les industries du matériel de transport et de $60.9 millions dans les industries des produits électriques et électroniques. Dans les industries de la fabrication des produits métalliques, par contre, une perte de $51.9 millions fut enregistrée. Les nouvelles commandes des biens non durables ont atteint $10,144.5 millions, ce qui représente une baisse de 1.0% par rapport à la valeur revisée de février ($10,250.6 millions).

- La valeur estimative des commandes en carnet, après désaisonnalisation, s'est établie à $22,368.3 millions en mars, une hausse de 0.9% par rapport à la valeur de février de $22,169.5 millions. Les commandes en carnet des biens durables ont augmenté de 1.0% passant de $20,224.5 millions à $20,428.2 millions alors que celles des biens non durables ont diminué de 0.2% à $1,940.2 millions de $1,945.0 millions.

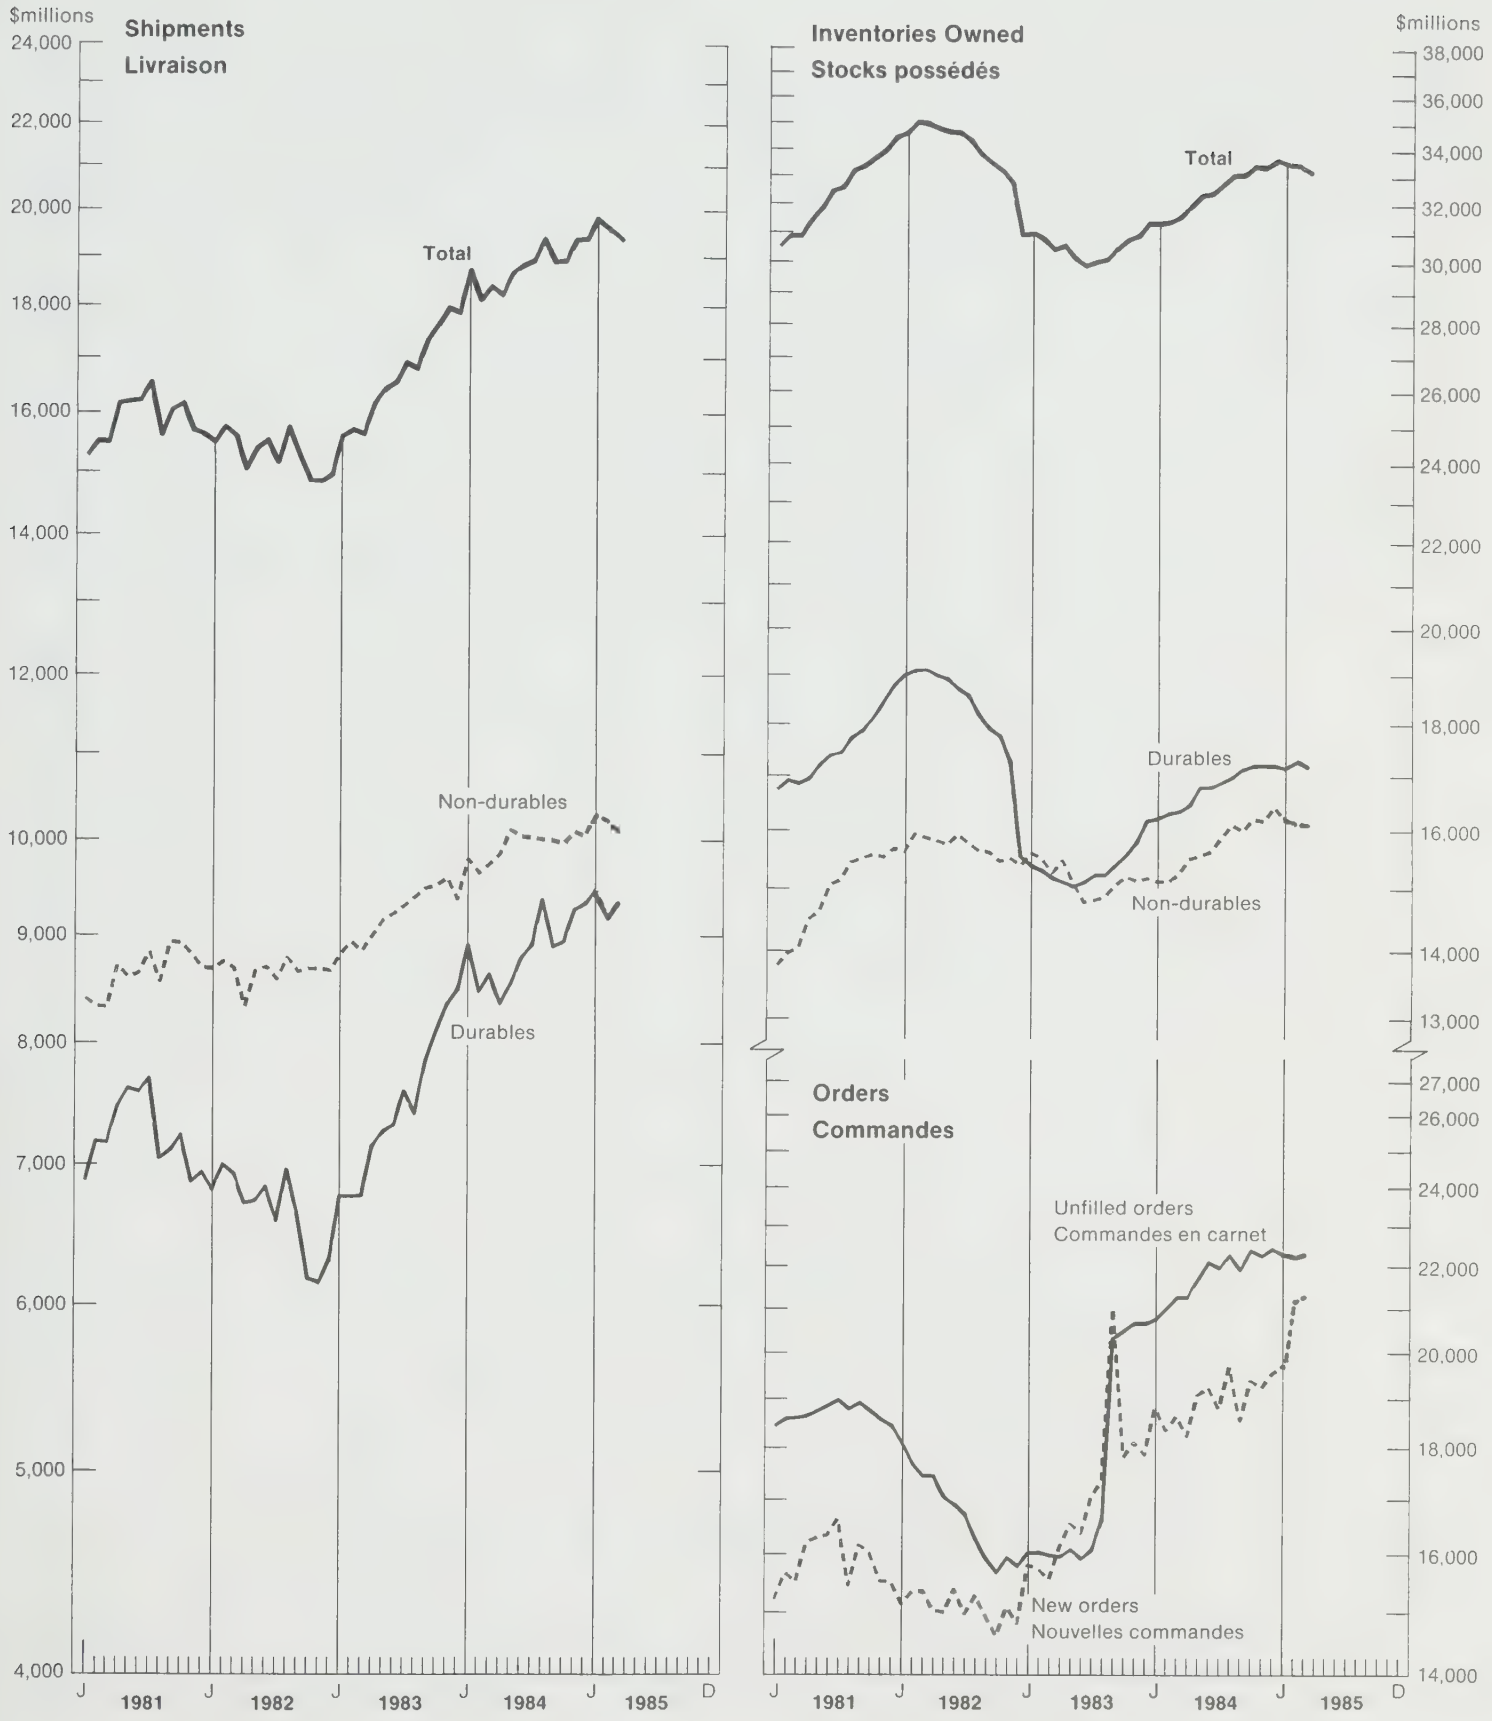

- On a estimé à $20,155.4 millions les livraisons non désaisonnalisées en mars 1985, ce qui représente une hausse de 10.0% par rapport à la valeur révisée de février de $18,329.6 millions. Pour les trois premiers mois de 1985, les livraisons estimatives ont totalisé $56,730.6 millions, soit une hausse de 4.5% par rapport à $54,303.4 millions obtenus au cours de la période correspondante de 1984.

TABLE 8. Industries Classified by Economic Use Groups

TABLEAU 8. Industries classées selon les groupes économiques d'utilisation

Standard industrial classification 1980 Classification type des industries 1980	Economic use groups Groupes économiques d'utilisation						Supplementary classification-automotive products industries Industries classification complémentaires industries connexes de l'automobile
	Consumer non-durable and semi-durable goods Industries Industries des biens de consommation semi durables et non durables	Consumer durable goods industries Industries des biens de consommation durables	Capital goods industries Industries des biens de capital	Construction materials and components industries Industries des matériaux et des éléments de construction	Intermediate goods industries (except construction) Industries des produits intermédiaires (sauf construction)	Export oriented industries Industries orientées vers l'exportation	
	industry number - numéro de l'industrie						
10 — FOOD INDUSTRIES - INDUSTRIES DES ALIMENTS							
Meat & meat products industry (except poultry) - Industries de la viande et de ses produits (sauf la volaille)	1011						
Poultry products industry - Industrie des produits de la volaille	1012						
Fish products industry - Industrie de la transformation du poisson						1021	
Canned & preserved fruit & vegetable industry - Conserverie de fruits & de légumes	1031						
Frozen fruit & vegetable industry - Industrie des fruits et légumes congelés	1032						
Fluid milk industry - Industrie du lait de consommation	1041						
Other dairy products industries - Autres industries de produits laitiers	1049						
Cereal grain flour industry - Meuneries					1051		
Prepared flour mixes & prepared cereal foods industry - Industrie des mélanges de farine préparées et des céréales de table préparées	1052						
Feed industry - Industrie des aliments pour animaux					1053		
Vegetable oil mills (except corn oil) - Industrie des huiles végétales (sauf l'huile de maïs)					1061		
Biscuit industry - Industrie des biscuits	1071						
Bread & other bakery products industry - Industrie du pain et autres produits de boulangerie-pâtisserie	1072						
Cane & beet sugar industry - Industries du sucre de canne et de betterave					1081		
Chewing gum industry - Industrie de la gomme à mâcher	1082						
Sugar & chocolate confectionery industry - Industrie des confiseries et du chocolat	1083						
Tea & coffee industry - Industrie du thé et du café	1091						
Dry pasta products industry - Industrie des pâtes sèches	1092						
Potato chip, pretzel & popcorn industry - Industrie des croustilles, des bretzels et du maïs soufflé	1093						
Malt & malt flour industry - Industrie du malt et des farines de malt					1094		
Other food products industries n.e.c. - Autres industries de produits alimentaires n.c.a.	1099						
11 — BEVERAGE INDUSTRIES - INDUSTRIES DES BOISSONS							
Soft drink industry - Industrie des boissons gazeuses	1111						
Distillery products industry - Industrie des produits de distillation						1121	
Brewery products industry - Industrie de la bière	1131						
Wine industry - Industrie du vin	1141						

TABLE 8. Industries Classified by Economic Use Groups – Continued

TABLEAU 8. Industries classées selon les groupes économiques d'utilisation – suite

Standard industrial classification 1980 Classification type des industries 1980	Economic use groups Groupes économiques d'utilisation Consumer non-durable and semi-durable goods industries Industries des biens de consommation semi durables et non durables	Consumer durable goods industries Industries des biens de consommation durables	Capital goods industries Industries des biens de capital	Construction materials and components industries Industries des matériaux et des éléments de construction	Intermediate goods industries (except construction) Industries des produits intermédiaires (sauf construction)	Export oriented industries Industries orientées vers l'exportation	Supplementary classification-automotive products industries Industries classification complémentaires industries connexes de l'automobile
	industry number - numéro de l'industrie						
12 — TOBACCO PRODUCTS INDUSTRIES – INDUSTRIES DU TABAC							
Leaf tobacco industry - Industrie du tabac en feuilles					1211		
Tobacco products industry - Industrie des produits du tabac	1221						
15 — RUBBER PRODUCTS INDUSTRIES – INDUSTRIES DES PRODUITS EN CAOUTCHOUC							
Tire & tube industry - Industrie des pneus et chambres à air					1511		1511
Rubber hose & belting industry - Industrie des boyaux et courroies en caoutchouc					1521		
Other rubber products industries - Autres industries de produits en caoutchouc					1599		
16 — PLASTIC PRODUCTS INDUSTRIES – INDUSTRIES DES PRODUITS EN MATIÈRE PLASTIQUE							
Foamed & expanded plastic products industry - Industrie des produits en matière plastique en mousse et soufflée					1611		
Plastic pipe & pipe fittings industry - Industrie des tuyaux et raccords de tuyauterie en matière plastique				1621			
Plastic film & sheeting industry - Industrie des pellicules et feuilles de matière plastique					1631		
Plastic bag industry - Industrie des sacs en matière plastique					1691		
Other plastic products industries n.e.c. - Autres industries de produits en matière plastique n.c.a.					1699		
17 — LEATHER AND ALLIED PRODUCTS INDUSTRIES – INDUSTRIES DU CUIR ET DES PRODUITS CONNEXES							
Leather tanneries - Tanneries					1711		
Footwear industry - Industrie de la chaussure	1712						
Luggage, purse & handbag industry - Industrie des valises, bourses et sacs à main	1713						
Other leather & allied products industries - Autres industries du cuir et des produits connexes					1719		
18 — PRIMARY TEXTILE INDUSTRIES – INDUSTRIES TEXTILES DE PREMIÈRE TRANSFORMATION							
Man-made fibre & filament yarn industry - Industrie des fibres chimiques et des filés de filaments					1811		
Wool yarn & woven cloth industry - Industrie de la filature et du tissage de la laine					1821		
Other spun yarn & woven cloth industries - Autres industries des filés et tissus tissés					1829		
Broad knitted fabric industry - Industrie des tissus larges, à mailles					1831		

TABLE 8. Industries Classified by Economic Use Groups – Continued

TABLEAU 8. Industries classées selon les groupes économiques d'utilisation – suite

Standard industrial classification 1980 Classification type des industries 1980	Economic use groups Groupes économiques d'utilisation Consumer non-durable and semi-durable goods Industries Industries des biens de consommation semi durables et non durables	Consumer durable goods industries Industries des biens de consommation durables	Capital goods industries Industries des biens de capital	Construction materials and components industries Industries des matériaux et des éléments de construction	Intermediate goods industries (except construction) Industries des produits intermédiaires (sauf construction)	Export oriented industries Industries orientées vers l'exportation	Supplementary classification-automotive products industries Industries classification complémentaires industries connexes de l'automobile
	industry number - numéro de l'industrie						
19 — TEXTILE PRODUCTS INDUSTRIES - INDUSTRIES DES PRODUITS TEXTILES							
Natural fibres processing and felt products industry - Industrie du feutre et du traitement des fibres naturelles					1911		
Carpet, mat and rug industry - Industrie des tapis, carpettes et moquettes		1921					
Canvas & related products industry - Industrie des articles en grosse toile et produits connexes		1931					
Narrow fabric industry - Industrie des tissus étroits					1991		
Contract textile dyeing and finishing industry - Industrie de la teinture et du finissage à façon de produits textiles					1992		
Household products of textile materials industry - Industrie des articles de maison en textiles	1993						
Hygiene products of textiles materials industry - Industrie des articles d'hygiène en textiles	1994						
Tire cord fabric industry - Industrie des tissus pour armature de pneus					1995		1995
Other textile products industries n.e.c. - Autres industries de produits textiles n.c.a.					1999		
24 — CLOTHING INDUSTRIES - INDUSTRIES DE L'HABILLEMENT							
Men's & boy's coat industry - Industrie des manteaux pour hommes et garçonnets	2431						
Men's & boy's suit & jacket industry - Industrie des complets et vestons pour hommes et garçonnets	2432						
Men's & boy's pants industry - Industrie des pantalons pour hommes et garçonnets	2433						
Men's & boy's shirt & underwear industry - Industrie des chemises et sous-vêtements pour hommes et garçonnets	2434						
Men's & boy's clothing contractors - Industrie de la confection à forfait de vêtements pour hommes et garçonnets	2435						
Women's coat & jacket industry - Industrie des manteaux et vestes pour dames	2441						
Women's sportswear industry - Industrie des vêtements de sport pour dames	2442						
Women's dress industry - Industrie des robes pour dames	2443						
Women's blouse & shirt industry - Industrie des blouses & chemises pour dames	2444						
Women's clothing contractors - Industrie de la confection à forfait de vêtements pour dames	2445						
Children's clothing industry - Industrie des vêtements pour enfants	2451						
Sweater industry - Industrie des chandails	2491						
Occupational clothing industry - Industrie des vêtements professionnels	2492						
Glove industry - Industrie des gants	2493						

TABLE 8. Industries Classified by Economic Use Groups – Continued

TABLEAU 8. Industries classées selon les groupes économiques d'utilisation – suite

Standard industrial classification 1980 Classification type des industries 1980	Economic use groups Groupes économiques d'utilisation Consumer non-durable and semi-durable goods Industries Industries des biens de consommation semi durables et non durables	Consumer durable goods industries Industries des biens de consommation durables	Capital goods industries Industries des biens de capital	Construction materials and components industries Industries des matériaux et des éléments de construction	Intermediate goods industries (except construction) Industries des produits intermédiaires (sauf construction)	Export oriented industries Industries orientées vers l'exportation	Supplementary classification-automotive products industries Industries classification complémentaires industries connexes de l'automobile
	industry number - numéro de l'industrie						
24 — CLOTHING INDUSTRIES – Concluded – INDUSTRIES DE L'HABILLEMENT – fin							
Hosiery industry - Industrie des bas et chaussettes	2494						
Fur goods industry - Industries des articles en fourrure	2495						
Foundation garment industry - Industrie des vêtements de base	2496						
Other clothing & apparel industries n.e.c. - Autres industries de l'habillement n.c.a.	2499						
25 — WOOD INDUSTRIES – INDUSTRIES DU BOIS							
Shingle & shake industry - Industrie du bardeau et du bardeau fendu						2511	
Sawmill & planing mill products industry (except shingles & shakes) - Industrie des produits de scieries et d'ateliers de rabotage (sauf les bardeaux et les bardeaux fendus)						2512	
Hardwood veneer & plywood industry - Industrie des placages et contreplaqués en bois feuillu				2521			
Softwood veneer & plywood industry - Industrie des placages et contreplaqués en bois résineux				2522			
Prefabricated wooden buildings industry - Industrie des bâtiments préfabriqués à charpente de bois				2541			
Wooden kitchen cabinet & bathroom vanity industry - Industrie des armoires et placards de cuisine et des coiffeuses de salle de bain en bois				2542			
Wooden door & window industry - Industrie des portes et fenêtres en bois				2543			
Other millwork industries - Autres industries du bois travaillé				2549			
Wooden box & pallet industry - Industrie des boites et pallettes de bois					2561		
Coffin & casket industry - Industrie des cercueils et bières					2581		
Wood preservation industry - Industrie de la préservation du bois				2591			
Particle board industry - Industrie des panneaux de particules				2592			
Wafer board industry - Industrie des panneaux de copeaux				2593			
Other wood industries n.e.c. - Autres industries du bois n.c.a.					2599		
26 — FURNITURE & FIXTURE INDUSTRIES – INDUSTRIES DU MEUBLE ET DES ARTICLES D'AMEUBLEMENT							
Wooden household furniture industry - Industrie des meubles de maison en bois		2611					
Upholstered household furniture industry - Industrie des meubles de maison rembourrés		2612					
Other household furniture industries - Autres industries des meubles de maison		2619					
Metal office furniture industry - Industrie des meubles de bureau en métal			2641				
Other office furniture industries - Autres industries des meubles de bureau			2649				

TABLE 8. Industries Classified by Economic Use Groups – Continued

TABLEAU 8. Industries classées selon les groupes économiques d'utilisation – suite

Standard industrial classification 1980 Classification type des industries 1980	Economic use groups Groupes économiques d'utilisation						Supplementary classification-automotive products industries Industries classification complémentaires industries connexes de l'automobile
	Consumer non-durable and semi-durable goods Industries Industries des biens de consommation semi durables et non durables	Consumer durable goods industries Industries des biens de consommation durables	Capital goods industries Industries des biens de capital	Construction materials and components industries Industries des matériaux et des éléments de construction	Intermediate goods industries (except construction) Industries des produits intermédiaires (sauf construction)	Export oriented industries Industries orientées vers l'exportation	
	industry number - numéro de l'industrie						
26 — FURNITURE & FIXTURE INDUSTRIES – Concluded – INDUSTRIES DU MEUBLE ET DES ARTICLES D'AMEUBLEMENT – fin							
Bed spring & mattress industry - Industrie des sommiers et matelas		2691					
Hotel, restaurant & institutional furniture & fixture industry - Industrie des meubles et articles d'ameublement pour hôtels, restaurants et institutions			2692				
Other furniture & fixture industry n.e.c. - Autres industries de meubles et articles d'ameublement n.c.a.		2699					
27 — PAPER & ALLIED PRODUCTS INDUSTRIES – INDUSTRIES DU PAPIER ET PRODUITS CONNEXES							
Pulp industry - Industrie des pâtes à papier						2711	
Newsprint industry - Industrie du papier journal						2712	
Paperboard industry - Industrie du carton					2713		
Building board industry - Industrie des panneaux de construction				2714			
Other paper industries - Autres industries du papier					2719		
Asphalt roofing industry - Industrie du papier-toiture asphalté				2721			
Folding carton & set-up box industry - Industrie des boîtes pliantes et rigides					2731		
Corrugated box industry - Industrie des boîtes en carton ondulé					2732		
Paper bag industry - Industrie des sacs de papier					2733		
Coated & treated paper industry - Industrie des papiers couchés et traités					2791		
Stationary paper products industry - Industrie des produits en papeterie					2792		
Paper consumer products industry - Industrie des produits de consommation en papier	2793						
Other converted paper products industries n.e.c. - Autres industries des produits en papier transformé n.c.a.					2799		
28 — PRINTING PUBLISHING & ALLIED INDUSTRIES – IMPRIMERIE, ÉDITION ET INDUSTRIES CONNEXES							
Business forms printing industry - Industrie de l'impression de formulaires commerciaux					2811		
Other commercial printing industries - Autres industries d'impression commerciale					2819		
Platemaking, typesetting & bindery industry - Industrie du clichage, de la composition et de la reliure					2821		
Book publishing industry - Industrie de l'édition du livre	2831						
Other publishing industries - Autres industries d'édition	2839						

TABLE 8. Industries Classified by Economic Use Groups – Continued

TABLEAU 8. Industries classées selon les groupes économiques d'utilisation – suite

Standard industrial classification 1980 Classification type des industries 1980	Economic use groups Groupes économiques d'utilisation						Supplementary classification-automotive products industries Industries classification complémentaires industries connexes de l'automobile
	Consumer non-durable and semi-durable goods Industries Industries des biens de consommation semi durables et non durables	Consumer durable goods industries Industries des biens de consommation durables	Capital goods industries Industries des biens de capital	Construction materials and components industries Industries des matériaux et des éléments de construction	Intermediate goods industries (except construction) Industries des produits intermédiaires (sauf construction)	Export oriented industries Industries orientées vers l'exportation	
	industry number - numéro de l'industrie						
28 – PRINTING PUBLISHING & ALLIED INDUSTRIES – Concluded – IMPRIMERIE, ÉDITION ET INDUSTRIES CONNEXES – suite							
Newspaper, magazine & periodical (combined publishing & printing) industry - Industrie des journaux, revues et pèriodiques (impression et édition combinées)	2841						
Other combined publishing & printing industries - Autres industries d'impression et d'édition combinées	2849						
29 – PRIMARY METAL INDUSTRIES – INDUSTRIES DE PREMIÈRE TRANSFORMATION DES MÉTAUX							
Ferro-alloys industry - Industrie des ferro-alliages					2911		
Steel foundries - Fonderies d'acier					2912		
Other primary steel industries - Autres industries sidérurgiques					2919		
Steel pipe & tube industry - Industrie des tubes et tuyaux d'acier				2921			
Iron foundries - Fonderies de fer					2941		
Primary production of aluminum industry - Industrie de la production d'aluminum de première fusion						2951	
Other primary smelting & refining of non-ferrous metal industries - Autres industries de la fonte et de l'affinage de métaux non ferreux						2959	
Aluminum rolling, casting & extruding industry - Industrie du laminage, du moulage et de l'extrusion de l'aluminum					2961		
Copper & copper alloy rolling, casting and extruding industry - Industrie du laminage, du moulage et de l'extrusion du cuivre et des alliages					2971		
Other rolled, cast & extruded non-ferrous metal products industries - Autres industries du laminage, du moulage et de l'extrusion de métaux non ferreux					2999		
30 – FABRICATED METAL PRODUCTS INDUSTRIES (except machinery & transportation equipment industries – INDUSTRIES DE LA FABRICATION DES PRODUITS METALLIQUES (sauf les industries de la machinerie et du matériel de transport)							
Power boiler & heat exchanger industry - Industries des chaudières à pression et échangeurs de chaleur				3011			
Metal tanks (heavy gauge) industry - Industrie des réservoirs en métal (épais)				3021			
Plate work industry - Industrie des tôles fortes					3022		
Pre-engineered metal buildings industry (except portable) - Industrie des bâtiments préfabriqués en métal (sauf transportables)				3023			
Other fabricated structural metal products industries - Autres industries de la fabrication d'éléments de charpentes métalliques				3029			

TABLE 8. Industries Classified by Economic Use Groups – Continued

TABLEAU 8. Industries classées selon les groupes économiques d'utilisation – suite

Standard industrial classification 1980 Classification type des industries 1980	Economic use groups Groupes économiques d'utilisation						Supplementary classification-automotive products industries Industries classification complémentaires industries connexes de l'automobile
	Consumer non-durable and semi-durable goods Industries Industries des biens de consommation semi durables et non durables	Consumer durable goods industries Industries des biens de consommation durables	Capital goods industries Industries des biens de capital	Construction materials and components industries Industries des matériaux et des éléments de construction	Intermediate goods industries (except construction) Industries des produits intermédiaires (sauf construction)	Export oriented industries Industries orientées vers l'exportation	
	industry number - numéro de l'industrie						
30 — FABRICATED MEATL PRODUCTS INDUSTRIES (except machinery & transportation equipment industries) – Concluded – INDUSTRIES DE LA FABRICATION DES PRODUITS MÉTALLIQUES (sauf les industries de la machinerie et du matériel de transport) – suite							
Metal door & window industry - Industrie des portes et fenêtres en métal				3031			
Prefabricated portable metal buildings industry - Industrie des bâtiments préfabriqués en métal, transportables				3032			
Other ornamental & architectural metal products industries - Autres industries des produits métalliques d'ornement et d'architecture				3039			
Custom coating of metal products industry - Industrie du revêtement sur commande de produits en métal					3041		
Metal closure & container industry - Industrie des récipients et fermetures en métal					3042		
Other stamped & pressed metal products industries - Autres industries de l'emboutissage et du matriçage des produits en métal					3049		
Upholstery & coil spring industry - Industrie des ressorts de rembourrage et des ressorts à boudin					3051		
Wire & wire rope industry - Industrie des fils et des câbles métalliques					3052		
Industrial fastener industry - Industrie des attaches d'usage industriel					3053		
Other wire products industries - Autres industries de produits en fil métallique					3059		
Basic hardware industry - Industrie de la quincaillerie de base				3061			
Metal dies, moulds & patterns industry - Industrie des matrices et moules en métal					3062		
Hand tool & implement industry - Industrie des outils et instruments			3063				
Other hardware & cutlery industries - Autres industries d'articles de quincaillerie, d'outillage et de coutellerie					3069		
Heating equipment industry - Industrie du matériel de chauffage				3071			
Machine shop industry - Ateliers d'usinage					3081		
Metal plumbing fixtures & fittings industry - Industrie des garnitures et raccords de plomberie en métal				3091			
Metal valve industry - Industrie des soupapes en métal					3092		
Other metal fabricating industries n.e.c. - Autres industries de produits en métal n.c.a.				3099			
31 — MACHINERY INDUSTRIES (except electrical machinery) – INDUSTRIE DE LA MACHINERIE (sauf électrique)							
Agricultural implement industry - Industrie des instruments aratoires						3111	

TABLE 8. Industries Classified by Economic Use Groups – Continued

TABLEAU 8. Industries classées selon les groupes économiques d'utilisation – suite

Standard industrial classification 1980 Classification type des industries 1980	Economic use groups Groupes économiques d'utilisation Consumer non-durable and semi-durable goods Industries Industries des biens de consommation semi durables et non durables	Consumer durable goods industries Industries des biens de consommation durables	Capital goods industries Industries des biens de capital	Construction materials and components industries Industries des matériaux et des éléments de construction	Intermediate goods industries (except construction) Industries des produits intermédiaires (sauf construction)	Export oriented industries Industries orientées vers l'exportation	Supplementary classification-automotive products industries Industries classification complémentaires industries connexes de l'automobile
	industry number - numéro de l'industrie						
31 — MACHINE INDUSTRIES (except electrical machinery) – Concluded – INDUSTRIES DE LA MACHINERIE (sauf électrique) – fin							
Commercial refrigeration & air conditioning equipment industry - Industrie du matériel commercial de réfrigération et de climatisation				3121			
Compressor, pump & industrial fan industry - Industrie des compresseurs, pompes et ventilateurs			3191				
Construction & mining machinery & materials handling equipment industry - Industrie de la machinerie de construction et d'extraction minière et de l'équipement de manutention			3192				
Sawmill & woodworking machinery industry - Industrie de la machinerie pour scieries et ateliers de façonnage du bois			3193				
Turbine & mechanical power transmission equipment industry - Industrie des turbines et du matériel de transmission d'énergie mécanique			3194				
Other machinery & equipment industries n.e.c. - Autres industries de la machinerie et de l'équipement n.c.a.			3199				
32 — TRANSPORTATION EQUIPMENT INDUSTRIES – INDUSTRIES DU MATÉRIEL DE TRANSPORT							
Aircraft & aircraft parts industry - Industrie des aéronefs et des pièces d'aéronefs			3211				
Motor vehicle industry - Industrie des véhicules automobiles						3231	3231
Truck & bus body industry - Industries des carrosseries de camions, d'autobus et de remorques			3241				3241
Commercial trailer industry - Industrie des remorques d'usage commercial			3242				3242
Non-commercial trailer industry - Industrie des remorques d'usage non commercial		3243					
Mobile home industry - Industrie des maisons mobiles				3244			
Motor vehicle engine & engine parts industry - Industrie des moteurs et pièces de moteurs de véhicules automobiles						3251	3251
Motor vehicle wiring assemblies industry - Industrie des assemblages de câbles électriques pour véhicles automobiles					3252		3252
Motor vehicle stampings industry - Industrie des pièces embouties pour véhicules automobiles					3253		3253
Motor vehicle steering & suspension parts industry - Industrie des pièces pour systèmes de direction et de suspension de véhicules automobiles					3254		3254
Motor vehicle wheel & brake industry - Industrie des roues et des freins pour véhicules automobiles					3255		3255

TABLE 8. Industries Classified by Economic Use Groups – Continued

TABLEAU 8. Industries classées selon les groupes économiques d'utilisation – suite

Standard industrial classification 1980 Classification type des industries 1980	Economic use groups Groupes économiques d'utilisation						Supplementary classification-automotive products industries Industries classification complémentaires industries connexes de l'automobile
	Consumer non-durable and semi-durable goods Industries Industries des biens de consommation semi durables et non durables	Consumer durable goods industries Industries des biens de consommation durables	Capital goods industries Industries des biens de capital	Construction materials and components industries Industries des matériaux et des éléments de construction	Intermediate goods industries (except construction) Industries des produits intermédiaires (sauf construction)	Export oriented industries Industries orientées vers l'exportation	
	industry number - numéro de l'industrie						
32 — TRANSPORTATION EQUIPMENT INDUSTRIES – Concluded INDUSTRIES DU MATÉRIEL DE TRANSPORT – fin							
Plastic parts & accessories for motor vehicles industry - Industrie des pièces et accessoires en matière plastique pour véhicules automobiles					3256		3256
Motor vehicle fabric accessoires industry - Industrie des accessoires en matière textile pour véhicules automobiles					3257		3257
Other motor vehicle accessories parts & assemblies industries - Autres industries d'ensembles, de pièces et d'accessoires pour véhicules automobiles					3259		3259
Railroad rolling stock industry - Industrie du matériel ferroviaire roulant			3261				
Shipbuilding & repair industry - Industrie de la construction et de la réparation de navires			3271				
Boatbuilding & repair industry - Industrie de la construction et de la réparation d'embarcations		3281					
Other transportation equipment industries - Autres industries du matériel de transport		3299					
33 — ELECTRICAL & ELECTRONIC PRODUCTS INDUSTRIES – INDUSTRIES DES PRODUITS ÉLECTRIQUES & ELECTRONIQUES							
Small electrical appliance industry - Industrie des petits appareils électriques		3311					
Major appliance industry (electric & non-electric) - Industrie des gros appareils (électriques ou non)		3321					
Lighting fixture industry - Industrie des appareils d'éclairage fixes				3331			
Electric lamp & shade industry (except bulb & tube) - Industrie des lampes électriques et des abat-jour (sauf ampoules & tubes)		3332					
Electric lamp (bulb & tube) industry - Industries des lampes électriques (ampoules et tubes)	3333						
Record player, radio & television receiver industry - Industrie des phonographes et des récepteurs de radio et de télévision		3341					
Telecommunication equipment industry - Industrie de l'équipement de télécommunication			3351				
Electronic parts & components industry - Industrie des pièces et de composants électroniques						3352	
Other communication & electronic equipment industries - Autres industries de matériel électronique et de communication			3359				
Electronic computing & peripheral equipment industry - Industrie des machines électroniques à calculer et périphériques			3361				
Electronic office, store & business machine industry - Industrie des machines électroniques pour bureaux, magasins et commerces			3362				
Other office, store & business machine industries - Autres industries des machines pour bureaux, magasins & commerces			3369				

TABLE 8. Industries Classified by Economic Use Groups – Continued

TABLEAU 8. Industries classées selon les groupes économiques d'utilisation – suite

Standard industrial classification 1980 Classification type des industries 1980	Economic use groups Groupes économiques d'utilisation						Supplementary classification-automotive products industries Industries classification complémentaires industries connexes de l'automobile
	Consumer non-durable and semi-durable goods Industries Industries des biens de consommation semi durables et non durables	Consumer durable goods industries Industries des biens de consommation durables	Capital goods industries Industries des biens de capital	Construction materials and components industries Industries des matériaux et des éléments de construction	Intermediate goods industries (except construction) Industries des produits intermédiaires (sauf construction)	Export oriented industries Industries orientées vers l'exportation	
	industry number - numéro de l'industrie						
33 – ELECTRICAL & ELECTRONIC PRODUCTS INDUSTRIES – Concluded – INDUSTRIES DES PRODUITS ÉLECTRIQUES & ÉLECTRONIQUES – fin							
Electrical transformer industry - Industrie des transformateurs électriques			3371				
Electrical switchgear & protective equipment industry - Industrie du matériel électrique de communication et de protection			3372				
Other electrical industrial equipment industries - Autres industries de matériel électrique d'usage industriel			3379				
Communications & energy wire & cable industry - Industrie des fils & cables électriques et de communication				3381			
Battery industry - Industrie des accumulateurs							3391
Non-current carrying wiring devices industry - Industrie des dispositifs de câblage non porteurs de courant				3392			
Other electrical products industries n.e.c. - Autres industries de produits électriques n.c.a.				3399			
35 – NON-METALLIC MINERAL PRODUCTS INDUSTRIES – INDUSTRIES DES PRODUITS MINÉRAUX NON MÉTALLIQUES

FOOTNOTES

Table 1

(1) Although separate series for the Yukon and the Northwest Territories are not published, their values are included in the Canada total.

(2) The value for total shipments contains four industries where "production" is used instead of shipments. Please see concepts and methods, 5th paragraph for more details.

Tables 3-4

(1) Series in Table 3, which contain no significant seasonality, include: raw materials in the petroleum industries; goods in process in the primary metal industries; and inventory held but not owned in the transportation equipment industries and in Table 4: the series for unfilled orders in the export-oriented industries and supplementary classification - automotive products industries; and raw materials in the supplementary classification - automotive products industries. Therefore, these series are repeated without adjustment in the tables of seasonally adjusted estimates and aggregates of which they are components. Small differences in the unadjusted values, when repeated, may result from rounding techniques.

Table 6

(1) For this industry, "production" is used instead of shipments. For explanation, please see concepts and methods, 5th paragraph.

Note: Figures may not add due to rounding.

NOTES

Tableau 1

(1) Même si les séries pour le Yukon et les Territoires du Nord-Ouest ne sont pas publiées elles sont cependant inclues dans le total pour le Canada.

(2) La valeur des livraisons totales contient quatre industries ou la "production" est utilisée au lieu des livraisons. Pour plus de détails, voir le 5ième paragraphe des concepts et méthodes.

Tableaux 3-4

(1) Les séries du tableau 3, qui sont peu sensibles aux variations saisonnières incluent: les matières premières dans l'industrie pétrolière, les biens en cours dans les industries de première transformation les métaux, les stocks détenus mais non possédés dans les industries du matériel de transport et du tableau 4: la série des commandes en carnet dans les industries orientées vers l'exportation et dans la classification complémentaire-industries connexes de l'automobile, ainsi que les matières premières dans la classification complémentaire-industries connexes de l'automobile. Le tableau de la série désaisonnalisée répète donc les valeurs non corrigées. Les différences minimes entre les séries sont attribuables à la technique d'arrondissement utilisée.

Tableau 6

(1) Pour cette industrie, la "production" est utilisée au lieu des livraisons. Pour plus de détails, voir le 5ième paragraphe des concepts et méthodes.

Nota: Les chiffres ne totaliseront peut-être pas en raison de l'arrondissement.

CONCEPTS AND METHODS

Estimation Method

Inventories, shipments and orders values in this publication constitute monthly projections of annual census of manufactures values based on returns from a stratified, systematic sample of manufacturing establishments. The data in the January 1985 publication are the first to be published under the 1980 Standard Industrial Classification (SIC). The data in this publication are benchmarked to the 1981 Census. Values for years prior to 1981 have been previously benchmarked to the corresponding census data and the aggregate of monthly shipments in those years should correspond with published census values. Because the monthly estimates subsequent to 1981 are projections these totals are subject to adjustment when more recent census data become available. Inventory estimates for December published here, differ from year-end census values to the extent that census totals include individual establishment reports for fiscal years that may end on dates other than December 31. Unfilled orders are published for industries where maintenance of a continuing record of the value of an establishment's backlog of orders is a normal part of the accounting procedure.

The population of manufacturing establishments is divided into groups of large, medium and small establishments according to the value of shipments reported for the census year. Monthly values are sought for all large establishments and a sample is chosen separately for each of the other two size groups. Sample unit values are weighted according to the inverse of their probability of selection. This sample is revised annually in accordance with the census base. To facilitate timely response from company accounting departments, combined reports are accepted from companies with more than one establishment. Estimates of current values are accepted from establishments where the inventory and unfilled orders levels are not measured at the end of each accounting period. There are about 11,000 establishments in the reporting panel.

Inventories

Isolation of component values of inventory by level of fabrication in each industry, where possible, is important for economic studies as well as for derivation of production values. To facilitate this, respondents are asked to report their book values of raw materials, work in process, finished products and progress payments separately. The inventory levels are calculated on a Canada-wide basis, not by province.

Both inventory held and inventory owned, are published. The difference between inventory held and inventory owned, is the value of progress payments received by manufacturers for partially completed items such as aircraft, railroad rolling stocks, ships and structures using fabricated steel. As work proceeds on such items, total inventory values increase until the time of delivery. By deducting the balance of progress payments on manufacturers' books from total inventory, the value of manufacturers' investment in inventory is derived.

CONCEPTS ET MÉTHODES

Méthode d'estimation

Les chiffres sur les stocks, les livraisons et les commandes qui figurent dans cette publication sont des projections mensuelles des résultats du recensement annuel des manufactures établies à partir des déclarations d'un échantillon stratifié et systématique d'établissements manufacturiers. Les données que contient la publication de janvier 1985 sont les premières qui soient publiées sous la Classification Type des Industries (C.T.I.) de 1980. Les données que contient la publication sont ajustées en fonction du recensement de 1981. Les chiffres pour les années jusqu'à 1981 inclusivement ont été raccordés aux recensements en cause et la somme des livraisons mensuelles de ces années doit être égale aux résultats de recensements qui ont été publiés. Comme les estimations mensuelles postérieures à 1981 sont des projections, elles pourront être rectifiées lorsqu'on disposera des données de recensement plus récentes. Les estimations sur les stocks publiées dans ce bulletin sont celles de décembre, elles diffèrent donc des chiffres du recensement se rapportant à la fin de l'année dans la mesure où les totaux du recensement comprennent les déclarations de certains établissements pour des années financières qui peuvent prendre fin à d'autres dates qu'au 31 décembre. Les commandes en carnet sont publiées pour les industries où la comptabilité normale prévoit de consigner la valeur des commandes en souffrance des établissements d'une manière suivie.

La population des établissements manufacturiers se divise en trois groupes d'établissements (grands, moyens et petits) suivant la valeur des livraisons déclarées pour l'année de recensement. On demande des déclarations mensuelles à tous les grands établissements et on tire un échantillon séparé pour chacun des deux autres groupes. Les valeurs de l'échantillon sont pondérées en relation inverse de la probabilité qu'elles soient choisies. Cette échantillon est revisé annuellement suivant les résultats du recensement. Dans le but d'aider les services de comptabilité des sociétés à envoyer leurs déclarations à temps. Statistique Canada accepte une déclaration globale pour les sociétés ayant plus d'un établissement et une estimation des chiffres courants pour les établissements dont les stocks et les commandes en carnet ne sont pas recensés à la fin de chaque exercise comptable. On compte environ 11,000 établissements qui produisent des déclarations.

Les stocks

Il est important d'isoler les chiffres des éléments des stocks selon le stage de fabrication dans chaque industrie, lorsque c'est possible, afin de faire des études économiques et des extrapolations des chiffres de production. Â cet effet, on demande aux enquêtés de déclarer séparément la valeur comptable de leurs matières premières, de leurs produits en cours, de leurs produits finis et de leurs acomptes à valoir. Les niveaux des stocks sont calculés pour l'ensemble du Canada et non au niveau provincial.

On publie la valeur des stocks détenus et des stocks possédés. La différence entre les deux donne la valeur des acomptes versés par les fabricants sur des produits dont la fabrication n'est qu'en partie achevée comme les avions, le matériel ferroviaire roulant, les bâteaux et des constructions qui utilisent des semi-produits en acier. Â mesure que la fabrication de ces produits avance, la valeur globale des stocks augmente jusqu'au moment de la livraison. En déduisant le solde des acomptes comptabilisés par les fabricants de l'ensemble des stocks, on obtient la somme investie dans les stocks par les fabricants.

In order to reduce the distortion in the shipments of the four above mentioned industries that would be caused when responding companies finally treat such items of relatively high value as completed sales, a "production" value is used instead of shipments. This production value is derived from adjusting monthly shipments by the monthly change in inventories held (Goods in process held + Finished Products). The raw materials are not included in the calculation since production tries to measure "work done" during the month.

Orders

Most establishments that maintain order books strike a value of unfilled orders at the end of each accounting period. The survey seeks this value which is defined as orders received but not shipped or treated as a sale whether or not work has been done on them or they can be filled from existing stocks. No estimate of this value is made for those industries where orders are customarily filled from stocks on hand and orders books are accordingly not generally maintained.

New orders, a series of considerable economic interest, is a residual value derived from shipments and unfilled orders. All shipments within any month result from an order received either during that month or at some earlier time. New orders are calculated as the sum of total shipments within any month plus the change in the total of unfilled orders from the end of the previous month to the end of the month under review.

Imputation

Values must be imputed for those establishments that have not reported in time for compilation of monthly estimates. This is largely done by mechanical methods which take into account the activity of similar establishments from which reports have been received.

Revisions

Calculation of revised estimates for the immediately prior month in conjunction with preliminary estimates for the current month permits use of values reported too late for the first compilation. When respondents report values for periods earlier than those of the revised current estimates, the responses are used to correct the trends when the series are updated to new census benchmarks.

Definitions, classifications and groupings are based on those used by the census of manufactures.

The January 1973 issue of this publication contains a more detailed description of the concepts and survey methods for these series.

Afin de réduire la distortion qui surviendrait dans les quatres industries en cause au moment où les sociétés observées considèrent en fin de compte des produits d'une valeur relativement grande comme des ventes achevées, une valeur de "production" est utilisée au lieu des livraisons. Pour arriver à cette valeur de production, il s'agit d'ajuster la valeur mensuelle des livraisons par le changement mensuel dans les inventaires détenus (Produits en cours détenus + Produits finis). Les matières premières ne sont pas inclus dans ce calcul car nous essayons de calculer le "travail fait" durant le mois.

Les commandes

La plupart des établissements qui tiennent des carnets de commandes établissent la valeur des commandes en carnet à la fin de chaque exercise comptable. Lors de l'enquête, nous demandons cette valeur, qui est considérée comme commandes reçues mais non encore expédiées, que des travaux aient été effectués ou non à leur égard, lorsque la commande peut être honorée à partir des stocks existants. Cette valeur n'est pas estimée dans le cas des entreprises qui exécutent habituellement les commandes des réceptions, à partir de leurs stocks et qui par conséquent ne tiennent pas de carnet de commande.

Les séries sur les nouvelles commandes, qui présentent beaucoup d'intérêt du point de vue économique, donnent la valeur résiduelle établie à partir des livraisons et des commandes en carnet. Toutes les livraisons effectuées au cours d'un mois donné résultent d'une commande reçue soit pendant ce mois, soit avant. Les nouvelles commandes sont calculées à partir du total des livraisons au cours d'un mois donné plus la différence entre le total des commandes en carnet à la fin du mois précédent et le total des commandes en carnet à la fin du mois observé.

Imputation

Les valeurs doivent être imputées pour les établissements qui n'ont pas rapporté à temps pour la compilation des estimées mensuelles. Cette imputation se fait surtout par des moyens mécaniques qui tiennent compte de l'activité d'établissements semblables qui ont fait parvenir des déclarations.

Révisions

Le calcul des estimations revisées pour le mois précédent et des estimations préliminaires pour le mois observé permet d'utiliser les données déclarées trop tard pour la première compilation. Lorsque les répondants déclarent les chiffres correspondants aux périodes antérieures à celle des estimations révisées actuelles, les réponses servent à corriger les tendances lorsque les séries sont mises à jour d'après les nouvelles données repéré du recensement.

Les définitions, les classifications et les groupes sont basés sur ceux du recensement des manufactures.

Le numéro de janvier 1973 de cette publication contient une description plus détaillée des concepts et des méthodes d'enquête de cette série.

Historical Series

Major series published in this issue are stored in CANSIM, the computerized time series data bank of Statistics Canada. All or any part of these series may be purchased on magnetic tape or as computer print-outs. For further information direct inquiries to:

CANSIM,
Application Consulting Section,
Statistics Canada,
Ottawa, Ontario, K1A 0Z8

Seasonal Adjustment

The seasonal adjustment method applied to the series consists of the ratio-to-moving average method in use at Statistics Canada. The X-11 - ARIMA program is used for seasonal adjustment.

Some series containing no significant seasonality or very high irregularity have not been seasonally adjusted. In these cases, unadjusted values are repeated in the tables of seasonally adjusted data. See footnotes for series affected.

Months for Cyclical Dominance

The MCD or months for cyclical dominance values located at the right of the Cansim databank reference number for seasonally adjusted series, indicate the smallest span of months for which the average change in the cyclical factor is greater than that for the irregular factor. For the smoothest series the MCD is one; for the most erratic series, it is twelve. Application of a moving average of the period of the MCD will tend to smooth irregular movements that may obscure the underlying trend-cycle.

The Economic Use Classification (EUC)

The concept of the Economic Use Classification (EUC) consists of combining activities of individual industries at the finest level of aggregation identified by the Standard Industrial Classification (SIC) and bring together, in a general sense, industries whose outputs are directed towards the different types of markets served by industry or, in other words, groups that reflect demand on manufacturing industries by elements of the gross national expenditure.

The present EUC consists of six mutually exclusive groups and a supplementary automotive group. Although the output of an industry may serve a market that spans more than one classification, no attempt is made to subdivide that industry's output into finer detail than that identified by the SIC. Thus the distribution of specific industries to economic uses is determined by the perceived market for the greatest share of the industry's output.

Séries chronologiques

Les séries importantes publiées dans cette livraison sont stockées dans le CANSIM, banque électronique de données sur les séries chronologiques de Statistique Canada. On peut acheter toutes ces séries ou une partie d'entre elles sur bandes magnétiques ou sous forme d'états mécanographiques. Pour tout renseignement complémentaire, s'adresser au:

CANSIM,
Section de consultants aux applications,
Statistique Canada,
Ottawa (Ontario) K1A 0Z8

Désaisonnalisation

On désaisonnalise des séries en calculant le rapport à la moyenne mobile, suivant les méthodes utilisées à Statistique Canada. Il s'agit en l'occurrance du programme normalisé qui sert à appliquer le version X-11 - ARMMI.

Pour quelques séries particulières, il n'y a pas de saisonnalité d'importance, ou il y a trop d'irrégularité. Ces séries n'ont pas été désaisonnalisées. Pour ces cas, les valeurs, sans désaisonnalisation ont été répétées dans les tableaux des séries désaisonnalisées. Voir les notes pour les séries affectées.

Mois de dominance cyclique

Les valeurs de M.D.C. (mois de dominance cyclique) sont situées à la droite du numéro de référence de la Banque de données de "Cansim" pour les séries désaisonnalisées indiquent le plus petit nombre de mois pour lequel la variation moyenne du facteur cyclique est plus grande que celle du facteur d'irrégularité. Le M.D.C. est de un pour les séries les plus régulières et de douze pour les plus fluctuantes. L'application d'une moyenne mobile de la période des M.D.C. aidera à lisser les mouvements irréguliers qui pourraient masquer la tendance cyclique implicite.

Classification des groupes selon l'utilisation économique (CGUE)

Le concept de la classification des groupes selon l'utilisation économique (CGUE) est de combiner les activités des industries à leur plus bas niveau d'aggrégation identifié par la classification type des industries (C.T.I.) et de rassembler les industries d'après le marché desservi ou encore, en groupe d'après la demande sur les industries manufacturières par les éléments de la dépense nationale brute.

La CGUE comprend six groups mutuellement exclusifs et une classification complémentaire des industries connexes de l'automobile. Bien que la production d'une industrie peut servir plus d'un marché, aucun effort est fait pour subdiviser la production de cette industrie dans plus de détail que fournit par la C.T.I. Donc, la distribution d'industries spécifiques a un groupe économique se fait entièrement vers le marché qui est perçu comme étant le plus important pour l'industrie en question.

Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Shipments, Inventories and Orders Section,
Manufacturing and Primary Industries Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 990-9832) or to the Statistics Canada reference centre in:

HIGHLIGHTS

April 1985

- Preliminary estimates show that the seasonally adjusted value of shipments in all Canadian manufacturing industries increased 1.7% to $19,772.1 million in April from the revised estimate of $19,444.8 million in March. Shipments of durable goods were up 1.8% to $9,403.7 million from $9,240.0 million where increases of $88.5 million in fabricated metal products industries and of $86.8 million in transportation equipment industries were partly offset by a $72.1 millon decline in primary metal industries. An increase of $224.6 million in refined petroleum and coal products industries was the major contributor to a 1.6% increase in non-durable goods industries as shipments went from $10,204.9 million to $10,368.4 million.

- Seasonally adjusted inventories owned by manufacturers at the end of April were $33,521.0 million, up 0.1% from the previous month's revised value of $33,497.1 million. Total inventories held increased 0.1% to $34,-795.5 million from $34,746.2 million with an increase of 1.0% in raw materials, a decrease of 0.9% in goods in process and virtually no change in finished products.

- The ratio of seasonally adjusted total inventory owned to seasonally adjusted shipments went from 1.72:1 in March to 1.70:1 in April. The ratio of finished products inventory to shipments went from 0.63:1 in March to 0.62:1 in April.

- The value of new orders received in April, seasonally adjusted, decreased 0.3% to $19,506.3 million from the revised March estimate of $19,569.2 million. In durable goods industries, new orders, with an estimated value of $9,164.5 million, were 2.1% lower than the March value of $9,361.7 million. Most of the decrease can be attributed to declines of $242.6 million in transportation equipment industries and of $114.2 million in electrical and electronic products industries. There was, however, a $131.0 million increase in fabricated metal products industries. In non-durable goods industries, new orders were valued at $10,341.8 million, up 1.3% from the revised estimate for March of $10,207.4 million.

- The seasonally adjusted unfilled orders backlog at the end of April was $22,028.0 million, down 1.2% from the revised March estimate of $22,293.8 million. Unfilled orders decreased 1.2% in durable goods industries to $20,107.1 million from $20,346.2 million at the end of March. In non-durable goods industries, the unfilled orders were down 1.4% to $1,921.0 million from $1,-947.6 million.

- Not adjusted for seasonal variation, manufacturers' shipments in April 1985 were estimated at $20,063.7 million, 1.2% lower than the revised March value of

POINTS SAILLANTS

Avril 1985

- Après désaisonnalisation, la valeur des livraisons des industries manufacturières canadiennes s'est établie à $19,772.1 millions en avril 1985, soit une hausse de 1.7% par rapport à la valeur révisée de $19,444.8 millions en mars. Une augmentation de 1.8% a été enregistrée pour les biens durables qui sont passés de $9,240.0 millions à $9,403.7 millions. Cette hausse est principalement attribuable à des augmentations de $88.5 millions dans les industries de la fabrication des produits métalliques et de $86.8 millions dans les industries du matériel de transport. Les augmentations ont été en partie contrebalancées par une diminution de $72.1 millions dans les industries de première transformation des métaux. Les livraisons des biens non durables ont augmenté de 1.6% passant de $10,204.9 millions à $10,368.4 millions. Cette augmentation est principalement attribuable à un gain de $224.6 millions dans les industries des produits raffinés du pétrole et du charbon.

- La valeur désaisonnalisée du total des stocks possédés était de $33,521.0 millions en avril, une hausse de 0.1% par rapport à la valeur du mois précédent de $33,497.1 millions. Pour leur part, les stocks détenus ont augmenté de 0.1% à $34,795.5 millions de $34,746.2 millions. Une augmentation a été enregistrée au chapitre des matières premières (1.0%), une diminution des produits en cours de transformation (- 0.9%) et aucun changement dans les produits finis.

- Le rapport désaisonnalisé du total des stocks possédés aux livraisons est passé de 1.72:1 en mars à 1.70:1 en avril. Le rapport des produits finis aux livraisons est passé de 0.63:1 à 0.62:1.

- La valeur désaisonnalisée des nouvelles commandes dans l'ensemble des industries manufacturières a été estimée à $19,506.3 millions, ce qui représente une baisse de 0.3% par rapport au mois précédent qui était de $19,569.2 millions. Dans les industries des biens durables, la valeur estimative de $9,164.5 millions était inférieur de 2.1% à la valeur de mars de $9,361.7 millions. Cette diminution est principalement attribuable à des baisses de $242.6 millions dans les industries du matériel de transport et de $114.2 millions dans les industries des produits électriques et électroniques. Ces diminutions ont été en partie contrebalancées par une augmentation de $131.0 millions dans les industries de la fabrication des produits métalliques. Les nouvelles commandes des biens non durables ont atteint $10,341.8 millions, soit une hausse de 1.3% par rapport à la valeur revisée de mars ($10,207.4 millions).

- La valeur estimative des commandes en carnet, après désaisonnalisation, s'est établie à $22,028.0 millions en avril, une baisse de 1.2% par rapport à la valeur de mars de $22,293.8 millions. Les commandes en carnet des biens durables ont diminué de 1.2% passant de $20,346.2 millions à $20,107.1 millions alors que celles des biens non durables ont diminué de 1.4% à $1,921.0 millions de $1,947.6 millions.

- On a estimé à $20,063.7 millions les livraisons non désaisonnalisées en avril 1985, ce qui représente une baisse de 1.2% par rapport à la valeur révisée de mars de $20,304.1 millions. Pour

$20,304.1 million. Cumulative shipments for the first four months of 1985, at an estimated $76,943.0 million, were up 6.0% from the $72,587.4 million estimated for the same period in 1984.

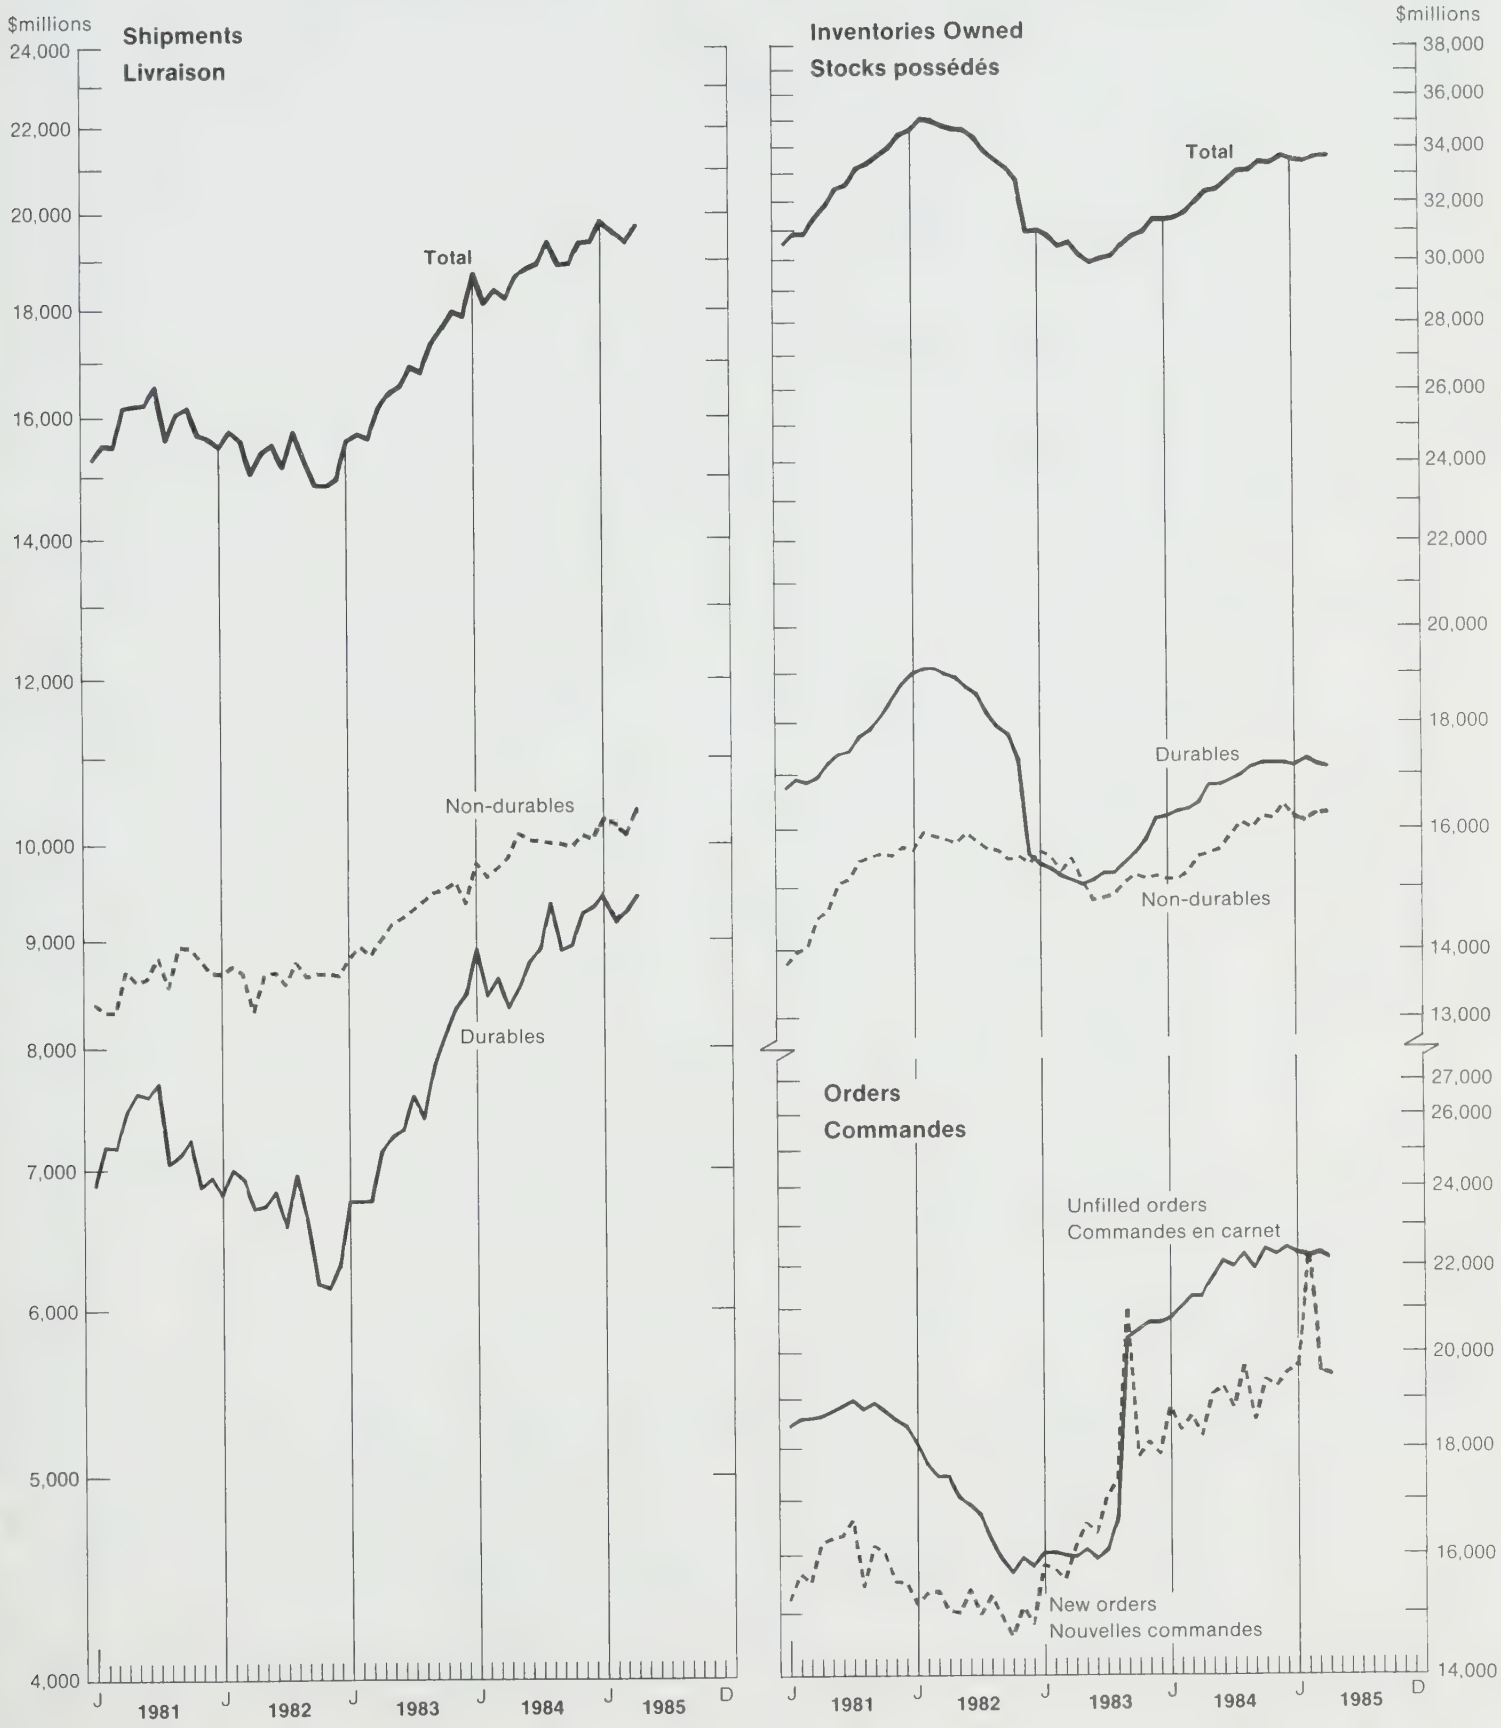

les quatre premiers mois de 1985, les livraisons estimatives ont totalisé $76,943.0 millions, soit une hausse de 6.0% par rapport à $72,587.4 millions obtenus au cours de la période correspondante de 1984.

FOOTNOTES

Table 1

(1) Although separate series for the Yukon and the Northwest Territories are not published, their values are included in the Canada total.

(2) The value for total shipments contains four industries where "production" is used instead of shipments. Please see concepts and methods, 5th paragraph for more details.

Tables 3-4

(1) Series in Table 3, which contain no significant seasonality, include: raw materials in the petroleum industries; goods in process in the primary metal industries; and inventory held but not owned in the transportation equipment industries and in Table 4: the series for unfilled orders in the export-oriented industries and supplementary classification - automotive products industries; and raw materials in the supplementary classification - automotive products industries. Therefore, these series are repeated without adjustment in the tables of seasonally adjusted estimates and aggregates of which they are components. Small differences in the unadjusted values, when repeated, may result from rounding techniques.

Table 6

(1) For this industry, "production" is used instead of shipments. For explanation, please see concepts and methods, 5th paragraph.

Note: Figures may not add due to rounding.

NOTES

Tableau 1

(1) Même si les séries pour le Yukon et les Territoires du Nord-Ouest ne sont pas publiées elles sont cependant inclues dans le total pour le Canada.

(2) La valeur des livraisons totales contient quatre industries ou la "production" est utilisée au lieu des livraisons. Pour plus de détails, voir le 5ième paragraphe des concepts et méthodes.

Tableaux 3-4

(1) Les séries du tableau 3, qui sont peu sensibles aux variations saisonnières incluent: les matières premières dans l'industrie pétrolière, les biens en cours dans les industries de première transformation les métaux, les stocks détenus mais non possédés dans les industries du matériel de transport et du tableau 4: la série des commandes en carnet dans les industries orientées vers l'exportation et dans la classification complémentaire-industries connexes de l'automobile, ainsi que les matières premières dans la classification complémentaire-industries connexes de l'automobile. Le tableau de la série désaisonnalisée répète donc les valeurs non corrigées. Les différences minimes entre les séries sont attribuables à la technique d'arrondissement utilisée.

Tableau 6

(1) Pour cette industrie, la "production" est utilisée au lieu des livraisons. Pour plus de détails, voir le 5ième paragraphe des concepts et méthodes.

Nota: Les chiffres ne totaliseront peut-être pas en raison de l'arrondissement.

CONCEPTS AND METHODS

Estimation Method

Inventories, shipments and orders values in this publication constitute monthly projections of annual census of manufactures values based on returns from a stratified, systematic sample of manufacturing establishments. The data in the January 1985 publication are the first to be published under the 1980 Standard Industrial Classification (SIC). The data in this publication are benchmarked to the 1981 Census. Values for years prior to 1981 have been previously benchmarked to the corresponding census data and the aggregate of monthly shipments in those years should correspond with published census values. Because the monthly estimates subsequent to 1981 are projections these totals are subject to adjustment when more recent census data become available. Inventory estimates for December published here, differ from year-end census values to the extent that census totals include individual establishment reports for fiscal years that may end on dates other than December 31. Unfilled orders are published for industries where maintenance of a continuing record of the value of an establishment's backlog of orders is a normal part of the accounting procedure.

The population of manufacturing establishments is divided into groups of large, medium and small establishments according to the value of shipments reported for the census year. Monthly values are sought for all large establishments and a sample is chosen separately for each of the other two size groups. Sample unit values are weighted according to the inverse of their probability of selection. This sample is revised annually in accordance with the census base. To facilitate timely response from company accounting departments, combined reports are accepted from companies with more than one establishment. Estimates of current values are accepted from establishments where the inventory and unfilled orders levels are not measured at the end of each accounting period. There are about 11,000 establishments in the reporting panel.

Inventories

Isolation of component values of inventory by level of fabrication in each industry, where possible, is important for economic studies as well as for derivation of production values. To facilitate this, respondents are asked to report their book values of raw materials, work in process, finished products and progress payments separately. The inventory levels are calculated on a Canada-wide basis, not by province.

Both inventory held and inventory owned, are published. The difference between inventory held and inventory owned, is the value of progress payments received by manufacturers for partially completed items such as aircraft, railroad rolling stocks, ships and structures using fabricated steel. As work proceeds on such items, total inventory values increase until the time of delivery. By deducting the balance of progress payments on manufacturers' books from total inventory, the value of manufacturers' investment in inventory is derived.

CONCEPTS ET MÉTHODES

Méthode d'estimation

Les chiffres sur les stocks, les livraisons et les commandes qui figurent dans cette publication sont des projections mensuelles des résultats du recensement annuel des manufactures établies à partir des déclarations d'un échantillon stratifié et systématique d'établissements manufacturiers. Les données que contient la publication de janvier 1985 sont les premières qui soient publiées sous la Classification Type des Industries (C.T.I.) de 1980. Les données que contient la publication sont ajustées en fonction du recensement de 1981. Les chiffres pour les années jusqu'à 1981 inclusivement ont été raccordés aux recensements en cause et la somme des livraisons mensuelles de ces années doit être égale aux résultats de recensements qui ont été publiés. Comme les estimations mensuelles postérieures à 1981 sont des projections, elles pourront être rectifiées lorsqu'on disposera des données de recensement plus récentes. Les estimations sur les stocks publiées dans ce bulletin sont celles de décembre, elles diffèrent donc des chiffres du recensement se rapportant à la fin de l'année dans la mesure où les totaux du recensement comprennent les déclarations de certains établissements pour des années financières qui peuvent prendre fin à d'autres dates qu'au 31 décembre. Les commandes en carnet sont publiées pour les industries où la comptabilité normale prévoit de consigner la valeur des commandes en souffrance des établissements d'une manière suivie.

La population des établissements manufacturiers se divise en trois groupes d'établissements (grands, moyens et petits) suivant la valeur des livraisons déclarées pour l'année de recensement. On demande des déclarations mensuelles à tous les grands établissements et on tire un échantillon séparé pour chacun des deux autres groupes. Les valeurs de l'échantillon sont pondérées en relation inverse de la probabilité qu'elles soient choisies. Cette échantillon est revisé annuellement suivant les résultats du recensement. Dans le but d'aider les services de comptabilité des sociétés à envoyer leurs déclarations à temps. Statistique Canada accepte une déclaration globale pour les sociétés ayant plus d'un établissement et une estimation des chiffres courants pour les établissements dont les stocks et les commandes en carnet ne sont pas recensés à la fin de chaque exercise comptable. On compte environ 11,000 établissements qui produisent des déclarations.

Les stocks

Il est important d'isoler les chiffres des éléments des stocks selon le stage de fabrication dans chaque industrie, lorsque c'est possible, afin de faire des études économiques et des extrapolations des chiffres de production. Â cet effet, on demande aux enquêtés de déclarer séparément la valeur comptable de leurs matières premières, de leurs produits en cours, de leurs produits finis et de leurs acomptes à valoir. Les niveaux des stocks sont calculés pour l'ensemble du Canada et non au niveau provincial.

On publie la valeur des stocks détenus et des stocks possédés. La différence entre les deux donne la valeur des acomptes versés par les fabricants sur des produits dont la fabrication n'est qu'en partie achevée comme les avions, le matériel ferroviaire roulant, les bâteaux et des constructions qui utilisent des semi-produits en acier. Â mesure que la fabrication de ces produits avance, la valeur globale des stocks augmente jusqu'au moment de la livraison. En déduisant le solde des acomptes comptabilisés par les fabricants de l'ensemble des stocks, on obtient la somme investie dans les stocks par les fabricants.

In order to reduce the distortion in the shipments of the four above mentioned industries that would be caused when responding companies finally treat such items of relatively high value as completed sales, a "production" value is used instead of shipments. This production value is derived from adjusting monthly shipments by the monthly change in inventories held (Goods in process held + Finished Products). The raw materials are not included in the calculation since production tries to measure "work done" during the month.

Orders

Most establishments that maintain order books strike a value of unfilled orders at the end of each accounting period. The survey seeks this value which is defined as orders received but not shipped or treated as a sale whether or not work has been done on them or they can be filled from existing stocks. No estimate of this value is made for those industries where orders are customarily filled from stocks on hand and orders books are accordingly not generally maintained.

New orders, a series of considerable economic interest, is a residual value derived from shipments and unfilled orders. All shipments within any month result from an order received either during that month or at some earlier time. New orders are calculated as the sum of total shipments within any month plus the change in the total of unfilled orders from the end of the previous month to the end of the month under review.

Imputation

Values must be imputed for those establishments that have not reported in time for compilation of monthly estimates. This is largely done by mechanical methods which take into account the activity of similar establishments from which reports have been received.

Revisions

Calculation of revised estimates for the immediately prior month in conjunction with preliminary estimates for the current month permits use of values reported too late for the first compilation. When respondents report values for periods earlier than those of the revised current estimates, the responses are used to correct the trends when the series are updated to new census benchmarks.

Definitions, classifications and groupings are based on those used by the census of manufactures.

The January 1973 issue of this publication contains a more detailed description of the concepts and survey methods for these series.

Afin de réduire la distortion qui surviendrait dans les quatres industries en cause au moment où les sociétés observées considèrent en fin de compte des produits d'une valeur relativement grande comme des ventes achevées, une valeur de "production" est utilisée au lieu des livraisons. Pour arriver à cette valeur de production, il s'agit d'ajuster la valeur mensuelle des livraisons par le changement mensuel dans les inventaires détenus (Produits en cours détenus + Produits finis). Les matières premières ne sont pas inclus dans ce calcul car nous essayons de calculer le "travail fait" durant le mois.

Les commandes

La plupart des établissements qui tiennent des carnets de commandes établissent la valeur des commandes en carnet à la fin de chaque exercise comptable. Lors de l'enquête, nous demandons cette valeur, qui est considérée comme commandes reçues mais non encore expédiées, que des travaux aient été effectués ou non à leur égard, lorsque la commande peut être honorée à partir des stocks existants. Cette valeur n'est pas estimée dans le cas des entreprises qui exécutent habituellement les commandes des réceptions, à partir de leurs stocks et qui par conséquent ne tiennent pas de carnet de commande.

Les séries sur les nouvelles commandes, qui présentent beaucoup d'intérêt du point de vue économique, donnent la valeur résiduelle établie à partir des livraisons et des commandes en carnet. Toutes les livraisons effectuées au cours d'un mois donné résultent d'une commande reçue soit pendant ce mois, soit avant. Les nouvelles commandes sont calculées à partir du total des livraisons au cours d'un mois donné plus la différence entre le total des commandes en carnet à la fin du mois précédent et le total des commandes en carnet à la fin du mois observé.

Imputation

Les valeurs doivent être imputées pour les établissements qui n'ont pas rapporté à temps pour la compilation des estimées mensuelles. Cette imputation se fait surtout par des moyens mécaniques qui tiennent compte de l'activité d'établissements semblables qui ont fait parvenir des déclarations.

Révisions

Le calcul des estimations revisées pour le mois précédent et des estimations préliminaires pour le mois observé permet d'utiliser les données déclarées trop tard pour la première compilation. Lorsque les répondants déclarent les chiffres correspondants aux périodes antérieures à celle des estimations révisées actuelles, les réponses servent à corriger les tendances lorsque les séries sont mises à jour d'après les nouvelles données repéré du recensement.

Les définitions, les classifications et les groupes sont basés sur ceux du recensement des manufactures.

Le numéro de janvier 1973 de cette publication contient une description plus détaillée des concepts et des méthodes d'enquête de cette série.

Historical Series

Major series published in this issue are stored in CANSIM, the computerized time series data bank of Statistics Canada. All or any part of these series may be purchased on magnetic tape or as computer print-outs. For further information direct inquiries to:

CANSIM,
Application Consulting Section,
Statistics Canada,
Ottawa, Ontario, K1A 0Z8

Seasonal Adjustment

The seasonal adjustment method applied to the series consists of the ratio-to-moving average method in use at Statistics Canada. The X-11 - ARIMA program is used for seasonal adjustment.

Some series containing no significant seasonality or very high irregularity have not been seasonally adjusted. In these cases, unadjusted values are repeated in the tables of seasonally adjusted data. See footnotes for series affected.

Months for Cyclical Dominance

The MCD or months for cyclical dominance values located at the right of the Cansim databank reference number for seasonally adjusted series, indicate the smallest span of months for which the average change in the cyclical factor is greater than that for the irregular factor. For the smoothest series the MCD is one; for the most erratic series, it is twelve. Application of a moving average of the period of the MCD will tend to smooth irregular movements that may obscure the underlying trend-cycle.

The Economic Use Classification (EUC)

The concept of the Economic Use Classification (EUC) consists of combining activities of individual industries at the finest level of aggregation identified by the Standard Industrial Classification (SIC) and bring together, in a general sense, industries whose outputs are directed towards the different types of markets served by industry or, in other words, groups that reflect demand on manufacturing industries by elements of the gross national expenditure.

The present EUC consists of six mutually exclusive groups and a supplementary automotive group. Although the output of an industry may serve a market that spans more than one classification, no attempt is made to subdivide that industry's output into finer detail than that identified by the SIC. Thus the distribution of specific industries to economic uses is determined by the perceived market for the greatest share of the industry's output.

Séries chronologiques

Les séries importantes publiées dans cette livraison sont stockées dans le CANSIM, banque électronique de données sur les séries chronologiques de Statistique Canada. On peut acheter toutes ces séries ou une partie d'entre elles sur bandes magnétiques ou sous forme d'états mécanographiques. Pour tout renseignement complémentaire, s'adresser au:

CANSIM,
Section de consultants aux applications,
Statistique Canada,
Ottawa (Ontario) K1A 0Z8

Désaisonnalisation

On désaisonnalise des séries en calculant le rapport à la moyenne mobile, suivant les méthodes utilisées à Statistique Canada. Il s'agit en l'occurrance du programme normalisé qui sert à appliquer le version X-11 - ARMMI.

Pour quelques séries particulières, il n'y a pas de saisonnalité d'importance, ou il y a trop d'irrégularité. Ces séries n'ont pas été désaisonnalisées. Pour ces cas, les valeurs, sans désaisonnalisation ont été répétées dans les tableaux des séries désaisonnalisées. Voir les notes pour les séries affectées.

Mois de dominance cyclique

Les valeurs de M.D.C. (mois de dominance cyclique) sont situées à la droite du numéro de référence de la Banque de données de "Cansim" pour les séries désaisonnalisées indiquent le plus petit nombre de mois pour lequel la variation moyenne du facteur cyclique est plus grande que celle du facteur d'irrégularité. Le M.D.C. est de un pour les séries les plus régulières et de douze pour les plus fluctuantes. L'application d'une moyenne mobile de la période des M.D.C. aidera à lisser les mouvements irréguliers qui pourraient masquer la tendance cyclique implicite.

Classification des groupes selon l'utilisation économique (CGUE)

Le concept de la classification des groupes selon l'utilisation économique (CGUE) est de combiner les activités des industries à leur plus bas niveau d'aggrégation identifié par la classification type des industries (C.T.I.) et de rassembler les industries d'après le marché desservi ou encore, en groupe d'après la demande sur les industries manufacturières par les éléments de la dépense nationale brute.

La CGUE comprend six groups mutuellement exclusifs et une classification complémentaire des industries connexes de l'automobile. Bien que la production d'une industrie peut servir plus d'un marché, aucun effort est fait pour subdiviser la production de cette industrie dans plus de détail que fournit par la C.T.I. Donc, la distribution d'industries spécifiques a un groupe économique se fait entièrement vers le marché qui est perçu comme étant le plus important pour l'industrie en question.

Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Shipments, Inventories and Orders Section,
Manufacturing and Primary Industries Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 990-9832) or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Section des livraisons, des stocks et des commandes,
Division des industries manufacturières et primaires,

HIGHLIGHTS

May 1985

- Preliminary estimates show that the seasonally adjusted value of shipments in all Canadian manufacturing industries increased 1.1% to $19,960.5 million in May from the revised level of $19,736.6 million in April. Shipments of durable goods industries were up 3.6% to $9,717.9 million from $9,376.5 million where increases of $96.8 million in primary metal industries, of $87.6 million in wood industries and of $61.4 million in transportaiton equipment industries accounted for most of the gain. A decrease of $196.5 million in refined petroleum and coal products industries was the major contributor to a 1.1% decrease in non-durable goods industries as shipments went from $10,360.1 million to $10,242.6 million.

- Seasonally adjusted inventories owned by manufacturers at the end of May were $33,540.4 million, up 0.1% from the previous month's revised value of $33,496.5 million. Total inventories held decreased 0.1% to $34,-746.7 million from $34,777.7 million with decreases of 0.3% in raw materials and of 0.1% in goods in process. There was, however, a 0.2% increase in finished products.

- The ratio of seasonally adjusted total inventory owned to seasonally adjusted shipments went from 1.70:1 in April to 1.68:1 in May. The ratio of finished products inventory to shipments remain at 0.62:1.

- The value of new orders received in May, seasonally adjusted, increased 3.1% to $20,092.6 million from the revised April estimate of $19,484.4 million. In durable goods industries, new orders, with an estimated value of $9,795.7 million, were 7.4% higher than the April value of $9,121.2 million. Most of the increase can be attributed to gains of $247.6 million in primary metal industries of $122.1 million in machinery industries and of $78.3 million in transportation equipment industries. In non-durable goods industries, new orders were valued at $10,296.9 million, down 0.6% from the revised estimate for April of $10,363.2 million.

- The seasonally adjusted unfilled orders backlog at the end of May was $22,173.7 million, up 0.6% from the revised April estimate of $22,041.6 million. Unfilled orders increased 0.4% in durable goods industries to $20,168.7 million from $20,090.9 million at the end of April. In non-durable goods industries, the unfilled orders were up 2.8% to $2,005.0 million from $1,950.7 million.

- Not adjusted for seasonal variation, manufacturers' shipments in May 1985 were estimated at $21,254.8 million, 6.1% higher than the revised April value of $20,026.8 million. Cumulative shipments for the first five months of 1985, at an estimated $98,160.8 million, were up 6.2% from the $92,469.0 million estimated for the same period in 1984.

POINTS SAILLANTS

Mai 1985

- Après désaisonnalisation, la valeur des livraisons des industries manufacturières canadiennes s'est établie à $19,960.5 millions en mai soit une hausse de 1.1% par rapport à la valeur revisée de $19,736.6 millions en avril. Une augmentation de 3.6% a été enregistrée pour les biens durables qui sont passés de $9,376.5 millions à $9,717.9 millions. Cette hausse est principalement attribuable à des augmentations de $96.8 millions dans les industries de première transformation des métaux, de $87.6 millions dans les industries du bois et de 61.4 millions dans les industries du matériel de transport. Les livraisons des biens non durables ont diminué de 1.1% passant de $10,360.1 millions à $10,242.6 millions. Cette diminution est principalement attribuable à une perte de $196.5 millions dans les industries des produits raffinés du pétrole et du charbon.

- La valeur désaisonnalisée du total des stocks possédés était de $33,540.4 millions en mai, une hausse de 0.1% par rapport à la valeur du mois précédent de $33,496.5 millions. Pour leur part, les stocks détenus ont diminué de 0.1% à $34,746.7 millions de $34,777.7 millions. Des diminutions ont été enregistrées au chapitre des matières premières (- 0.3%) et des biens en cours de transformation (- 0.1%) mais une augmentation de 0.2% a été enregistrée pour les produits finis.

- Le rapport désaisonnalisé du total des stocks possédés aux livraisons est passé de 1.70:1 en avril à 1.68:1 en mai. Le rapport des produits finis aux livraisons est resté inchangé à 0.62:1.

- La valeur désaisonnalisée des nouvelles commandes dans l'ensemble des industries manufacturières a été estimée à $20,092.6 millions, ce qui représente une baisse de 3.1% par rapport au mois précédent qui était de $19,484.4 millions. Dans les industries des biens durables, la valeur estimative de $9,795.7 millions était supérieure de 7.4% à la valeur d'avril de $9,121.2 millions. Cette augmentation est principalement attribuable à des hausses de $247.6 millions dans les industries de premières transformation des métaux, de $122.1 millions dans les industries de la machinerie et de $78.3 millions dans les industries du matériel de transport. Les nouvelles commandes des biens non durables ont atteint $10,296.9 millons, soit une baisse de 0.6% par rapport à la valeur revisée d'avril ($10,363.2 millions).

- La valeur estimative des commandes en carnet, après désaisonnalisation, s'est établie à $22,173.7 millions en mai, une hausse de 0.6% par rapport à la valeur d'avril de $22,041.6 millions. Les commandes en carnet des biens durables ont augmenté de 0.4% passant de $20,090.9 millions à $20,168.7 millions alors que celles des biens non durables ont diminué de 2.8% à $2,005.0 millions de $1,950.7 millions.

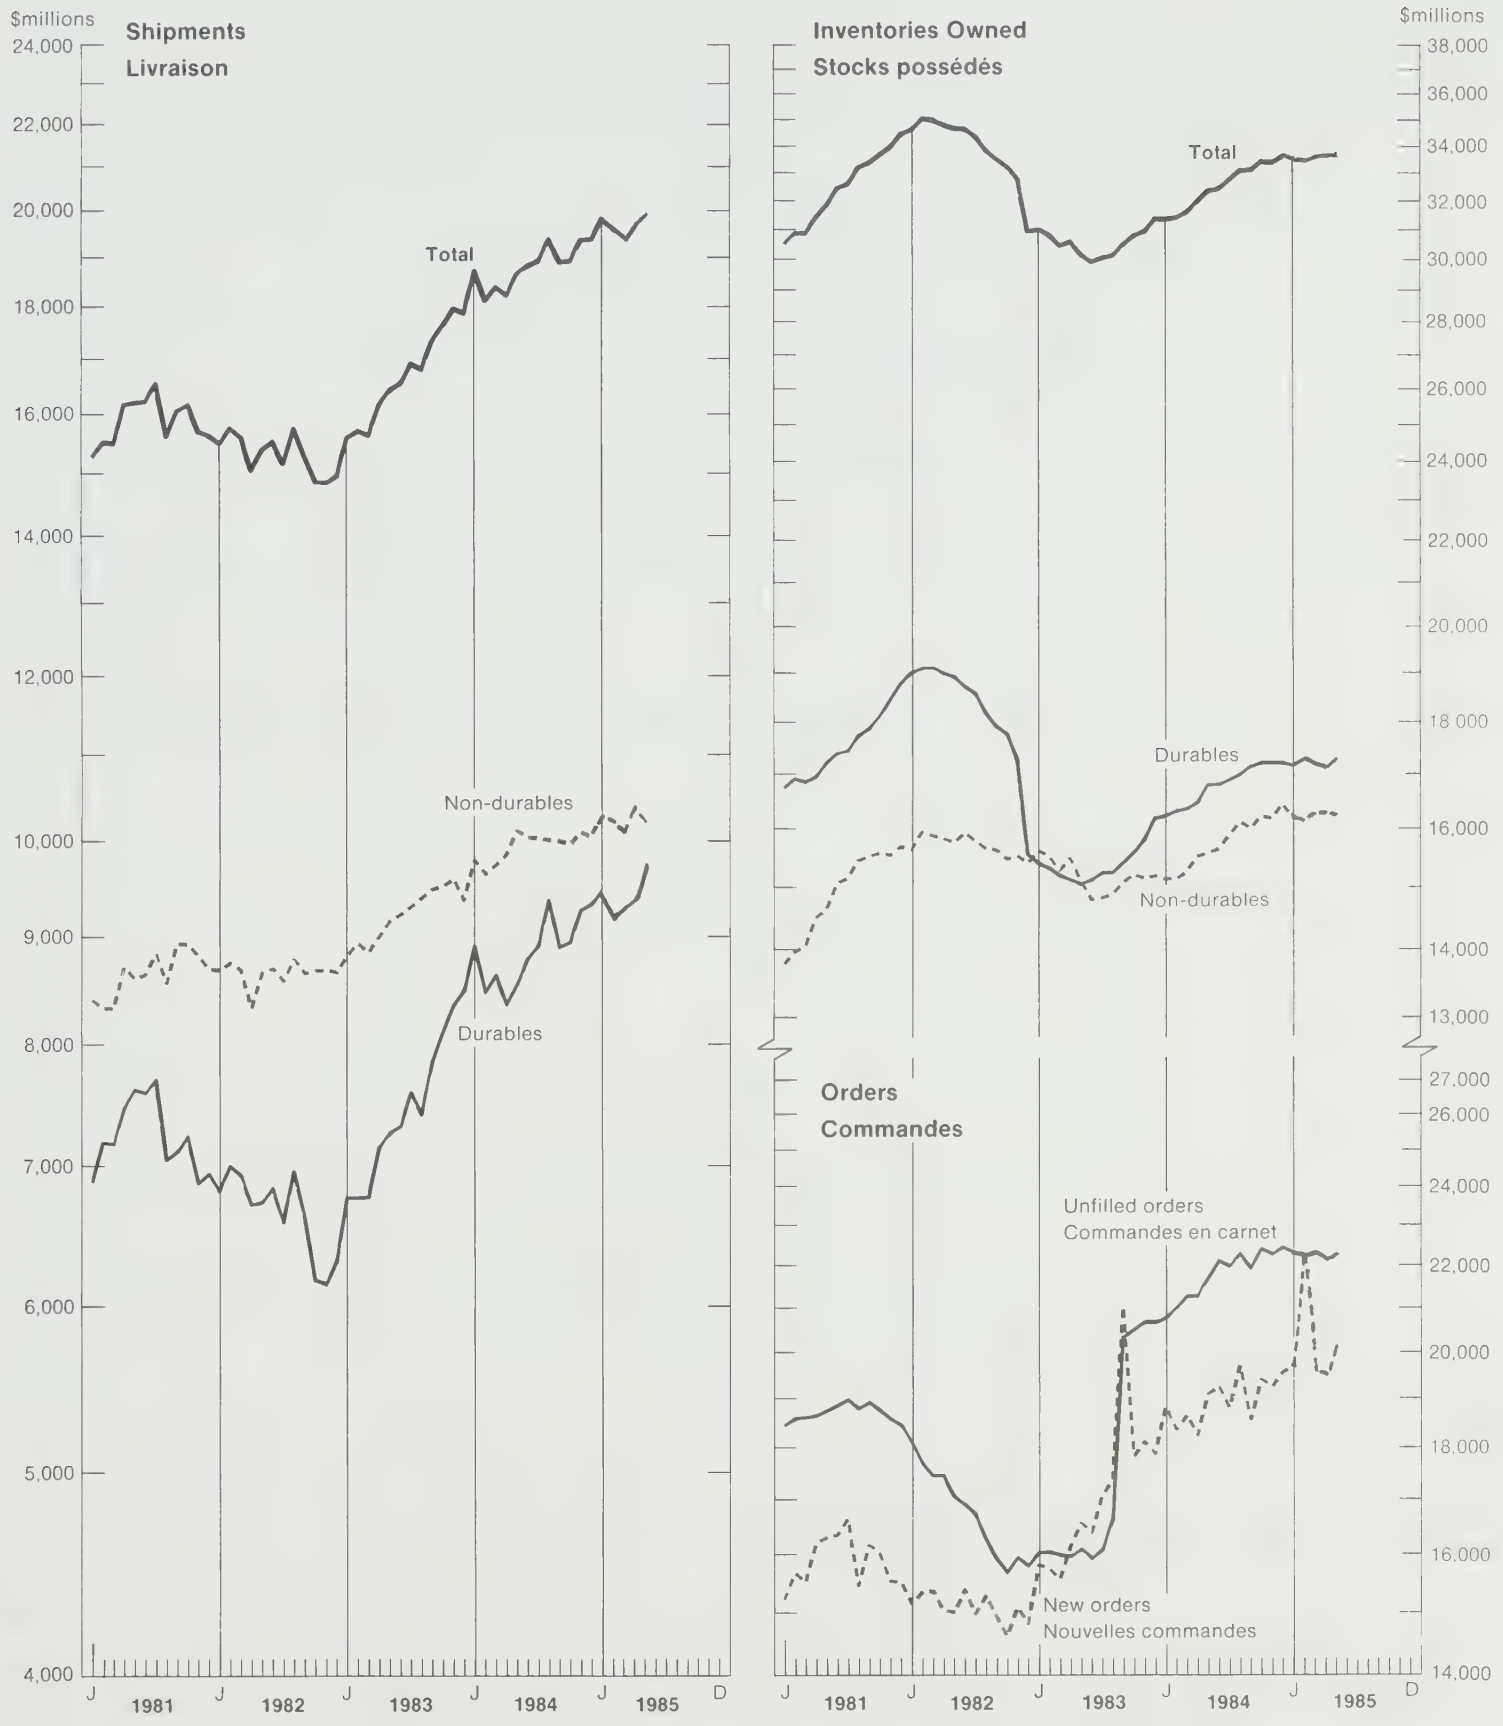

- On a estimé à $21,254.8 millions les livraisons non désaisonnalisées en mai 1985, ce qui représente une hausse de 6.1% par rapport à la valeur revisée d'avril de $20,026.8 millions. Pour les cinq premiers mois de 1985, les livraisons estimatives ont totalisé $98,160.8 million, soit une hausse de 6.2% par rapport à $92,469.0 millions obtenus au cours de la période correspondante de 1984.

Manufacturer's Shipments, Inventories and Orders, 1981-1985

Les livraisons, les stocks et les commandes des fabricants, 1981-1985

(Seasonally Adjusted — Chiffres désaisonnalisés)

(Ratio scale — Échelle semi-logarithmique)

FOOTNOTES

Table 1

(1) Although separate series for the Yukon and the Northwest Territories are not published, their values are included in the Canada total.

(2) The value for total shipments contains four industries where "production" is used instead of shipments. Please see concepts and methods, 5th paragraph for more details.

Tables 3-4

(1) Series in Table 3, which contain no significant seasonality, include: raw materials in the petroleum industries; goods in process in the primary metal industries; and inventory held but not owned in the transportation equipment industries and in Table 4: the series for unfilled orders in the export-oriented industries and supplementary classification - automotive products industries; and raw materials in the supplementary classification - automotive products industries. Therefore, these series are repeated without adjustment in the tables of seasonally adjusted estimates and aggregates of which they are components. Small differences in the unadjusted values, when repeated, may result from rounding techniques.

Table 6

(1) For this industry, "production" is used instead of shipments. For explanation, please see concepts and methods, 5th paragraph.

Note: Figures may not add due to rounding.

NOTES

Tableau 1

(1) Même si les séries pour le Yukon et les Territoires du Nord-Ouest ne sont pas publiées elles sont cependant inclues dans le total pour le Canada.

(2) La valeur des livraisons totales contient quatre industries ou la "production" est utilisée au lieu des livraisons. Pour plus de détails, voir le 5ième paragraphe des concepts et méthodes.

Tableaux 3-4

(1) Les séries du tableau 3, qui sont peu sensibles aux variations saisonnières incluent: les matières premières dans l'industrie pétrolière, les biens en cours dans les industries de première transformation les métaux, les stocks détenus mais non possédés dans les industries du matériel de transport et du tableau 4: la série des commandes en carnet dans les industries orientées vers l'exportation et dans la classification complémentaire-industries connexes de l'automobile, ainsi que les matières premières dans la classification complémentaire-industries connexes de l'automobile. Le tableau de la série désaisonnalisée répète donc les valeurs non corrigées. Les différences minimes entre les séries sont attribuables à la technique d'arrondissement utilisée.

Tableau 6

(1) Pour cette industrie, la "production" est utilisée au lieu des livraisons. Pour plus de détails, voir le 5ième paragraphe des concepts et méthodes.

Nota: Les chiffres ne totaliseront peut-être pas en raison de l'arrondissement.

CONCEPTS AND METHODS

Estimation Method

Inventories, shipments and orders values in this publication constitute monthly projections of annual census of manufactures values based on returns from a stratified, systematic sample of manufacturing establishments. The data in the January 1985 publication are the first to be published under the 1980 Standard Industrial Classification (SIC). The data in this publication are benchmarked to the 1981 Census. Values for years prior to 1981 have been previously benchmarked to the corresponding census data and the aggregate of monthly shipments in those years should correspond with published census values. Because the monthly estimates subsequent to 1981 are projections these totals are subject to adjustment when more recent census data become available. Inventory estimates for December published here, differ from year-end census values to the extent that census totals include individual establishment reports for fiscal years that may end on dates other than December 31. Unfilled orders are published for industries where maintenance of a continuing record of the value of an establishment's backlog of orders is a normal part of the accounting procedure.

The population of manufacturing establishments is divided into groups of large, medium and small establishments according to the value of shipments reported for the census year. Monthly values are sought for all large establishments and a sample is chosen separately for each of the other two size groups. Sample unit values are weighted according to the inverse of their probability of selection. This sample is revised annually in accordance with the census base. To facilitate timely response from company accounting departments, combined reports are accepted from companies with more than one establishment. Estimates of current values are accepted from establishments where the inventory and unfilled orders levels are not measured at the end of each accounting period. There are about 11,000 establishments in the reporting panel.

Inventories

Isolation of component values of inventory by level of fabrication in each industry, where possible, is important for economic studies as well as for derivation of production values. To facilitate this, respondents are asked to report their book values of raw materials, work in process, finished products and progress payments separately. The inventory levels are calculated on a Canada-wide basis, not by province.

Both inventory held and inventory owned, are published. The difference between inventory held and inventory owned, is the value of progress payments received by manufacturers for partially completed items such as aircraft, railroad rolling stocks, ships and structures using fabricated steel. As work proceeds on such items, total inventory values increase until the time of delivery. By deducting the balance of progress payments on manufacturers' books from total inventory, the value of manufacturers' investment in inventory is derived.

CONCEPTS ET MÉTHODES

Méthode d'estimation

Les chiffres sur les stocks, les livraisons et les commandes qui figurent dans cette publication sont des projections mensuelles des résultats du recensement annuel des manufactures établies à partir des déclarations d'un échantillon stratifié et systématique d'établissements manufacturiers. Les données que contient la publication de janvier 1985 sont les premières qui soient publiées sous la Classification Type des Industries (C.T.I.) de 1980. Les données que contient la publication sont ajustées en fonction du recensement de 1981. Les chiffres pour les années jusqu'à 1981 inclusivement ont été raccordés aux recensements en cause et la somme des livraisons mensuelles de ces années doit être égale aux résultats de recensements qui ont été publiés. Comme les estimations mensuelles postérieures à 1981 sont des projections, elles pourront être rectifiées lorsqu'on disposera des données de recensement plus récentes. Les estimations sur les stocks publiées dans ce bulletin sont celles de décembre, elles diffèrent donc des chiffres du recensement se rapportant à la fin de l'année dans la mesure où les totaux du recensement comprennent les déclarations de certains établissements pour des années financières qui peuvent prendre fin à d'autres dates qu'au 31 décembre. Les commandes en carnet sont publiées pour les industries où la comptabilité normale prévoit de consigner la valeur des commandes en souffrance des établissements d'une manière suivie.

La population des établissements manufacturiers se divise en trois groupes d'établissements (grands, moyens et petits) suivant la valeur des livraisons déclarées pour l'année de recensement. On demande des déclarations mensuelles à tous les grands établissements et on tire un échantillon séparé pour chacun des deux autres groupes. Les valeurs de l'échantillon sont pondérées en relation inverse de la probabilité qu'elles soient choisies. Cette échantillon est revisé annuellement suivant les résultats du recensement. Dans le but d'aider les services de comptabilité des sociétés à envoyer leurs déclarations à temps. Statistique Canada accepte une déclaration globale pour les sociétés ayant plus d'un établissement et une estimation des chiffres courants pour les établissements dont les stocks et les commandes en carnet ne sont pas recensés à la fin de chaque exercise comptable. On compte environ 11,000 établissements qui produisent des déclarations.

Les stocks

Il est important d'isoler les chiffres des éléments des stocks selon le stage de fabrication dans chaque industrie, lorsque c'est possible, afin de faire des études économiques et des extrapolations des chiffres de production. Â cet effet, on demande aux enquêtés de déclarer séparément la valeur comptable de leurs matières premières, de leurs produits en cours, de leurs produits finis et de leurs acomptes à valoir. Les niveaux des stocks sont calculés pour l'ensemble du Canada et non au niveau provincial.

On publie la valeur des stocks détenus et des stocks possédés. La différence entre les deux donne la valeur des acomptes versés par les fabricants sur des produits dont la fabrication n'est qu'en partie achevée comme les avions, le matériel ferroviaire roulant, les bâteaux et des constructions qui utilisent des semi-produits en acier. Â mesure que la fabrication de ces produits avance, la valeur globale des stocks augmente jusqu'au moment de la livraison. En déduisant le solde des acomptes comptabilisés par les fabricants de l'ensemble des stocks, on obtient la somme investie dans les stocks par les fabricants.

In order to reduce the distortion in the shipments of the four above mentioned industries that would be caused when responding companies finally treat such items of relatively high value as completed sales, a "production" value is used instead of shipments. This production value is derived from adjusting monthly shipments by the monthly change in inventories held (Goods in process held + Finished Products). The raw materials are not included in the calculation since production tries to measure "work done" during the month.

Orders

Most establishments that maintain order books strike a value of unfilled orders at the end of each accounting period. The survey seeks this value which is defined as orders received but not shipped or treated as a sale whether or not work has been done on them or they can be filled from existing stocks. No estimate of this value is made for those industries where orders are customarily filled from stocks on hand and orders books are accordingly not generally maintained.

New orders, a series of considerable economic interest, is a residual value derived from shipments and unfilled orders. All shipments within any month result from an order received either during that month or at some earlier time. New orders are calculated as the sum of total shipments within any month plus the change in the total of unfilled orders from the end of the previous month to the end of the month under review.

Imputation

Values must be imputed for those establishments that have not reported in time for compilation of monthly estimates. This is largely done by mechanical methods which take into account the activity of similar establishments from which reports have been received.

Revisions

Calculation of revised estimates for the immediately prior month in conjunction with preliminary estimates for the current month permits use of values reported too late for the first compilation. When respondents report values for periods earlier than those of the revised current estimates, the responses are used to correct the trends when the series are updated to new census benchmarks.

Definitions, classifications and groupings are based on those used by the census of manufactures.

The January 1973 issue of this publication contains a more detailed description of the concepts and survey methods for these series.

Afin de réduire la distortion qui surviendrait dans les quatres industries en cause au moment où les sociétés observées considèrent en fin de compte des produits d'une valeur relativement grande comme des ventes achevées, une valeur de "production" est utilisée au lieu des livraisons. Pour arriver à cette valeur de production, il s'agit d'ajuster la valeur mensuelle des livraisons par le changement mensuel dans les inventaires détenus (Produits en cours détenus + Produits finis). Les matières premières ne sont pas inclus dans ce calcul car nous essayons de calculer le "travail fait" durant le mois.

Les commandes

La plupart des établissements qui tiennent des carnets de commandes établissent la valeur des commandes en carnet à la fin de chaque exercise comptable. Lors de l'enquête, nous demandons cette valeur, qui est considérée comme commandes reçues mais non encore expédiées, que des travaux aient été effectués ou non à leur égard, lorsque la commande peut être honorée à partir des stocks existants. Cette valeur n'est pas estimée dans le cas des entreprises qui exécutent habituellement les commandes des réceptions, à partir de leurs stocks et qui par conséquent ne tiennent pas de carnet de commande.

Les séries sur les nouvelles commandes, qui présentent beaucoup d'intérêt du point de vue économique, donnent la valeur résiduelle établie à partir des livraisons et des commandes en carnet. Toutes les livraisons effectuées au cours d'un mois donné résultent d'une commande reçue soit pendant ce mois, soit avant. Les nouvelles commandes sont calculées à partir du total des livraisons au cours d'un mois donné plus la différence entre le total des commandes en carnet à la fin du mois précédent et le total des commandes en carnet à la fin du mois observé.

Imputation

Les valeurs doivent être imputées pour les établissements qui n'ont pas rapporté à temps pour la compilation des estimées mensuelles. Cette imputation se fait surtout par des moyens mécaniques qui tiennent compte de l'activité d'établissements semblables qui ont fait parvenir des déclarations.

Révisions

Le calcul des estimations revisées pour le mois précédent et des estimations préliminaires pour le mois observé permet d'utiliser les données déclarées trop tard pour la première compilation. Lorsque les répondants déclarent les chiffres correspondants aux périodes antérieures à celle des estimations révisées actuelles, les réponses servent à corriger les tendances lorsque les séries sont mises à jour d'après les nouvelles données repéré du recensement.

Les définitions, les classifications et les groupes sont basés sur ceux du recensement des manufactures.

Le numéro de janvier 1973 de cette publication contient une description plus détaillée des concepts et des méthodes d'enquête de cette série.

Historical Series

Major series published in this issue are stored in CANSIM, the computerized time series data bank of Statistics Canada. All or any part of these series may be purchased on magnetic tape or as computer print-outs. For further information direct inquiries to:

CANSIM,
Application Consulting Section,
Statistics Canada,
Ottawa, Ontario, K1A 0Z8

Seasonal Adjustment

The seasonal adjustment method applied to the series consists of the ratio-to-moving average method in use at Statistics Canada. The X-11 - ARIMA program is used for seasonal adjustment.

Some series containing no significant seasonality or very high irregularity have not been seasonally adjusted. In these cases, unadjusted values are repeated in the tables of seasonally adjusted data. See footnotes for series affected.

Months for Cyclical Dominance

The MCD or months for cyclical dominance values located at the right of the Cansim databank reference number for seasonally adjusted series, indicate the smallest span of months for which the average change in the cyclical factor is greater than that for the irregular factor. For the smoothest series the MCD is one; for the most erratic series, it is twelve. Application of a moving average of the period of the MCD will tend to smooth irregular movements that may obscure the underlying trend-cycle.

The Economic Use Classification (EUC)

The concept of the Economic Use Classification (EUC) consists of combining activities of individual industries at the finest level of aggregation identified by the Standard Industrial Classification (SIC) and bring together, in a general sense, industries whose outputs are directed towards the different types of markets served by industry or, in other words, groups that reflect demand on manufacturing industries by elements of the gross national expenditure.

The present EUC consists of six mutually exclusive groups and a supplementary automotive group. Although the output of an industry may serve a market that spans more than one classification, no attempt is made to subdivide that industry's output into finer detail than that identified by the SIC. Thus the distribution of specific industries to economic uses is determined by the perceived market for the greatest share of the industry's output.

Séries chronologiques

Les séries importantes publiées dans cette livraison sont stockées dans le CANSIM, banque électronique de données sur les séries chronologiques de Statistique Canada. On peut acheter toutes ces séries ou une partie d'entre elles sur bandes magnétiques ou sous forme d'états mécanographiques. Pour tout renseignement complémentaire, s'adresser au:

CANSIM,
Section de consultants aux applications,
Statistique Canada,
Ottawa (Ontario) K1A 0Z8

Désaisonnalisation

On désaisonnalise des séries en calculant le rapport à la moyenne mobile, suivant les méthodes utilisées à Statistique Canada. Il s'agit en l'occurrance du programme normalisé qui sert à appliquer le version X-11 - ARMMI.

Pour quelques séries particulières, il n'y a pas de saisonnalité d'importance, ou il y a trop d'irrégularité. Ces séries n'ont pas été désaisonnalisées. Pour ces cas, les valeurs, sans désaisonnalisation ont été répétées dans les tableaux des séries désaisonnalisées. Voir les notes pour les séries affectées.

Mois de dominance cyclique

Les valeurs de M.D.C. (mois de dominance cyclique) sont situées à la droite du numéro de référence de la Banque de données de "Cansim" pour les séries désaisonnalisées indiquent le plus petit nombre de mois pour lequel la variation moyenne du facteur cyclique est plus grande que celle du facteur d'irrégularité. Le M.D.C. est de un pour les séries les plus régulières et de douze pour les plus fluctuantes. L'application d'une moyenne mobile de la période des M.D.C. aidera à lisser les mouvements irréguliers qui pourraient masquer la tendance cyclique implicite.

Classification des groupes selon l'utilisation économique (CGUE)

Le concept de la classification des groupes selon l'utilisation économique (CGUE) est de combiner les activités des industries à leur plus bas niveau d'aggrégation identifié par la classification type des industries (C.T.I.) et de rassembler les industries d'après le marché desservi ou encore, en groupe d'après la demande sur les industries manufacturières par les éléments de la dépense nationale brute.

La CGUE comprend six groups mutuellement exclusifs et une classification complémentaire des industries connexes de l'automobile. Bien que la production d'une industrie peut servir plus d'un marché, aucun effort est fait pour subdiviser la production de cette industrie dans plus de détail que fournit par la C.T.I. Donc, la distribution d'industries spécifiques a un groupe économique se fait entièrement vers le marché qui est perçu comme étant le plus important pour l'industrie en question.

Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Shipments, Inventories and Orders Section,
Manufacturing and Primary Industries Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 990-9832) or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(949-4020)
Montréal	(283-5725)	Regina	(359-5405)
Ottawa	(990-8116)	Edmonton	(420-3027)
Toronto	(973-6586)	Vancouver	(666-3691)
Credit Card only (973-8018)			

Toll-free access is provided in all provinces and territories, **for users who reside outside the local dialing area** of any of the regional reference centres.

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Section des livraisons, des stocks et des commandes,
Division des industries manufacturières et primaires,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 990-9832) ou au centre de consultation de Statistique Canada à:

Inventories, shipments and orders in manufacturing industries

June 1985

Projected from 1981 Census of Manufactures benchmarks.

Starting with the January 1985 issue, the tables are now based on the 1980 Standard Industrial Classification (S.I.C.). Please see the explanation of the revisions on the following pages concerning the changes from the 1970 to the 1980 S.I.C.

Stocks, livraisons et commandes des industries manufacturières

Juin 1985

Projections effectuées à partir des données de référence du recensement des manufactures de 1981.

Les tableaux que contient cette publication, sont depuis janvier 1985, basés sur la Classification Type des Industries 1980 (C.T.I.). Veuillez s.v.p. noter les explications données dans les pages suivantes concernant des changements entre la C.A.É. de 1970 et la C.T.I. de 1980.

HIGHLIGHTS

June 1985

- Preliminary estimates show that the seasonally adjusted value of shipments in all Canadian manufacturing industries decreased 0.3% to $19,946.4 million in June from the revised estimate of $20,007.4 million in May. Shipments of durable goods industries were down 0.9% to $9,591.9 million from $9,678.6 million. A decrease of $71.8 million in transportation equipment industries accounted for most of the loss. An increase of $99.5 million in chemical and chemical products industries was the major contributor to a 0.2% increase in non-durable goods industries as shipments went from $10,328.9 million to $10,354.5 million.

- Seasonally adjusted inventories owned by manufacturers at the end of June were $33,800.5 million, up 0.7% from the previous month's revised value of $33,560.5 million. Total inventories held increased 0.8% to $35,-124.2 million from $34,850.7 million with increases of 1.3% in raw materials and of 1.2% in goods in process. There was, however, a 0.1% decrease in finished products.

- The ratio of seasonally adjusted total inventory owned to seasonally adjusted shipments went from 1.68:1 in May to 1.69:1 in June. The ratio of finished products inventory to shipments remained at 0.62:1.

- The value of new orders received in June, seasonally adjusted, increased 1.3% to $20,429.0 million from the revised May estimate of $20,158.9 million. In durable goods industries, new orders, with an estimated value of $10,042.2 million, were 2.6% higher than the May value of $9,786.2 million where increases of $240.6 million in transportation equipment industries and of $118.9 million in electrical and electronic products industries were partly offset by decreases of $71.8 million in primary metal industries and of $67.0 million in machinery industries. In non-durable goods industries, new orders were valued at $10,386.8 million, up 0.1% from the revised estimate for May of $10,372.7 million.

- The seasonally adjusted unfilled orders backlog at the end of June was $22,675.6 million, up 2.2% from the revised May estimate of $22,193.0 million. Unfilled orders increased 2.2% in durable goods industries to $20,648.8 million from $20,198.5 million at the end of May. In non-durable goods industries, the unfilled orders were up 1.6% to $2,026.8 million from $1,994.6 million.

- Not adjusted for seasonal variation, manufacturers' shipments in June 1985 were estimated at $21,227.2 million, 0.3% lower than the revised May value of $21,300.5 million. Cumulative shipments for the first six months of 1985, at an estimated $119,433.7 million, were up 6.0% from the $112,640.0 million estimated for the same period in 1984.

POINTS SAILLANTS

Juin 1985

- Après désaisonnalisation, la valeur des livraisons des industries manufacturières canadiennes s'est établie à $19,946.4 millions en juin, soit une baisse de 0.3% par rapport à la valeur révisée de $20,007.4 millions en mai. Une diminution de 0.9% a été enregistrée pour les biens durables qui sont passés de $9,678.6 millions à $9,591.9 millions. Cette baisse est principalement attribuable à une diminution de $71.8 millions dans les industries du matériel de transport. Les livraisons des biens non durables ont augmenté de 0.2% passant de $10,328.9 millions à $10,354.5 millions. Cette augmentation est principalement attribuable à un gain de $99.5 millions dans les industries chimiques.

- La valeur désaisonnalisée du total des stocks possédés était de $33,800.5 millions en juin, une hausse de 0.7% par rapport à la valeur du mois précédent de $33,560.5 millions. Pour leur part, les stocks détenus ont augmenté de 0.8% à $35,124.2 millions de $34,850.7 millions. Des augmentations ont été enregistrées au chapitre des matières premières (+ 1.3%) et des biens en cours de transformation (+ 1.2%) mais une diminution de 0.1% a été enregistrée pour les produits finis.

- Le rapport désaisonnalisé du total des stocks possédés aux livraisons est passé de 1.68:1 en mai à 1.69:1 en juin. Le rapport des produits finis aux livraisons est resté inchangé à 0.62:1.

- La valeur désaisonnalisée des nouvelles commandes dans l'ensemble des industries manufacturières a été estimée à $20,429.0 millions, ce qui représente une hausse de 1.3% par rapport au mois précédent qui était de $20,158.9 millions. Dans les industries des biens durables, la valeur estimative de $10,042.2 millions était supérieure de 2.6% à la valeur de mai de $9,786.2 millions. Cette augmentation est principalement attribuable à des hausses de $240.6 millions dans les industries du matériel de transport et de $118.9 millions dans les industries des produits électriques et électroniques. Ces augmentations ont été en partie contre-balancées par des diminutions de $71.8 millions dans les industries de première transformation des métaux et de $67.0 millions dans les industries de la machinerie. Les nouvelles commandes des biens non durables ont atteint $10,386.8 millions, soit une hausse de 0.1% par rapport à la valeur révisée de mai ($10,372.7 millions).

- La valeur estimative des commandes en carnet, après désaisonnalisation, s'est établie à $22,675.6 millions en juin, une hausse de 2.2% par rapport à la valeur de mai de $22,193.0 millions. Les commandes en carnet des biens durables ont augmenté de 2.2% passant de $20,198.5 millions à $20,648.8 millions alors que celles des biens non durables ont augmenté de 1.6% à $2,026.8 millions de $1,994.6 millions.

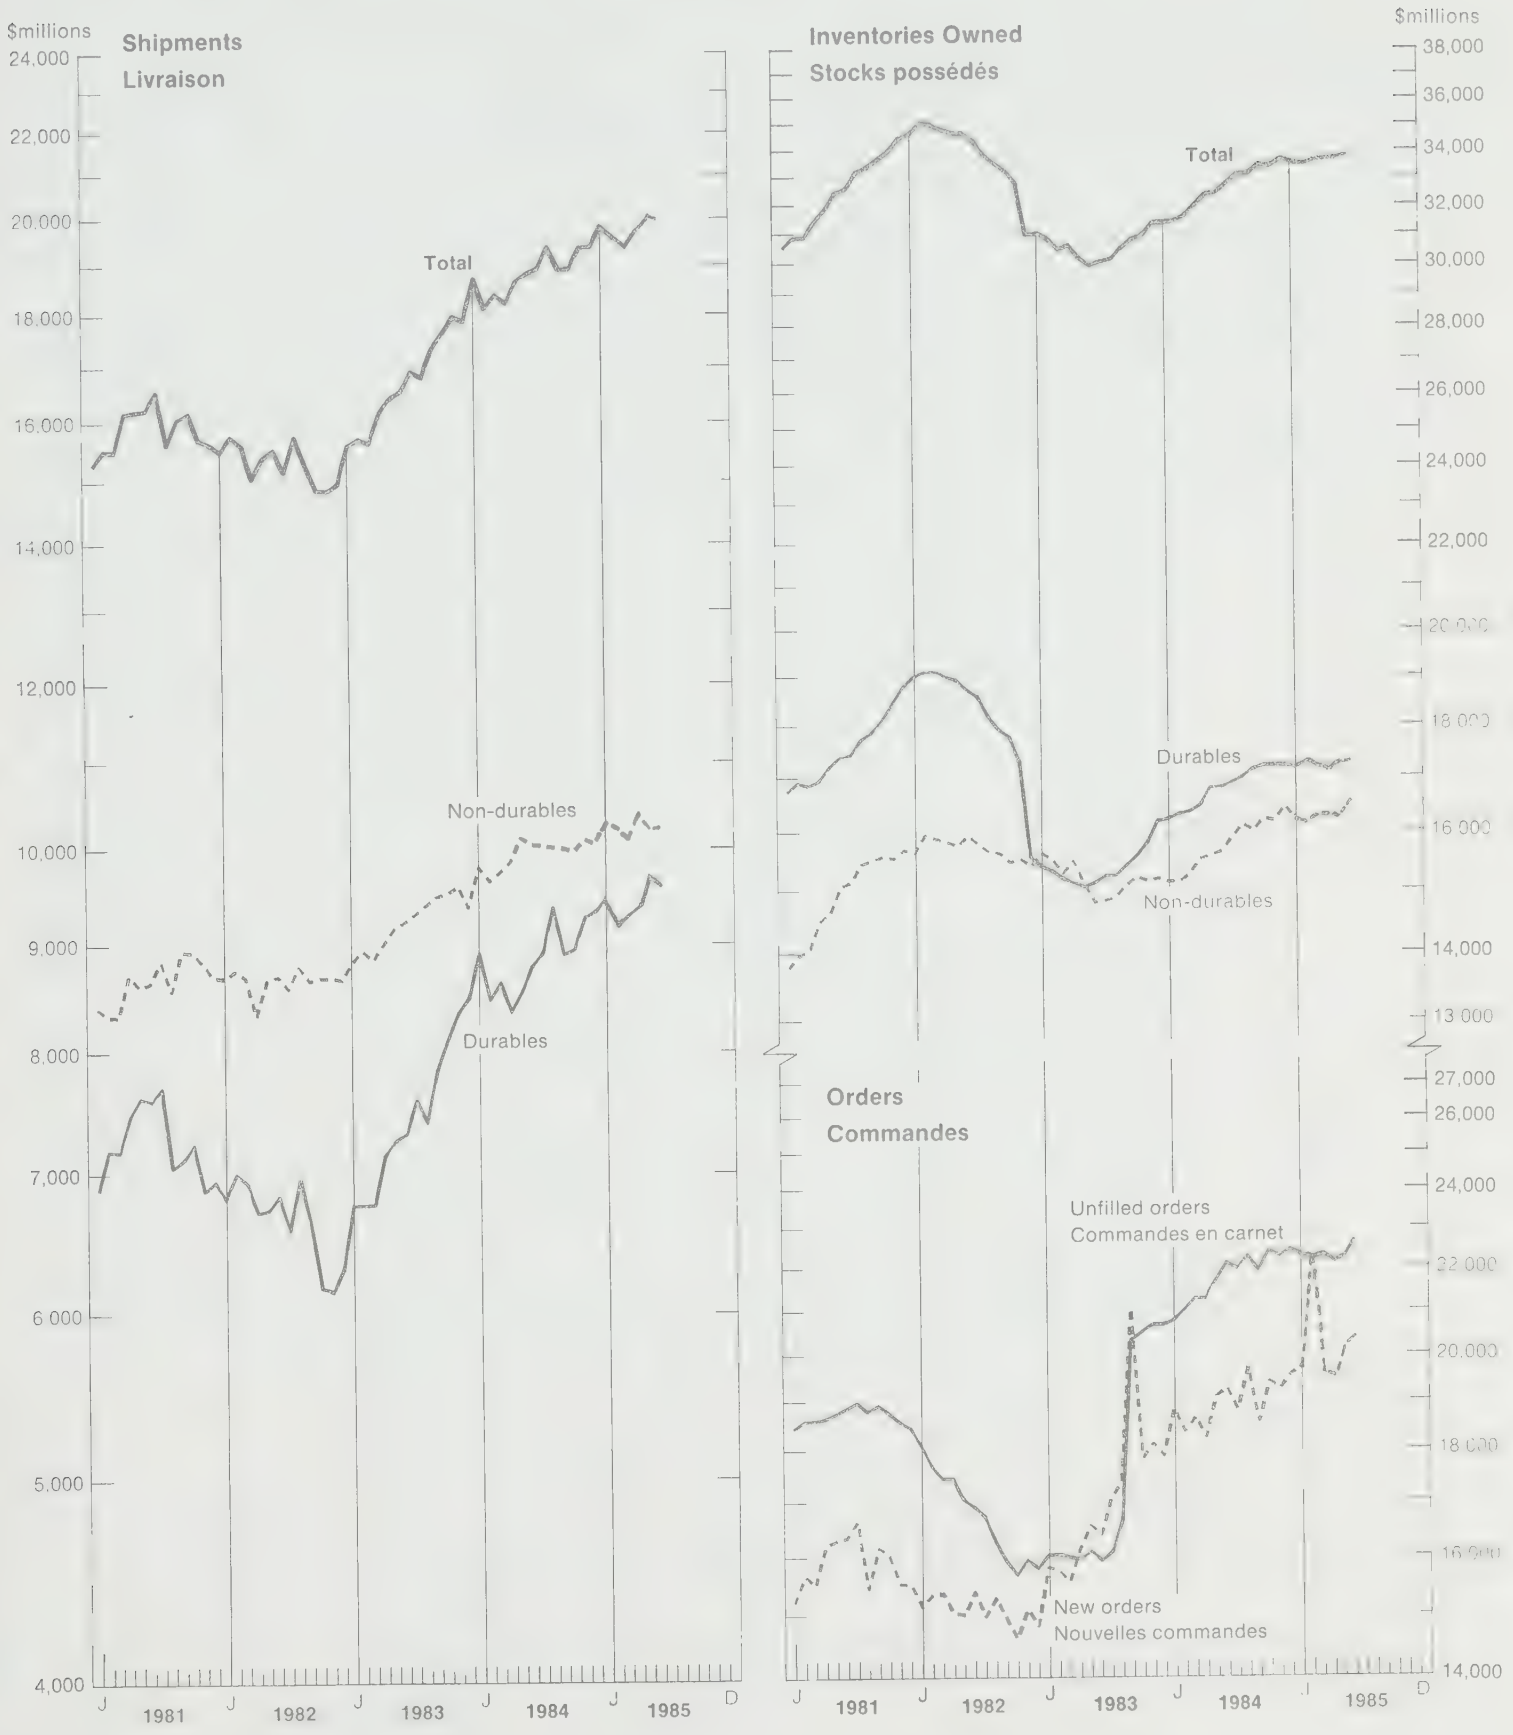

- On a estimé à $21,227.2 millions les livraisons non désaisonnalisées en juin 1985, ce qui représente une baisse de 0.3% par rapport à la valeur révisée de mai de $21,300.5 millions. Pour les six premiers mois de 1985, les livraisons estimatives ont totalisé $119,433.7 millions, soit une hausse de 6.0% par rapport à $112,640.0 millions obtenus au cours de la période correspondante de 1984.

FOOTNOTES

Table 1

(1) Although separate series for the Yukon and the Northwest Territories are not published, their values are included in the Canada total.

(2) The value for total shipments contains four industries where "production" is used instead of shipments. Please see concepts and methods, 5th paragraph for more details.

Tables 3-4

(1) Series in Table 3, which contain no significant seasonality, include: raw materials in the petroleum industries; goods in process in the primary metal industries; and inventory held but not owned in the transportation equipment industries and in Table 4: the series for unfilled orders in the export-oriented industries and supplementary classification - automotive products industries; and raw materials in the supplementary classification - automotive products industries. Therefore, these series are repeated without adjustment in the tables of seasonally adjusted estimates and aggregates of which they are components. Small differences in the unadjusted values, when repeated, may result from rounding techniques.

Table 6

(1) For this industry, "production" is used instead of shipments. For explanation, please see concepts and methods, 5th paragraph.

Note: Figures may not add due to rounding.

NOTES

Tableau 1

(1) Même si les séries pour le Yukon et les Territoires du Nord-Ouest ne sont pas publiées elles sont cependant inclues dans le total pour le Canada.

(2) La valeur des livraisons totales contient quatre industries ou la "production" est utilisée au lieu des livraisons. Pour plus de détails, voir le 5ième paragraphe des concepts et méthodes.

Tableaux 3-4

(1) Les séries du tableau 3, qui sont peu sensibles aux variations saisonnières incluent: les matières premières dans l'industrie pétrolière, les biens en cours dans les industries de première transformation les métaux, les stocks détenus mais non possédés dans les industries du matériel de transport et du tableau 4: la série des commandes en carnet dans les industries orientées vers l'exportation et dans la classification complémentaire-industries connexes de l'automobile, ainsi que les matières premières dans la classification complémentaire-industries connexes de l'automobile. Le tableau de la série désaisonnalisée répète donc les valeurs non corrigées. Les différences minimes entre les séries sont attribuables à la technique d'arrondissement utilisée.

Tableau 6

(1) Pour cette industrie, la "production" est utilisée au lieu des livraisons. Pour plus de détails, voir le 5ième paragraphe des concepts et méthodes.

Nota: Les chiffres ne totaliseront peut-être pas en raison de l'arrondissement.

CONCEPTS AND METHODS

Estimation Method

Inventories, shipments and orders values in this publication constitute monthly projections of annual census of manufactures values based on returns from a stratified, systematic sample of manufacturing establishments. The data in the January 1985 publication are the first to be published under the 1980 Standard Industrial Classification (SIC). The data in this publication are benchmarked to the 1981 Census. Values for years prior to 1981 have been previously benchmarked to the corresponding census data and the aggregate of monthly shipments in those years should correspond with published census values. Because the monthly estimates subsequent to 1981 are projections these totals are subject to adjustment when more recent census data become available. Inventory estimates for December published here, differ from year-end census values to the extent that census totals include individual establishment reports for fiscal years that may end on dates other than December 31. Unfilled orders are published for industries where maintenance of a continuing record of the value of an establishment's backlog of orders is a normal part of the accounting procedure.

The population of manufacturing establishments is divided into groups of large, medium and small establishments according to the value of shipments reported for the census year. Monthly values are sought for all large establishments and a sample is chosen separately for each of the other two size groups. Sample unit values are weighted according to the inverse of their probability of selection. This sample is revised annually in accordance with the census base. To facilitate timely response from company accounting departments, combined reports are accepted from companies with more than one establishment. Estimates of current values are accepted from establishments where the inventory and unfilled orders levels are not measured at the end of each accounting period. There are about 11,000 establishments in the reporting panel.

Inventories

Isolation of component values of inventory by level of fabrication in each industry, where possible, is important for economic studies as well as for derivation of production values. To facilitate this, respondents are asked to report their book values of raw materials, work in process, finished products and progress payments separately. The inventory levels are calculated on a Canada-wide basis, not by province.

Both inventory held and inventory owned, are published. The difference between inventory held and inventory owned, is the value of progress payments received by manufacturers for partially completed items such as aircraft, railroad rolling stocks, ships and structures using fabricated steel. As work proceeds on such items, total inventory values increase until the time of delivery. By deducting the balance of progress payments on manufacturers' books from total inventory, the value of manufacturers' investment in inventory is derived.

CONCEPTS ET MÉTHODES

Méthode d'estimation

Les chiffres sur les stocks, les livraisons et les commandes qui figurent dans cette publication sont des projections mensuelles des résultats du recensement annuel des manufactures établies à partir des déclarations d'un échantillon stratifié et systématique d'établissements manufacturiers. Les données que contient la publication de janvier 1985 sont les premières qui soient publiées sous la Classification Type des Industries (C.T.I.) de 1980. Les données que contient la publication sont ajustées en fonction du recensement de 1981. Les chiffres pour les années jusqu'à 1981 inclusivement ont été raccordés aux recensements en cause et la somme des livraisons mensuelles de ces années doit être égale aux résultats de recensements qui ont été publiés. Comme les estimations mensuelles postérieures à 1981 sont des projections, elles pourront être rectifiées lorsqu'on disposera des données de recensement plus récentes. Les estimations sur les stocks publiées dans ce bulletin sont celles de décembre, elles diffèrent donc des chiffres du recensement se rapportant à la fin de l'année dans la mesure où les totaux du recensement comprennent les déclarations de certains établissements pour des années financières qui peuvent prendre fin à d'autres dates qu'au 31 décembre. Les commandes en carnet sont publiées pour les industries où la comptabilité normale prévoit de consigner la valeur des commandes en souffrance des établissements d'une manière suivie.

La population des établissements manufacturiers se divise en trois groupes d'établissements (grands, moyens et petits) suivant la valeur des livraisons déclarées pour l'année de recensement. On demande des déclarations mensuelles à tous les grands établissements et on tire un échantillon séparé pour chacun des deux autres groupes. Les valeurs de l'échantillon sont pondérées en relation inverse de la probabilité qu'elles soient choisies. Cette échantillon est revisé annuellement suivant les résultats du recensement. Dans le but d'aider les services de comptabilité des sociétés à envoyer leurs déclarations à temps. Statistique Canada accepte une déclaration globale pour les sociétés ayant plus d'un établissement et une estimation des chiffres courants pour les établissements dont les stocks et les commandes en carnet ne sont pas recensés à la fin de chaque exercise comptable. On compte environ 11,000 établissements qui produisent des déclarations.

Les stocks

Il est important d'isoler les chiffres des éléments des stocks selon le stage de fabrication dans chaque industrie, lorsque c'est possible, afin de faire des études économiques et des extrapolations des chiffres de production. Â cet effet, on demande aux enquêtés de déclarer séparément la valeur comptable de leurs matières premières, de leurs produits en cours, de leurs produits finis et de leurs acomptes à valoir. Les niveaux des stocks sont calculés pour l'ensemble du Canada et non au niveau provincial.

On publie la valeur des stocks détenus et des stocks possédés. La différence entre les deux donne la valeur des acomptes versés par les fabricants sur des produits dont la fabrication n'est qu'en partie achevée comme les avions, le matériel ferroviaire roulant, les bâteaux et des constructions qui utilisent des semi-produits en acier. Â mesure que la fabrication de ces produits avance, la valeur globale des stocks augmente jusqu'au moment de la livraison. En déduisant le solde des acomptes comptabilisés par les fabricants de l'ensemble des stocks, on obtient la somme investie dans les stocks par les fabricants.

In order to reduce the distortion in the shipments of the four above mentioned industries that would be caused when responding companies finally treat such items of relatively high value as completed sales, a "production" value is used instead of shipments. This production value is derived from adjusting monthly shipments by the monthly change in inventories held (Goods in process held + Finished Products). The raw materials are not included in the calculation since production tries to measure "work done" during the month.

Afin de réduire la distortion qui surviendrait dans les quatres industries en cause au moment où les sociétés observées considèrent en fin de compte des produits d'une valeur relativement grande comme des ventes achevées, une valeur de "production" est utilisée au lieu des livraisons. Pour arriver à cette valeur de production, il s'agit d'ajuster la valeur mensuelle des livraisons par le changement mensuel dans les inventaires détenus (Produits en cours détenus + Produits finis). Les matières premières ne sont pas inclus dans ce calcul car nous essayons de calculer le "travail fait" durant le mois.

Orders

Most establishments that maintain order books strike a value of unfilled orders at the end of each accounting period. The survey seeks this value which is defined as orders received but not shipped or treated as a sale whether or not work has been done on them or they can be filled from existing stocks. No estimate of this value is made for those industries where orders are customarily filled from stocks on hand and orders books are accordingly not generally maintained.

New orders, a series of considerable economic interest, is a residual value derived from shipments and unfilled orders. All shipments within any month result from an order received either during that month or at some earlier time. New orders are calculated as the sum of total shipments within any month plus the change in the total of unfilled orders from the end of the previous month to the end of the month under review.

Les commandes

La plupart des établissements qui tiennent des carnets de commandes établissent la valeur des commandes en carnet à la fin de chaque exercise comptable. Lors de l'enquête, nous demandons cette valeur, qui est considérée comme commandes reçues mais non encore expédiées, que des travaux aient été effectués ou non à leur égard, lorsque la commande peut être honorée à partir des stocks existants. Cette valeur n'est pas estimée dans le cas des entreprises qui exécutent habituellement les commandes des réceptions, à partir de leurs stocks et qui par conséquent ne tiennent pas de carnet de commande.

Les séries sur les nouvelles commandes, qui présentent beaucoup d'intérêt du point de vue économique, donnent la valeur résiduelle établie à partir des livraisons et des commandes en carnet. Toutes les livraisons effectuées au cours d'un mois donné résultent d'une commande reçue soit pendant ce mois, soit avant. Les nouvelles commandes sont calculées à partir du total des livraisons au cours d'un mois donné plus la différence entre le total des commandes en carnet à la fin du mois précédent et le total des commandes en carnet à la fin du mois observé.

Imputation

Values must be imputed for those establishments that have not reported in time for compilation of monthly estimates. This is largely done by mechanical methods which take into account the activity of similar establishments from which reports have been received.

Imputation

Les valeurs doivent être imputées pour les établissements qui n'ont pas rapporté à temps pour la compilation des estimées mensuelles. Cette imputation se fait surtout par des moyens mécaniques qui tiennent compte de l'activité d'établissements semblables qui ont fait parvenir des déclarations.

Revisions

Calculation of revised estimates for the immediately prior month in conjunction with preliminary estimates for the current month permits use of values reported too late for the first compilation. When respondents report values for periods earlier than those of the revised current estimates, the responses are used to correct the trends when the series are updated to new census benchmarks.

Definitions, classifications and groupings are based on those used by the census of manufactures.

The January 1973 issue of this publication contains a more detailed description of the concepts and survey methods for these series.

Révisions

Le calcul des estimations revisées pour le mois précédent et des estimations préliminaires pour le mois observé permet d'utiliser les données déclarées trop tard pour la première compilation. Lorsque les répondants déclarent les chiffres correspondants aux périodes antérieures à celle des estimations révisées actuelles, les réponses servent à corriger les tendances lorsque les séries sont mises à jour d'après les nouvelles données repéré du recensement.

Les définitions, les classifications et les groupes sont basés sur ceux du recensement des manufactures.

Le numéro de janvier 1973 de cette publication contient une description plus détaillée des concepts et des méthodes d'enquête de cette série.

Historical Series

Major series published in this issue are stored in CANSIM, the computerized time series data bank of Statistics Canada. All or any part of these series may be purchased on magnetic tape or as computer print-outs. For further information direct inquiries to:

CANSIM,
Application Consulting Section,
Statistics Canada,
Ottawa, Ontario, K1A 0Z8

Seasonal Adjustment

The seasonal adjustment method applied to the series consists of the ratio-to-moving average method in use at Statistics Canada. The X-11 - ARIMA program is used for seasonal adjustment.

Some series containing no significant seasonality or very high irregularity have not been seasonally adjusted. In these cases, unadjusted values are repeated in the tables of seasonally adjusted data. See footnotes for series affected.

Months for Cyclical Dominance

The MCD or months for cyclical dominance values located at the right of the Cansim databank reference number for seasonally adjusted series, indicate the smallest span of months for which the average change in the cyclical factor is greater than that for the irregular factor. For the smoothest series the MCD is one; for the most erratic series, it is twelve. Application of a moving average of the period of the MCD will tend to smooth irregular movements that may obscure the underlying trend-cycle.

The Economic Use Classification (EUC)

The concept of the Economic Use Classification (EUC) consists of combining activities of individual industries at the finest level of aggregation identified by the Standard Industrial Classification (SIC) and bring together, in a general sense, industries whose outputs are directed towards the different types of markets served by industry or, in other words, groups that reflect demand on manufacturing industries by elements of the gross national expenditure.

The present EUC consists of six mutually exclusive groups and a supplementary automotive group. Although the output of an industry may serve a market that spans more than one classification, no attempt is made to subdivide that industry's output into finer detail than that identified by the SIC. Thus the distribution of specific industries to economic uses is determined by the perceived market for the greatest share of the industry's output.

Séries chronologiques

Les séries importantes publiées dans cette livraison sont stockées dans le CANSIM, banque électronique de données sur les séries chronologiques de Statistique Canada. On peut acheter toutes ces séries ou une partie d'entre elles sur bandes magnétiques ou sous forme d'états mécanographiques. Pour tout renseignement complémentaire, s'adresser au:

CANSIM,
Section de consultants aux applications,
Statistique Canada,
Ottawa (Ontario) K1A 0Z8

Désaisonnalisation

On désaisonnalise des séries en calculant le rapport à la moyenne mobile, suivant les méthodes utilisées à Statistique Canada. Il s'agit en l'occurrance du programme normalisé qui sert à appliquer le version X-11 - ARMMI.

Pour quelques séries particulières, il n'y a pas de saisonnalité d'importance, ou il y a trop d'irrégularité. Ces séries n'ont pas été désaisonnalisées. Pour ces cas, les valeurs, sans désaisonnalisation ont été répétées dans les tableaux des séries désaisonnalisées. Voir les notes pour les séries affectées.

Mois de dominance cyclique

Les valeurs de M.D.C. (mois de dominance cyclique) sont situées à la droite du numéro de référence de la Banque de données de "Cansim" pour les séries désaisonnalisées indiquent le plus petit nombre de mois pour lequel la variation moyenne du facteur cyclique est plus grande que celle du facteur d'irrégularité. Le M.D.C. est de un pour les séries les plus régulières et de douze pour les plus fluctuantes. L'application d'une moyenne mobile de la période des M.D.C. aidera à lisser les mouvements irréguliers qui pourraient masquer la tendance cyclique implicite.

Classification des groupes selon l'utilisation économique (CGUE)

Le concept de la classification des groupes selon l'utilisation économique (CGUE) est de combiner les activités des industries à leur plus bas niveau d'aggrégation identifié par la classification type des industries (C.T.I.) et de rassembler les industries d'après le marché desservi ou encore, en groupe d'après la demande sur les industries manufacturières par les éléments de la dépense nationale brute.

La CGUE comprend six groups mutuellement exclusifs et une classification complémentaire des industries connexes de l'automobile. Bien que la production d'une industrie peut servir plus d'un marché, aucun effort est fait pour subdiviser la production de cette industrie dans plus de détail que fournit par la C.T.I. Donc, la distribution d'industries spécifiques a un groupe économique se fait entièrement vers le marché qui est perçu comme étant le plus important pour l'industrie en question.

JUL 16 1986
